### CANADIAN LIBRARY LEGISLATION

### INTRODUCTION

Public Library Legislation.—With the exception of New Brunswick all the provinces and the Yukon Territory have some form of public library legislation. In the older provinces the earliest legislation was for the establishment or incorporation of mechanics' institutes and library associations, the mechanics' institutes being patterned after those of the British Isles, which have had an important history. The first province to have a Free Libraries Act was Ontario. All of the four western provinces appear to have used this act as a model in legislating for public library promotion. In these acts a special library tax is stipulated; the number and personnel of the library board and their term of service indicated; the frequency of meetings stated, special meetings provided for; the date of the annual meeting set; the number of members constituting a quorum indicated, also the details covered by the yearly estimates and the annual report. Provision is also made for dissolution of a library in certain circumstances. The new Public Libraries Act of British Columbia, by which the Public Library Commission was established, was drawn up independently of the Public Libraries Acts of the other provinces. It is a long act, containing provisions not included in the legislation of the other provinces, and at the same time leaving certain details, included by the other provinces, to be specified in the by-laws of individual libraries.

In Ontario and British Columbia special provision has been made for the activities of the travelling library service. In Ontario and Saskatchewan the administration of the Public Libraries Act is under the Department of Education. In Prince Edward Island and in the Yukon legislation has been enacted for the libraries of specified cities or towns. The laws of the Yukon, British Columbia, Saskatchewan and Alberta make provision for the erection or improvement

of public library buildings.

School Libraries.—The earliest record of library legislation found is in connection with school libraries, in 1850. There is some type of legislation for school libraries in every province and in the Yukon. In Prince Edward Island and New Brunswick the provisions of the acts are practically identical, specifying grants from the Board of Education. Schools in Nova Scotia, Quebec, Alberta and British Columbia are entitled to receive provincial aid for their libraries. Local aid is also required for school libraries in Nova Scotia and British Columbia, and is provided for in Manitoba, Saskatchewan and the Yukon.

Legislative Libraries and Law Libraries.—The legislative libraries of Nova Scotia and Quebec, and the Provincial Library of Manitoba were established by the acts for that specific purpose. A clause relating to the staff of the Ontario Legislative Library is inserted in the statute law quoted in the following article. The Provincial Library Act of Manitoba was repealed by the act establishing the Department of the Library and Museum. The Legislative Library and Bureau of Statistics Act of British Columbia also established a government department. There were acts which established the law libraries at Fredericton and Winnipeg and the Advocates' Libraries at Montreal and Quebec and the Quebec Library.

### PUBLIC LIBRARIES

### PRINCE EDWARD ISLAND

Grand Tracadie Membership.

The Public libraries of Prince Edward Island have been established by a separate Charlottetown: act for each library, the Charlottetown Library Association, the Summerside Public Summerside. Library, and the Grand Tracodic Library Club of Queens County. The Charlotte-Grand town Library Association Act of 1888 was the earliest of the three. By this act the association was incorporated. A subscription of \$50 constituted a life membership until the forming of a Joint Stock Company, with a capital of not more than \$20,000, voting powers of each member of the association being regulated by the number of the shares each should hold. The remaining two Acts were passed in 1908. A life membership in the Summerside Free Public Library, Incorporated, is obtained by Voting powers. the payment of \$25, an annual membership by the payment of \$1, the latter giving a member full privileges for that year. The Act of Incorporation of the Grand Tracadie Library Club permits the Club to make its own by-laws and appointments.

### NOVA SCOTIA

In the Revised Statutes of Nova Scotia of 1884 (c. 81) is an Act dealing with "Library associations and institutes." This Act, which was without amendment until 1905, stated that 10 or more persons having at least \$100 in money or property might declare their intention of establishing a library association or institute, or both, at some designated place, stating (in the declaration) the proposed name and purpose of the organization, the amount subscribed and the names of the trustees,

By-laws. Appointments.

Library association or institute

also the mode of appointment of successors or new members and the mode of making by-laws, and other items; upon filing a duplicate of this declaration with the Registrar of Deeds, the process of incorporation being completed. The management of the incor-Incorporation poration was in the hands of the directors or a majority of them, by whom the by-laws would be made. At the annual meeting the president and librarian must be appointed, also the directors or trustees for the ensuing year, or until the appointment officers. of successors. A fine not to exceed \$4 for infraction of by-laws was authorized. By the amendment of 1905 (c. 43) provision was made for a vote by the town or municipal Support. council of \$500 annually towards the support of a library association or similar body within the same county, and for the levying of a tax to raise this appropriation. All library property incorporated under this act was declared free of taxation. An amend-Freedom from ment of 1922 (c. 15) increased the appropriation from \$500 to \$1,500.

### NEW BRUNSWICK

New Brunswick has no public library legislation.

### QUEBEC

The act of 1851 respecting library associations and mechanics' institutes is recorded in the Consolidated Statutes of Canada (c. 72, s. 21) and stated that 10 or more persons having at least \$100 in money or property for the use of the institute might file with the Registrar of deeds a declaration of their intention to establish either a mechanics' institute or a library association or both at some specific place, an-Mechanics' nouncing the purpose for creating the organization and stating the names of the institute and proposed trustees, the amount subscribed and certain other details. This act also pro-library association. vided for the incorporation of mechanics' institutes or library associations already association. existing. In a city or town with a population of more than 3,000, land to the value of \$2,000 might be held by the corporation. If the population of city or town were less than 3,000 the land held could be worth \$1,000. These amounts were increased by the amendment of 1856 (Can. c. 51) to \$2,500 and \$1,250 respectively. If the community were not incorporated the land might only be of a value of \$400. Provision was made for a fine not greater than \$4 for infraction of by-laws by a member or Penalty. one who had agreed in writing to observe them, this fine to be used by the corporation. A library association and a mechanics' institute might be combined with each other but with no other institution or business. The by-laws might provide Dissolution. for dissolution of the corporation. This act appears in the Revised Statutes of Quebec 1909 (title 8, c. 1). In 1890 (c. 34) an act was passed to authorize city, town and village corporations to aid in support of public libraries in their own or an adjacent municipality, and to aid mechanics' institutes or library associations pro-Grant to organizations vided that they should be free. when free.

### ONTARIO

In the Consolidated Municipal Act of Ontario for 1892 (c. 42, s. 479, ss. 9), there is provision for a by-law for grant of money or land by the council of every Aid. county, township, town and incorporated village in aid of any incorporated mechanics' institute or free library established under the Free Libraries Act of 1882 (45 Vic. Free Libraries] c. 22; R.S.O. 1887 c. 189). The Public Libraries Act was passed in 1895 (58 Vic. Act. c. 45; R.S.O. 1897 c. 232) and was re-enacted in 1909 (9 Ed. VII c. 80; R.S.O. 1914, c. 202) when a provision was included for the establishment and maintenance of travelling libraries under the administration of the Minister of Education. In 1916 an amendment was made to include provision for a township library board. Board. An amendment of 1919 (9 Geo. V, c. 25 s. 26-29) increased the public library rate Rate. from a maximum of \(^3\) of a mill to one mill in the dollar. In 1920 the Public Libraries Act was consolidated and amended (10-11 Geo. V, c. 69), and in 1925 (15 Geo. V, c. 63), an amending act provided for a retiring allowance or gratuity for any em-Pensions. ployee not to exceed his last three years' salaries combined, should he be compelled by age or ill-health to give up his position; and also for the establishment by by-law in cities of over 50,000 population, of a pension or life insurance fund or both for employees, with or without contributions from them to such a fund.

The Public Libraries Acts of the Prairie Provinces are founded on the Ontario Act. In Ontario the library board in a city, town or village may consist of nine members, including the mayor or reeve, three members appointed by the council, three appointed by the public school board and two appointed by the separate Board. school board if there is one in the community, each member being appointed for a term of three years, except that at the forming of the board one member of each group shall hold office till the first annual meeting, and one of each group until the second annual meeting or until appointment of successors. In police villages seven members shall constitute a board: the chairman of the board of police trustees and two other persons appointed by the police trustees, two appointed by the board of the school section or sections, and two by the separate school board, if any.

25391-111

Quorum. Meetings. Estimates.

Levy.

The library board in a township shall consist of five members. In Ontario a majority of the members of the library board constitute a quorum, and the board meetings must be held at least once a month from September to June. The estimates cover (a) interest on money borrowed (b) amount to be raised on the sinking fund (c) expense of maintenance and management. The public library rate fixed by the act of 1920 is not to exceed 50 cents per capita of population, except when by a vote of a majority of the council or board this rate is increased to an amount equal to not more than 75 cents per capita. An exception is made in the case of libraries that, previous to January 1, 1917, had made some agreement whereby a gift was received on the condition that not less than a stated amount would be expended for library maintenance. For such a library it is permitted to levy and assess a sufficient rate to provide funds necessary for carrying out the contract as made at The monies levied under the Ontario library rate are received by the treasurer and paid out by order of the board. This act provides for the issue of public library debentures by the council, or, on their refusal to do so, the submission to the electors of a by-law for the purpose. If a library remains closed for a period of two years, the corporation is con-

sidered dissolved. A penalty is to be exacted from anyone creating a disturbance in a library. A free reading room, branch libraries and evening classes for artisans, mechanics and workingmen in manual and mechanical arts are provided for by the act. No age rule shall be made to exclude children. The act of 1920 is in three parts: (1) applying to free public libraries, (2) to association libraries, and (3) specifying the powers and privileges of the Minister of Education and providing for the making of regulations.

No age limit.

### **MANITOBA**

Board.

In the province of Manitoba, to establish a free public library and a free news room a vote of three-fifths of the qualified electors is required. When established by a single municipality the library board (provided for in the "Public Libraries Act" of Manitoba, R.S. 1913 c. 161) consists of five members, including the mayor of the town or village or the reeve of a rural municipality, and one councillor, one public school teacher and two resident electors. Where two or more municipalities are together establishing a library, the board shall consist of the mayor or reeve of each municipality and one public school teacher from one of the municipalities and not more than one elector from any one or all of the municipalities uniting, all of the members to be appointed by the 15th of January each year. Fines paid for infraction of library by-laws shall be paid to the treasurer of the municipality in which the library is located. A copy of the estimates is to be supplied annually to the secretary-treasurer of each municipality, and a financial report to each municipal council. By amending acts of 1921 (c. 48) and 1925 (c. 40) provision is made for the appointment by the provincial government of a public library board to assist in establishing free libraries.

### SASKATCHEWAN

Board. Quorum. Meetings

Debenture.

Levy.

Estimates.

Aid. Closed library.

Free. Penalty.

In Saskatchewan a library board consists of the mayor and six residents, the first three appointed for one year and the three additional for two years, all new members being appointed for two years. Three members constitute a quorum and the board meetings are held every three months, as in Alberta. The Act of Saskatchewan (1906 c. 37, R.S. 1909 c. 93) provides for a free library debenture for the purchase of land and erection or improvement of buildings and for the books and requirements necessary upon the organization or incorporation of a library. free library rate is not to exceed one mill on the dollar on the assessed value of all rateable real and personal property. The rate is the same for the three prairie provinces. In Saskatchewan and Alberta, if the total tax so levied does not exceed \$500 it may be paid from the general funds of the municipality. The estimates in both Saskatchewan and Alberta cover (a) the amount of principal and interest required for annual payment of any outstanding debenture (b) expense of maintenance and management of libraries and reading rooms and for purchases.

A provincial grant of \$1 for every dollar spent on books, magazines and news-

papers, the whole not to exceed \$200, is provided for in Saskatchewan. If a library is closed for two years it becomes the property of the council which may decide upon its disposal. All libraries shall be free. A penalty not to exceed \$20 may be exacted from anyone creating a disturbance in a library. A penalty not to exceed \$10 is provided for wilful infraction of a by-law. All fines are to be paid to the municipality for library purposes. In both Saskatchewan and Alberta the janitor may be created a special constable to protect the library and keep order. By an amend-Rural libraries ment of 1913 (c. 48) provision is made for rural libraries which shall receive from the municipal council grants up to \$200 for establishment purposes and \$100 from the village council or \$50 from the board of trustees. The provincial librarian

may supply reading matter to such libraries from the provincial appropriation

for the purpose. The amendment of 1915 (c. 43. s. 17) states that this act is administered by the Department of Education.

### ALBERTA

The Alberta Public Libraries Act (1907 c.17, R.S. 1922 c. 15) provides for a by-law to be voted upon by the electors for establishing a library. If this is defeated no new by-law may be submitted during the municipal year. The library board Board. consists of the mayor or other head official as an ex officio member, and in cities of over 15,000 population 6 additional members; in other muncipalities 4 additional members appointed from among the resident electors, two to hold office until January of the following year and two to hold office until January of the second year. Three of a board of five members or four of a board of seven members make the required Quorum. quorum. Public library debentures may be issued for the purpose of raising funds Debenture. to erect or to improve buildings of stone, concrete, brick or brick veneer. The estimates, as in Saskatchewan, provide for (a) the amount of principal and interest Estimates. required for annual payment of any outstanding debenture, (b) expense in detail of maintenance and management of libraries and reading rooms, and purchases. A grant of \$1 is provided for every dollar spent by the board for the pur-Aid. chase of books, the sum not to exceed \$300 in one year, and \$1 for each dollar spent on magazines and newspapers for the reading room of each library, up to \$50 in one year, provided that the amount be spent for additional books, magazines and newspapers within six months of being received by the board. In any city of 50,000 population, additional grants of the same nature may be paid to a branch library. The by-laws made by the library board must be posted in a conspicuous place before they can be valid. A penalty is provided for anyone creating a disturbance in a Penalty. library. The janitor may be a special constable. No fine may exceed \$20 and costs. The public library assessment rate must not exceed one mill on the dollar. Annual Levy. requirements up to \$500 may be paid from the general municipal funds. A library closed for two years is dissolved, the property being at the disposal of the council. Dissolution. All libraries must be free.

### BRITISH COLUMBIA

The Free Libraries Act of British Columbia (1891 c. 20, R.S. 1897, c. 121 R.S. 1911, c. 140) has been superseded by the Public Libraries Act (1919 c. 48, R.S. 1924, c. 141). This act is in five parts, relating respectively to (1) Public Library Commission (2) travelling libraries (3) public library associations (4) municipal public libraries (5) general provisions. The Public Library Commission consists of Public 3 unpaid members acting for 3 years, the province paying necessary expenses. Library The Commission's duties are to co-operate with library officials, to operate the Commission. system of travelling libraries, to apportion or refuse government appropriations to public libraries, and to submit an annual report to the Provincial Secretary, always, this understood, encouraging and generally supervising public library activities. A paid superintendent and staff are provided for, also what funds are required Staff. for the superintendent's travelling or other expenses, a limit being placed on the annual expenditure. This official must be a qualified librarian and must manage the business of the Commission. Training classes for librarians may be held at any place approved by the Commission with the co-operation of the University of British Columbia. The travelling libraries are mainly for the benefit of unorganized Travelling and sparsely populated sections but may also assist libraries and other organized libraries. groups by loans of special collections of books. A public library association may public be formed by any 10 or more persons 21 years of age, subject to the approval of the library Commission. There is no fee for incorporation. The board of management con-association. sists of 5 members of the association, to be elected within 30 days of the date of Board. incorporation for a term of one year. The board of management shall consist of a chairman, secretary-treasurer, librarian and other necessary officers, with salaries approved by the Commission. This board shall make rules for holding meetings and managing the association; define the duties of the officers; provide accommodation and means of raising funds, including the fixing of an annual membership fee; with the Commission's approval, purchase or erect buildings, purchase reading matter and supplies and make rules for management of the library; keep minutes of all proceedings and submit an annual report. The library estimate in a rural Estimate. school district, levied under the Public School Act (1922 c. 64, R.S. 1924, c. 226) may not exceed  $\frac{3}{4}$  of a mill on the dollar of assessed property. The money is to be paid from the Consolidated Revenue Fund in equal quarterly payments. School premises may be used for distribution of books, the teacher acting as librarian. When the municipal council, at the request of the association passes a by-law for taking over the assets and property of the association, the latter is dissolved, the library becomes a municipal public library and the assets are under the public library board. A by-law for this purpose must previously have been submitted to the electors at an annual municipal election. The act provides schedules for use in forming a public Schedules.

Board.

Quorum.

library association, the petition and the by-law for establishing a municipal public library. The petition in a city municipality of 5,000 population must be signed by 100 or more electors; in a smaller community by 25 or more electors. The public library board consists of 3, 5, or 7 members including the mayor or reeve of the municipality or a member of the municipal council selected by the council, and other citizens of the municipality, also selected by the council, who must be British subjects of at least 6 months' residence in the municipality. The member from the council holds office for one year or until the end of the year, half of the remaining members first appointed for one year, the others, and all new members, for two years. A quorum consists of a majority of the members. The duties of a public library board are: to make rules for the government of the library, to submit to the municipal council an estimate for the year; to control expenditure of all monies levied or donated or bequeathed for library purposes or revenue derived from fines; to appoint a librarian and staff and fix their salaries, to keep accounts and submit them to the municipal auditor; to submit an annual report to the mayor or reeve and council and to the Commission. If the library board is dissolved the municipal council will be vested with the property and assets of the Board, the Commission being entitled to claim for the use of the travelling libraries books equal in value to the aid given. Every library board and board of school trustees setting aside funds for library purposes shall be entitled to a share in the Commission's appropriation, not more than one half the amount raised and spent for books and periodicals or in co-operation with other libraries for book service, provided that not more than 45% is spent for fiction, and the amount does not exceed \$200 in one year. Libraries are free to all residents of the municipality or locality and may, under certain regulations, be available to outside residents. Temporary or permanent exchanges of books may be made with another library or board, and an agreement may be made with another board, municipal council or board of school trustees for loan of books to residents in the locality concerned. All libraries established prior to the passing of the act of 1919, became by that act municipal public libraries.

### YUKON

Mechanics' and literary institute.

Membership.
Evening classes.
Report.

Dawson City.

Meetings. Quorum.

Buildings.

By-laws. Penalty. Accounts. Estimates. Free. In the Yukon Territory a mechanic's and literary institute becomes organized and incorporated upon the submission to the Territorial Secretary of a declaration signed by 30 persons in an incorporated or other city or town, in which is given a detailed statement of the amounts subscribed and the place where it is proposed to establish the institute (C.O.Y.T. 1914 c. 63). This declaration must be accompanied by a sworn certificate signed by one member. The forms for both declaration and certificate are outlined in the ordinance. At the first meeting called the following officers must be elected for a term of one year: president, vice- president, secretary-treasurer, auditor and at least five directors. The annual membership fee is \$1. The act provides for evening classes, a technical or general library and a reading room. The annual report must contain names of members, amounts paid by them, statement of classes organized, list of books purchased and of newspapers and periodicals filed and a statement of the progress and activities of the organization. A detailed financial report must also be made and forwarded to the Territorial Secretary, a signed copy being entered in the journals of the institute. All funds are to be used for the organization, but not more than one-quarter of same may be used for a reading-room.

The Ordinance to provide for the management of free public libraries within the city of Dawson (Y.O. 1903, 20) stipulates that the board of management shall consist of 7 persons: 4 appointed annually by the city council and 3 by the Commissioner of the Yukon, all vacancies occurring to be filled for the balance of the term. One member of the board is to act as chairman, and the meetings are to be held monthly. Four members constitute a quorum. All orders and proceedings of the meetings are to be kept in books which are to be produced for evidence when required. The board must procure or erect buildings for the library, newsroom and museum, when one is to be established; purchase reading matter, maps and other essentials, keep the property in a state of repair and appoint or dismiss officers and servants; make by-laws for the organization; and impose any necessary penalties not to exceed \$10 for any offence. In case of damage the entire value must be recovered. The accounts must be audited by the city auditor and submitted to the Commissioner-in-Council and the city council. The estimates must be submitted by April 1. All libraries and buildings connected with them are free.

The amendment to this ordinance (1907, c. 1) specifies that any person failing to attend three consecutive meetings of the board ceases to be a member.

### SCHOOL LIBRARIES

The earliest Canadian library legislation found is in the statutes of Canada for 1850 (13–14 Vic) c. 48 "An act for the better establishment and maintenance of common schools." Section 12 sub-section 17 provided that the trustees of each school section should appoint a librarian and provide a library. The act also provided for a grant from each municipal council for a county common school library. Local school superintendents were required to make an annual report to the chief superintendent of schools on the number, size and management of school libraries. The chief superintendent was required to promote the establishment and to apportion sums from the legislative grant equal to the amount raised locally for the purpose. The entire appropriation should not exceed £3,000 annually.

### PRINCE EDWARD ISLAND AND NEW BRUNSWICK

The Public School Act of Prince Edward Island (1900, c. 6, s. 86) and the Schools Act of New Brunswick (1922, c. 5, s. 96) provide grants from the Board of Education to any school district raising a fund for establishing or improving a library, equal to one-half the amount raised, up to \$20 in any one year, the grant to be used in the purchase of books.

### NOVA SCOTIA

The Nova Scotia Education Act (1911, c. 2, s. 72c) authorizes ratepayers to

vote funds for books for school libraries.

The "Act for encouragement of rural school libraries" (1903 c. 24) specifies an annual grant to any teacher of \$5 or \$10 from the Provincial Treasury according to the equipment of the school, the value of the library, and the general management of both school and library. This does not apply to schools employing a class "A" (Grade XII) teacher drawing a superior school grant or a teacher drawing an agricultural or manual training grant. Nothing in this act applies to the schools in any incorporated town.

### QUEBEC

In the consolidated statutes of Lower Canada (1860 c. 15) appears an "Act respecting provincial aid for superior education and normal and common schools," section 10 of which provides for aid to parish and township libraries. Under the Public Instruction Act (40 Vic. c. 22 s. 5, R.S. 1888 art. 2236) provision is made for an annual grant up to \$2,000 in money or in books from the Superior Education Fund for the establishment of city, town, village, parish or township libraries in suitable school municipalities. School corporations may make appropriation and issue debentures for establishing libraries which are subject to the regulations of the Committee of Public Instruction.

### ONTARIO

In Ontario as early as 1859 (c. 64, s. 106, ss. 11 and 13, an "Act respecting common schools in Upper Canada") legislation was made for school libraries, for it was specified as among the duties of the Chief Superintendent of Education "to employ all lawful means in his power to procure and promote the establishment of school libraries for general reading (this clause was quoted from the statutes of Canada 1850, c. 48, s. 35, ss. 8), and to submit to the Council of Public Instruction all books or manuscripts which, with the view of obtaining the recommendation.......for their introduction as......library books, are placed in his hands, and to prepare and lay before the council......regulations for the management of school libraries." The Public Libraries Act is administered by the Department of Education (1909, 9 Edw. VII c. 88, s. 4, ss. 1; R.S. 1914, c. 265, s. 4, ss. 1) school libraries, public libraries, travelling libraries and library institutes being all placed under the supervision of the Minister of Education. School libraries were provided for under the Education Act of 1906 (6 Edw. VII, c. 52, s. 25, ss. 1).

### MANITOBA

The Public Schools Act of Manitoba (C.A.M. 1924, c. 165, s. 49c; R.S.M. 1913, c. 165, s. 118c.) stipulates that it shall be the duty of the school board in each city, town or village to establish and maintain school libraries.

### SASKATCHEWAN

By the Saskatchewan School Act (R.S. 1920, c. 110, ss. 17) it is required that a suitable library be provided by the school board of each district.

### ALBERTA

Special grants from the Provincial Treasury for school libraries are prescribed for by the Alberta School Grants Act (R.S.A. 1922, c. 53, s. 4h; amended by 1923 c. 37, s. 2f) a sum not to exceed 15 cents per day for the first year being allowed to each rural school or classroom maintaining a minimum grading on its efficiency in all respects, and for the 5 years following the grant to be paid in proportion for each day the school is kept open. The equivalent of the grant may be supplied in books

### BRITISH COLUMBIA

The Public Schools Act of British Columbia (1922 c. 64, s. 27; R.S. 1924 c. 226, s. 27) provides that where money has been allotted by vote or gift for a school library in any district the Council of Public Instruction may make an equal grant up to \$50 for the purchase of books.

### YUKON

The Yukon school ordinance (C.O.Y.T. 1914, c. 79, s. 54 ss. 13), provides that the school board of every district may supply a library suitable to the purposes of the school and make rules for its management.

### LEGISLATIVE LIBRARIES AND LAW LIBRARIES

### NOVA SCOTIA

Legislative Library.

The Nova Scotia Legislative Library and Library of the Nova Scotia Historical Society were together established by the Act respecting the Legislative Library (R.S. 1884, c. 12, R.S. 1900, c. 27). By this act the management and regulation of the libraries was vested in the Nova Scotia Library Commission, consisting of 9 persons, the Lieutenant-Governor being president. Four members of the Commission were to be appointed annually by the Nova Scotia Historical Society and four by the Governor in Council. The duties of the Commission prescribed by the act were to make suitable by-laws and to submit an annual report.

### NEW BRUNSWICK

In the Consolidated Statutes of New Brunswick (C.S. 1867, c. 34; C.S. 1877 Fredericton.

Law Library at Fredericton, Supported by annual fees paid by the attorneys. This fee was later increased from \$5 to \$10 (1908 c. 18) for attorneys of over five years' standing and again (1921 c. 40) to \$15, while the junior attorneys' fee was increased from \$3 to \$5 and in 1920 to \$10.

### QUEBEC

Advocates' Libraries, Montreal and Library.

Chapter 34 of 49-50 Victoria, section 25, as quoted in the Quebec Revised Statutes (1888 Title 10, c. 1, s. 4) provided for library associations of the bar. The Advocates' Libraries of Montreal and Quebec and the Quebec Library were established much earlier, as these are all incorporated under the statutes of Lower Canada (3 and 4 Vic. c. 48, c. 49, c. 50 respectively). The Library of the Legislature was established under the act quoted in the Revised Statutes of Quebec (1888 Title 2, c. l, s. 5).

### ONTARIO

Legislative Library staff.

Chapter 27 of the Ontario statutes of 1917 (s. 10) states that the librarian and other officers and members of the staff of the Legislative Library may be appointed by the Lieutenant-Governor-in-Council, but the act is not in any way to affect prior appointments made by the Speaker of the Assembly.

### MANITOBA

Provincial Library and Zuseum Act. The Provincial Library Act of Manitoba (48 Vic. c. 7; R.S.M. 1891, c. 86) was repealed at the passing of the Provincial Library and Museum Act of 1919 (9 Geo. V, c. 51) which provides for a Department of the Library and Museum under the president of the executive council, and managed by a board of trustees consisting of the president, the provincial secretary and the speaker of the Legislative Assembly, assisted by the library committee of the Assembly. The librarian shall rank as deputy head and shall be assisted by officers whose salaries shall be fixed by the

Lieutenant-Governor-in-Council, and paid from the Provincial Treasury. library is to receive a copy of every book, newspaper, pamphlet or other publication printed or issued in Manitoba, a penalty being exacted for failure to observe this statute. All property housed in this library belongs to the King.

An early act (38 Vic. c. 17) quoted in the Consolidated Statutes of 1888 (c. 28)

provided for the erection of a building in Winnipeg and the establishment of a law Law Library. library, funds to be raised by a levy of fees and the issue of 20-year bonds to an amount not to exceed \$40,000. This was the "Act respecting accommodation for the court of Queens' bench and a library."

### BRITISH COLUMBIA

By the Legislative Library and Bureau of Statistics Act of British Columbia Legislative (1894 c. 27; R.S. 1897 c. 119; R.S. 1911 c. 138; R.S. 1924 c. 138) provision is made Library at the Bureau of for the suitable housing of and adequate staff to care for the books, papers and other Statistics Act. property in the Legislative Library, belonging to the King. This act provides for loan to the public of such books as are not required by the Legislative Assembly, through the Public Library Commission (amendment of 1920, c. 47) any officer of the library staff being expected to act, when required, as secretary. The librarian and staff are to hold office "during pleasure" and to be paid from the provincial treasury funds so appropriated. During the session additional clerks and messengers may be appointed by the speaker of the Assembly. The librarian is required to make a report to the speaker early in each session of the Legislature together with any recommendations for improvement of the library, and shall be prepared to compile or procure any historical or other information which may be required by the Lieutenant-Governor-in-Council or a minister of the crown. He shall also be secretary of the Provincial Bureau of Statistics and shall, as instructed by the Provincial Secretary, collect and publish statistical information relating to the activities and resources of the province and to make an annual report to the Provincial Secretary, including a summary of whatever facts may be required.

OTTAWA F. A. ACLAND PRINTER TO THE KING'S MOST EXCELLENT MAJESTY 1928

### **PREFACE**

The statistical data in this issue of the Annual Survey of Education in Canada show for still another year an increase in the factors most symptomatic of progress in school matters, viz., general enrolment, average attendance, high school grade enrolment and grade distribution at each age; also in the qualifications of teachers. On the other hand expenditure on general schools, especially government expenditure, shows on the whole either a standstill condition or an actual decrease. From Section 11 of this report it would seem that this decrease is not necessarily in capital expenditure.

The report contains certain new features which should be of special interest. Section 9 on Teachers contains a number of census tables which show among other matters the age distribution of teachers throughout the Dominion and the earnings at different age groups in the principal cities of Canada. Section 12 on Higher Education has been altered to render data as far as possible comparable with similar data throughout the British Empire, also to meet as far as possible the different points of view from which information on higher education is approached. The section on Secondary Education has also been enlarged and improved. Appendix II on Child Labour Legislation has, through the cooperation of the Department of Labour, been made so complete that it is believed the information contained therein is of value not only to the general reader but also to the student who wishes to investigate the influence of child labour legislation

upon attendance and progress at school.

The report proper is in two parts, with introductory notes by way of a glossary of terms and a summary of certain regulations in different provinces. Part I consists of a review of educational activities during the year in each province, together with a summary of activities for the whole Dominion and of higher institutions, private schools and national movements. To this are appended summaries of educational legislation during the year and of existing regulations governing child welfare. Part II consists of statistical tables, these being arranged in fourteen sections. The first four sections show activities in regular publicly controlled schools; the fifth section deals with secondary education; sections six to eight cover special educational organizations, including consolidation, special classes and institutions, school hygiene and technical education; sections nine and ten give the statistics relating to teachers; section eleven deals with the cost of school support; sections twelve, thirteen and fourteen are devoted to higher education, private schools and Indian schools, respectively. Part III of the report contains the statistics of Canadian libraries, with an appendix on library legislation.

The report has been prepared under the direction of Mr. M. C. MacLean, M.A., F.S.S., Chief of the Educational Statistics Branch of the Bureau, the part on Canadian libraries being contributed by Miss Grace S. Lewis, the librarian of the Bureau. The Branch, it will be recalled, was established in 1919, its operations being defined and outlined at a conference of the Bureau and representatives of the Provincial Departments of Education. Under the arrangements since worked out, the records of publicly controlled education in the several provinces have been reduced to a large degree of comparability and homogeneity, the Bureau now making certain compilations for several of the provinces and conferring with each province as to the data herein presented. The thanks of the Bureau are hereby tendered for the cordial co-operation of the provinces in this connection. The sections of the report on private schools, business colleges, higher education, and miscellaneous educational activities not under provincial control, also the report on the cognate subject of libraries, are prepared in the Bureau independently.

> R. H. COATS, Dominion Statistician.

Tabular Statement of library development in the provinces and Territories of Canada as shown by legislation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 194<br>195           |
|                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                      |

# INTRODUCTORY NOTES—DEFINITION OF TERMS AND SUMMARY OF EDUCATIONAL REGULATIONS

#### **Definition of Terms**

- County Academy or Academy.—In Nova Scotia, a high school free to all qualified pupils in the county where situated—for which a special annual ("Academic") grant is payable. In other provinces, academy generally means a private institution such as a boys' or girls' college, etc.
- Affiliated College.—An institution doing work of university grade, and in the case of the professional colleges, work leading to a professional degree; the degrees of an affiliated college are conferred by the university to which it is affiliated. In most Canadian affiliated colleges (not professional colleges), work below university grade is also done; that is, the college often carries on the preparation of pupils from the high school entrance year through the high school grades and matriculation work up to the completion of undergraduate work and a degree in Arts or in some other faculty. Commercial work also is sometimes done in these colleges.
- Annexed College.—In Quebec, a college is said to be annexed when the university merely approves the curriculum and by-laws, is represented at the examinations, and sanctions the diplomas awarded by these colleges.
- Associated College.—In Quebec an associated college is an affiliated college situated outside the province.

  Assisted Schools.—In British Columbia, a school of which the teachers' salary is paid entirely by the Government.
- Business College.—In Canada the term is generally applied to a private institution teaching any or all forms of commercial work with the literary preparation for that work. These institutions generally confer their own diplomas, while also preparing students for public examinations such as those for the Civil Service, and chartered accountants.
- City School Superintendent.—An experienced teacher appointed by the school board of a city to take charge of all schools under that board and to act as an expert adviser to the board; he bears the same relation to all the schools that the principal bears to one school.
- Classroom.—In New Brunswick, a small room attached to the school room to which pupils are withdrawn from time to time to be drilled by the class room assistant; in other provinces, a school room in which the classes are taught.
- Classical College.—In Quebec this is classed as a secondary institution whose course leads to the degree of B.A. and corresponds fairly closely to the affiliated colleges already described. It is not under the control of the Department of Education.
- Collegiate Department.—In Manitoba, a school in a town which has three teachers teaching high school work only, in contradistinction to "high school," which has only two such teachers. This "Department" is housed in the same building and under the same principal as the elementary classes. The latter fact distinguishes it from Collegiate Institutes, where only high school and technical classes are housed.
- Collegiate Institute.—In Ontario, Manitoba and Saskatchewan, a pure high school (sometimes technical school) which has attained to a certain standard in equipment and staff; in other provinces, a "rollege"
- Commissioners, Board of.—In Quebec, where the school legislative unit is the municipality instead of the district or section, the regular school board is called the Board of Commissioners, while the dissentient board (in other provinces called the "Separate School Board") whether Roman Catholic or Protestant is called the board of trustees.
- Commissioners, District.—The Educational unit which is called "school district" in all other provinces except Quebec and Ontario is in Nova Scotia called a school section. All these sections are included in 33 "districts" under district commissioners, whose powers now are mainly confined to altering the boundaries of school sections. The inspector is ex officio the secretary of the district commissioners.
- Commissioners, School,—In Nova Scotia, the name given to members of school boards in incorporated towns.
- Consolidation.—An amalgamation of two or more rural schools or of rural schools with village or town schools, either for the purpose of uniting to strengthen the means of school support, where the original schools were small or poor, or for the purpose of providing a graded school and other advantages such as conveyance, instead of the original one-room school. In some cases (as in Saskatchewan) it need not be an amalgamation. The original district may be a "large district" with a graded school and provisions for conveyance, etc.
- Day Schools, Publicly Controlled Ordinary or General.—A term used in this report (the word "general" school is used in Nova Scotia reports) to define all day schools doing the work of the ordinary school grades (kindergarten and grades I to XII) and under the control of the Department of Education in contradistinction to publicly controlled technical, special and night schools, on the one hand, and private schools on the other; it includes all the publicly controlled primary schools in Quebec and "public," "separate" and "secondary" schools in Ontario, Saskatchewan and other provinces where the terms are used.

- Department of Education.—The term is used in all provinces to define the chief permanent central body in charge of public education; in Quebec the department is not under the direction of the Provincial Government, but linked with it through the Provincial Secretary; in the other provinces it is directly under the provincial government.
- District School.—In all provinces except Nova Scotia, Quebec and Ontario, the smallest legislative school unit locally governed by a board of school trustees (called "section" in Nova Scotia and Ontario); in Nova Scotia, see District Commissioners above; in Ontario it refers to a high school district; in Quebec it is a subdivision of the school municipality.
- District, municipal.—See Commissioners, district.
- District, minor.—Formerly used in Prince Edward Island to define a school district of which the school enrolment and average attendance fell short of the minimum requirements.
- District poor.—In New Brunswick, a school needing a special government and county fund grants for its support.
- Division, Inspectorial.—In Nova Scotia, used for "inspectorate."
- Division, school.—In British Columbia, a department or classroom in a school.
- Elementary grades.—In Quebec, the first six years''' in the case of Roman Catholic, and seven "years" in the case of Protestant, primary schools; in all other provinces, the grades up to and including Grade VIII, except in the case of Junior High Schools, where Grades VII and VIII are considered Junior High School grades.
- Elementary School.—A school equipped and staffed to teach the work of elementary grades.
- First Class School.—Formerly in Prince Edward Island, a graded school equipped and staffed to teach high school as well as elementary school grades, and maintaining a certain standard of efficiency.
- General School.—See Day Schools, etc.
- Grade, School.—The subdivisions of the work of ordinary day schools. The elementary "grades" being in most provinces Grades I to VIII and the secondary, Grades IX to XII.
- Graded School.—A school with more than one class room or teacher.
- Grammar School.—The High School which is free to all qualified pupils in the county is in New Brunswick called a Grammar School.
- High School.—Generally a school with at least one teacher devoting most of his or her time to work above Grade VIII; a "pure" high school is an institution where no other work is done below Grade IX (or Grade VIII with high school subjects such as Algebra and Latin). From the point of view of organization and administration, not of function, "high school" has not the same significance in every province. See under "secondary education" in the reviews of each province. In Saskatchewan, a school organized for Secondary Education only, by a district coinciding with the municipal limits of a town or city.
- Independent School.—In Quebec, a school not directly under the control of the Department of Education.

  The primary Independent Schools like the publicly controlled schools are classified as primary elementary and primary complementary.
- Inspector.—In all provinces except Quebec and Ontario, an officer appointed by the Provincial Government to inspect schools in a defined area; in Ontario the county or city inspectors are appointed from among persons holding inspectors' certificates; the county inspectors are paid one-third of their salary by the council, the other two-thirds by the Government; the cities and towns separate from the county receive a grant of six dollars per teacher for Inspection purposes. The inspectors in unorganized areas, also the separate school, secondary school, and chief inspectors, are appointed and paid by the province; in Quebec, inspectors are appointed and paid by the Department of Public Instruction.
- Intermediate School.—In Manitoba, a graded school with one teacher employed for high school work; in Quebec, Protestant schools in which the first nine grades are taught.
- Kindergarten Primary.—In Ontario, a school or room, combining the work of the kindergarten and Grade I.
- Official Trustee.—A trustee specially appointed to deal with unusual problems in a school district or section or to take the place of the regular board where the latter refuses or fails to carry out the provisions of the Education Act.
- Primary School.—In Quebec, the name given to the ordinary day schools under the Department of Public Instruction (also to certain independent schools); it is used in contradistinction to Catholic secondary schools, special schools and superior schools (schools of university grade) but the secondary schools mentioned have not the same significance here as in other provinces since they usually teach a full course in Arts in addition to the high school work preparatory to this course, but do not provide non-professional high school training for teachers for primary schools, which training is given either in the primary schools themselves or in the Normal Schools. Primary schools therefore, correspond in many respects to the elementary and high schools of other provinces. In Prince Edward Island primary school means a one-room school.
- Primary Complementary.—In Quebec, a general two-year course, directed toward commerce, agriculture, industry, or (for girls) domestic economy. They are also called primary vocational schools.

- Public Schools.—In Ontario, Saskatchewan and Alberta, elementary publicly controlled schools, as distinguished from elementary denominational schools.
- Rural Municipal Schools.—In British Columbia, each municipality (rural and urban) is a school district and the schools in every municipality are under the control of one Board of Trustees.
- Secondary Grades.—School grades in advance of grade VIII, usually grades IX to XII.
- Secondary Schools.—In most provinces, schools organized to teach work of secondary grades (IX to XII); in Quebec Roman Catholic education, the term is confined to such institutions as the Classical colleges and non-subsidized independent classical schools. Their work may extend to include a full course in Arts, the degree being conferred by the university to which they are affiliated.
- Section School.—A term used in Nova Scotia and Ontario to indicate the unit corporation for school self-government.
- Section, Poor.—A term used in Nova Scotia to indicate that the "School Section" requires some extra aid from Government or Municipality in order to support the school.
- Separate Schools.—In Ontario, denominational or coloured dissentient schools under public control; in Saskatchewan and Alberta, denominational minority schools under public control; the term is used in the three provinces in contradistinction to "public" school already established within the boundaries; in Quebec, they are called trustee schools as distinguished from commissioner or majority schools, the latter being either Roman Catholic or Protestant according as either forms the majority in the community. "Denominational" distinction is recognized only as between Protestants and Roman Catholic in each of the four provinces mentioned.
- School.—In Nova Scotia, New Brunswick and Saskatchewan, a school room in charge of a teacher; in other provinces the whole school institution (house and grounds).
- Special Schools.—Schools under university grade other than the general schools, such as night schools, technical schools, schools for the blind, etc.
- Superior Schools.—In Quebec the Protestant intermediate and high schools are classified as superior; also the Roman Catholic upper elementary and the primary complementary or vocational schools; in New Brunswick, a school equipped and staffed to teach high school work and free to all children in grade VII and upwards in the parish or parishes in which the school is located; in British Columbia, a school equipped and staffed to teach the upper elementary and two high school grades.
- Technical School.—A school equipped and staffed to teach vocational work, or prevocational work such as manual training.

#### Ages of Free Admission into Schools

- (1) Prince Edward Island.—Resident children from the 6th to the 16th year of their age; older children if there is accommodation.
- (2)  $Nova\ Scotia.$ —Trustees must provide accommodation for all residents over 5 years of age who wish to attend.
- (3) New Brunswick.—Trustees must provide accommodation for residents between 6 and 20; others may attend if there is accommodation.
- (4) Quebec.—Usually 7 to 16 in primary schools. A fee is charged in all cases except where abolished by the municipality and children 7 to 14 have to pay this fee whether they attend school or not, but no child from 7 to 14 years of age shall be excluded from school for non-payment of monthly fees.
- (5) Ontario.—The public schools are free to all residents (except separate school supporters) between the ages of 5 and 21; the separate schools are free to separate school supporters.
- (6) Manitoba.—Accommodation must be provided for all residents between the ages of 5 and 21 in rural communities, and 6 and 21 in urban.
- (7) Saskatchewan.—In rural and village districts, between 5 and 21; in towns and cities, between 6 and 21. In order to equalize educational costs in Saskatchewan boards of trustees are allowed to charge certain fees when the residents are not taxpayers of the district, and in certain other cases where it is considered that the revenue derived does not provide for the service rendered.
  - (8) Alberta.—Children are admitted to Alberta schools as soon as they have attained the age of six.
- (9) British Columbia.—Accommodation must be provided between the ages of 6 and 16 years. In the discretion of School Boards children may be admitted who are under 6 years or over 16 years.

#### Ages of Compulsory Attendance

- (1) Prince Edward Island.—Ages 7 to 13, inclusive; monthly attendance must be sixty per cent of the days schools are in operation.
- (2) Nova Scotia.—Children of ages from 7 to 14 in rural schools; and 6 to 16 in towns and cities. Within the age limits, children in town and country schools must attend regularly; must be reported for discipline when 5 days absent; and parents and guardians in addition to fines may have 2 cents a day added to their taxes for each absence to compensate the section for the loss of the "attendance" portion of the Municipal school fund.
- (3) New Brunswick.—In districts other than cities and towns under section 105 of the Schools Acts; (on resolution of trustees, but the question must be brought up at every annual meeting until adopted).— age 7 to 12 for a period of 80 days; in cities and incorporated towns under same section, in which the compulsory act has been adopted by city or town council, ages 6 to 16 or grade VII standing if over 12 years old, period 120 days; in St. John, Fredericton, Chatham and Newcastle, 6 to 14. Employment of children under 16 may be forbidden by the school board.

(4) Quebec.—No statutory laws for compulsory attendance.

(a) Children 8 to 14 must attend full time; children from 5 to 8, if enrolled must attend full time to

the end of the school term for which they are enrolled.

(b) Adolescents 14 to 16 who have not attained a university matriculation standing must attend full time; those exempted on the pleas of circumstances compelling them to go to work must attend part time for 400 hours a year in municipalities where part-time courses are provided. This provision came into force in September, 1921. In September, 1922, urban municipalities with a population of 5,000 and over were required to provide part-time courses.

(c) Adolescents 16 to 18 who did not attend full time to sixteen and have not attained a university matriculation standing must attend 320 hours a year. This provision was to come into effect in September,

1925, but the date was postponed.

Manitoba.—Children of ages 7 to 14 must attend full time. Any pupil over 14 if enrolled must attend regularly. A child over 12 may be exempted for employment, but only six weeks in the term. Employment under 14 (except as mentioned) is forbidden. Children of ages 14 to 16 must attend school regularly if not engaged in some regular occupation.

Saskatchewan.—Áll children 7 to 15 who have not passed grade VIII standing subject to certain conditions as to distance from school, etc., must attend full time. Employment of unexempted children under 15 forbidden. Deaf mutes between the ages of 8 and 15 must attend an institution seven months in each vear.

Alberta.—All children 7 to 15 must attend full time.

British Columbia.—Children of ages from 7 to 15 must attend full time during the school year.

#### School Year and Vacations

Prince Edward Island.—July 1 to June 30; for financial purposes in Charlottetown and Summerside, calendar year. In Charlottetown and Summerside there are vacations of nine weeks in summer and one week in December; elsewhere there is a summer vacation of six weeks beginning July, a fall vacation of two weeks in October, and a winter vacation of one week in December; or, at the option of the District, there may be three weeks in May, three weeks in October, and one week in either July or December, but schools of two or more departments may have a summer vacation of eight weeks and one week in December.

Nova Scotia.—August 1 to July 31. There is a summer vacation of about eight weeks in July and August (but, with the consent of the inspector, trustees may fix these for January and February) and two weeks beginning Saturday before Christmas, also Thursday, Friday and Monday of Easter Season, and all statutory holidays.

New Brunswick.—July 1 to June 30, with a summer vacation of 8 weeks commencing July 1, and a winter vacation of two weeks commencing on the Saturday before Christmas.

Quebec.—July 1 to June 30. The Roman Catholic Committee regulations require schools closed each year, from the 1st of July to the first Monday in September; the Protestant Committee regulations from the 1st July to the 15th August, but in practice schools may open in September.

Ontario.—In public and separate schools the school year consists of two terms: September 1 to December 22, and January 3 to June 29; in secondary schools the school year is the same except that schools open on the first Tuesday in September. In addition to the interval between these terms there is a vacation of one week following Easter. Statistics of the public and separate schools which are shown in this report, however, are for the two terms which make up the calendar year; while those for secondary schools, normal schools, technical schools, etc., are given for the year beginning in September.

Manitoba.—July 1 to June 30 with the following vacations:-

(a) Easter—the full week beginning with Easter Sunday

(b) Midsummer—from the first day of July to the third Monday in August, both days inclusive, or by a special resolution of the board, to the first day of September.

(c) Christmas, from the twenty-fourth day of December to the second day of January, both days inclusive.

Saskatchewan.—For finances, calendar year; for statistics, July 1 to June 30. (Up to 1920, however, statistics have been given for the calendar year).

The vacations are as follows:-

In rural and village districts at least seven weeks in the year, of which one to six weeks must be in summer. The board may declare Easter week a holiday. The summer vacation comes between July 1 and October 1, and the winter between December 23 and February 15. In towns and cities at least eight weeks commencing July 2, and Christmas week and Easter week. The board of any district in which the school is to be kept open during the whole year may allow additional holidays not exceeding two weeks.

Alberta.—For finances, calendar year; for statistics, academic year, that is, from July 1 to June 30. (Up to the year 1920, however, statistics have been given for the calendar year.)

The vacations are: in rural districts, seven to ten weeks; summer between July 1 and September 1;

winter, December 24 to January 2. In towns and cities, eight to twelve weeks.

British Columbia.—July 1 to June 30. The vacations are: summer, last Friday in June up to the Tuesday immediately following Labour Day; winter, two weeks preceding first Monday in January; Easter, four days following Easter Monday.

## PART 1.—REVIEW OF EDUCATIONAL ACTIVITIES IN CANADA DURING THE YEAR 1926

#### CHAPTER I.—SUMMARY FOR DOMINION

SCHOOL ACCOMMODATION AND PERSONNEL

The number enrolled in all educational institutions in Canada in 1926 or the latest year reported was 2,272,415. This number was distributed among the various educational institutions as follows:

Publicly controlled kindergarten; elementary and non-technical secondary schools, 1,998,579; private kindergarten, elementary and secondary schools (exclusive of such schools as are affiliated with universities or colleges and which are included under preparatory, university, or college courses), 70,959; Indian schools, 14,782; schools for the deaf and blind, 1,627; technical and night schools and courses under college grade, 96,655; schools for teacher-training, including vocational teacher-training and departmental summer schools, but not teachers' courses at universities and colleges, 9,720; private business colleges reporting, exclusive of correspondence schools, 17,818; preparatory courses at universities and colleges, 3,593; vacation courses in universities and colleges, 26,165; classical colleges in Quebec (including non-subsidized classical schools), 9,904; regular courses in colleges other than classical, 6,301; and regular courses in universities, 21,327. By regular courses are not necessarily meant degree courses of university standard. Students in the latter courses are to be found in vacation courses in the classical colleges as well as in the regular courses of other colleges and the universities. Their total number is estimated at 31,000.

The total of 2,272,415 in all educational institutions exclude 2,971 in business colleges, and 1,598 in Indian schools, who may be elsewhere included under the above items; it includes all the provinces and the Indians in the Yukon and Northwest Territories. A certain percentage should be deducted from the total on the score of pupils being counted more than once in changing from one school to another within the year. There is evidence from the Dominion decennial censuses and the quinquennial censuses of the prairie provinces, including that of 1926, that this percentage is considerable even after allowances are made for adult and evening pupils who are not enumerated in the census. There is no evidence that the duplication is diminishing as other

conditions improve.

#### PROGRESS DURING THE YEAR

Judging from the size of the percentage of enrolment in daily average attendance a new record in regularity of attendance was made during the year. The different provinces are fast approaching equality in this respect, and the increase from 68 in 1920 to 75 in 1926 has been steady; the rise in the general percentage being especially influenced by rapid improvement in the newest and most rural provinces. In another respect also the provinces are approaching uniformity, viz., in the percentage of the total enrolment in high school grade. A few years ago we found this percentage varying from 4 or 5 in some provinces to 9 or 10 in others; in 1926 we found that in nearly all the provinces this index had passed 9 per cent. If allowance is made for the differences in age distribution in the different provinces a still greater degree of uniformity is seen to have been reached. If the age-grade tables are compared year by year since 1921 a fairly steady lowering of the age of the first year of high school is noticeable. The correlation between this process of lowering the high school entrance age and the increase in the percentage of attendance is too marked and too logical to be credited to coincidence. Accompanying these phenomena is another, the importance of which is far reaching, viz., the decrease in the proportions of high school pupils taking such subjects as mathematics. The explanation that this is due to the increase in options is no explanation at all. It is suspected that what is given as a cause in this explanation is partly at least an effect. The same may be said of another possible explanation, viz., that mathematical subjects recently have had a tendency to be postponed until the later years of high school with the diminished attendance of these years while in former years they were taken in the first two years in which the enrolment is much larger than in the later years. A comparison of the percentages in certain subjects of the total sampled in five provinces since 1921 may be seen as follows:-

| Subject                                                          | P.             | P.c. of the total in each subject |                            |                            |                            |  |
|------------------------------------------------------------------|----------------|-----------------------------------|----------------------------|----------------------------|----------------------------|--|
| Panlect                                                          | 1921           | 1922                              | 1924                       | 1925                       | 1926                       |  |
| Arithmetic Algebra. Geometry. Chemistry. Latin. Manual Training. | 56<br>35<br>64 | 50<br>84<br>60<br>24<br>61        | 47<br>63<br>56<br>23<br>57 | 46<br>70<br>54<br>23<br>55 | 47<br>66<br>51<br>23<br>54 |  |

min, chemistry and manual training had not been included in the above it might have If latested that the decrease in the percentages was due to aversion to mathematical sub-If lattered that the decrease in the percentages was due to aversion to mathematical subjects or to a prepase. There is no evidence, therefore, that certain subjects are avoided to have shown decreases. There is no evidence, therefore, that certain subjects are avoided to have shown decreases with a practical bearing or that the scientific subjects are avoided to make room for subject literary. The reason seems to be more far reaching than this and the correlation of the growth of the such a tendency with the growth in the high school enrolment and the decrease in the ages of high school pupils may not be accidental.

While enrolment in vocate or it is remarkable that decreased, two or three provinces have shown decreases. However, while decreases have vocational schools have shown increases in all provinces except two.

provinces except two.

With the exception of one or two provinces and certain classes of certificates the teachers' salaries were lower in 1926 than in 1925. At the same time with certain exceptions the proportions of teachers with the higher classes of certificates were larger than in the previous year. In this respect, however, conditions may be said to have been stationary, on the whole, one province

actually showing a slight decrease in the proportion of high class teachers.

The total expenditure in education was roughly the same as in the previous years. expenditure by provincial governments showed decreases in six provinces and a general decrease while the expenditures by rate payers showed decreases in four provinces, but a general increase. A slight rise or fall in the expenditure by ratepayers has little or no significance, however, since such items as promissory notes are included; furthermore it is difficult to assign any increase or decrease in expenditure to any one calendar year.

#### EDUCATIONAL STATUS OF PUPILS

Tables of grade according to age have now been compiled for a sufficiently long time to warrant an examination of them for indications of trend. A comparison between the tables of 1926 and those of 1921 leaves little room for doubt on certain points. Since space does not allow for a detailed analysis of these points a brief summary will now be given. For evidence the tables

are available for examination at leisure. (See sections 2 and 3).

1. A marked tendency is manifest to raise the status of what may provisionally be called the "average age" pupil; a slighter tendency to raise that of the under average while the movement in the case of the over average seems to be retrogressive. The criterion for this classification of pupils (as "average," etc.) is not necessarily mental ability; it may include the influence of opportunity, health, supervision, training and many other factors. "Average," in other words, is in this sense a resultant and not a causal quality. There is little doubt that the gathering up of pupils by the schools as a result of compulsory attendance laws is largely responsible for this reason of the average. It would seem that the stage has been reached at which the average. raising of the average. It would seem that the stage has been reached at which the average pupil's grade at a given age is as high as may be expected when judged by certain standard scales of ability. There is no evidence of retardation beyond what might be expected from such factors as a late age on entering school. However, what has been said does not seem to apply to

the extremes, especially the more advanced extreme of pupils at a given age. Perhaps the most direct and conclusive evidence of what has been going on in the last five or six years is furnished by the census of the prairie provinces in 1926. Illiteracy among the Canadian born in these provinces is now almost at a vanishing point; among the British born it may be said to have vanished; while among the United States born it is about the same as among the Canadian born. When it is remembered that two of these provinces have been in existence only since 1905 and that considerably more than half the Canadian born are children of immigrants, a mild idea of the magnitude of the feat accomplished by the schools will be formed. The opposite of "illiteracy" may mean little more than the mere fact of having put in an appearance at some school, but even this is highly significant when it is looked at from the point of view of progress since earlier years—indeed it might conceivably mean more than the fact that the "literate" person could actually read, since it implies a rise in status from many points of view including not only the progress made at school beyond learning to read but also the elimination of the factors which formerly kept children out of schools.

Adult Education in Canada.—The following table contains an estimate of the number of persons enrolled in educational institutions who are either over 16 years of age or have discontinued ordinary school attendance.

| Over 16 years in publicly controlled schools (including independent primary schools in Quebec and private schools in Alberta and full time day vocational pupils in Ontario)     Over 16 years in classical colleges and independent classical schools in Quebec | 110,353<br>4,775 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| 3 Over 16 years in private schools in other provinces                                                                                                                                                                                                            | 2,709            |
| 4. Over 16 years in preparatory courses in universities (estimated)                                                                                                                                                                                              | 3,500            |
| 5 Business colleges (private)                                                                                                                                                                                                                                    | 17,818           |
| 5. Business colleges (private)                                                                                                                                                                                                                                   | 64,481           |
| 7. Over 16 years day part-time pupils in Ontario and full- and part-time vocational pupils in other provinces (estimated).  8. Regular, extension, short and correspondence courses in universities and colleges                                                 | 7,900            |
| 8 Regular, extension, short and correspondence courses in universities and colleges                                                                                                                                                                              | 53,000           |
| 9. Teacher training institutions.                                                                                                                                                                                                                                | 9,720            |
| 10. Frontier college (approximate)                                                                                                                                                                                                                               | 5,000            |
| 11. Correspondence schools (approximate)                                                                                                                                                                                                                         | 5,000            |
| Grand total—estimated as over 16 years or as having discontinued ordinary school attendance                                                                                                                                                                      | 297,082          |

#### TEACHERS

In vaw of the appearance of the 1921 Canadian census of occupation, it was redecided to make the setion on teachers the special feature of this report. Section 9, ther 'efore, contains several census ables as well as the usual provincial tables. It also contains once table compiled from provincial somes and given solely for the purpose of illustrating the charks that should be used when averaging techers' salaries. It is clear that in comparing the sal arises of teachers one year with another the bar figures are very misleading. Salaries increased with experience and qualification. If it is desire to know how salaries compare with a pre vious year it is necessary to take these two factors into nsideration. Both the qualifications and the experience of teachers have been advancing rapid; if then the salaries of 10026 are lower than, say 1921, it is clear that the diminution is not expressed fullarly the difference in the average amounts. If the two years showed the same amounts this might mean a real decrease since the factors which made for higher salaries have progressed. Again in comparing the salary of one class of teachers with another it is clear that experience should be taken into consideration. Thus a first class teacher might show no higher salary than a second class, and a university graduate might show no higher than a first class, but this might not mean that the salaries of the higher classes were not really higher. It so happens that on the average second class teachers have longer experience than first and first than university graduates, for the reason that either the demand for these higher certificates or the practice of persons with high academic qualifications going into public school teaching is of recent origin and has been growing rapidly. If the number of university graduates in ordinary schools increased in a given year the probabilities are that the increase would cause a decrease in the average experience of these graduates; similarly it might cause a decrease in the average salaries of these graduates although the salary of the inexperienced graduate might be higher than that of the inexperienced teacher with lower qualifications. Table 110 shows the salaries according to years of experience of females with Grade XI academic standing. These may hold either second or third class according to their normal training and experience, but their general educational qualifications are definitely known and correspond to university matriculation. It is noticeable from this table that salary increases with experience rather definitely until twenty-three years of experience has been attained and there is no evidence of definite diminution with longer experience; also that the salary is more than doubled by experience; also that the mean salary is reached after six years of experience. Table 109 shows for the 15 principal cities of Canada that the weekly earnings of male teachers increase until the age-group 50-64 years is passed and that the weekly earnings of those over 65 are only slightly less than the average and are much higher than those of the age-group 20 to 24. It would seem that the average or mean earnings are reached somewhere around the age of 35. In the case of females the maximum earnings are also at the age-group 50 to 64. The average earnings seem to be reached somewhere around the age of 30. This is in cities where the experience of teachers is longer than elsewhere. It is clear, then, that for both sexes there is a very definite increase in the earning powers of teacher with increase in experience. On the other hand if we take other professions and public administration there is evidence from table 109 in the case of females that the average salary is reached at an earlier age than that mentioned for teachers. For females in public administration and also all professions and public administration the maximum earnings are reached at the age group of 25 to 49 or much earlier than in the case of teachers, so that teachers require longer experience to reach their maximum earnings. Other things being equal, this should mean that females are not considered as past their best until a later age in the teaching profession than in public administration. In the 15 cities the numbers of females in teaching and in public administration are roughly the same so that it is an even chance whether a girl will enter upon the career of teaching or public administration in these cities, either because the two are equally attractive or that approximately the same number of positions is open in both callings. The average earnings in the teaching profession, however, are considerably higher.

If we now take the comparative number of females in teaching and in public administration

in different age-groups we shall have an idea as to how the two callings compare in the matter of

|           | Number                             | of persons                                | P.c. o                            | f total                            | Weekly earnings                                      |                                                      |  |
|-----------|------------------------------------|-------------------------------------------|-----------------------------------|------------------------------------|------------------------------------------------------|------------------------------------------------------|--|
| Age group | Teaching                           | Public<br>adminis-<br>tration             | Teaching                          | Public<br>adminis-<br>tration      | Teaching                                             | Public<br>adminis-<br>tration                        |  |
| Under 15  | 369<br>2,207<br>5,084<br>541<br>37 | 2<br>1,003<br>2,583<br>3,842<br>359<br>45 | 4.5<br>26.8<br>61.7<br>6.8<br>0.4 | 12·9<br>33·0<br>49·0<br>4·7<br>0·6 | \$ cts.<br>15 64<br>18 89<br>23 09<br>24 62<br>14 82 | \$ cts.<br>14 67<br>17 43<br>19 35<br>18 42<br>17 36 |  |

It is clear that in these cities the female teachers enter their calling at a later age and remain in it longer than females in public administration. The difference is quite considerable. Notice, however, that the solitary instance in which public administration shows indications of greater age, viz., the per cent over the age of 65, also shows higher weekly earnings than teaching. It

seems clear, then, that age in the calling is closely connected with earnings

The above is true of cities where the teaching profession has been stabilized and where salaries are reasonably high. It indicates that this stabilization goes hand in hand with remuneration. If we now turn to Table 107 we see how female teachers compare in age in these cities and in the rest of the provinces in which they are situated. We notice that only 28.8 p.c. are below the age of 25 years as compared with 55.3 p.c. in the provinces, while 34.3 p.c. are over the age of 35 years as compared with 17.5 p.c. in the provinces; i.e., half and double the percentages respectively. Another point in this table is also interesting, viz., that the number of female teachers per 1,000 single females over 15 years of age is only 38.3 in the cities, and 65.0 in the rest of the country. Public administration, for example, in the cities is open to females and we have seen that they enter it and teaching in approximately equal numbers. Fewer other callings are open to females in other parts of the provinces. The result of competition between occupations is very clear in this case.

Turning now to the case of male teachers we see first that in the cities they compare with

public administration in age and earnings as follows:-

|                                                    | Nun                              | nber                                       | Per                                                                                                                   | cent                              | Weekly earnings |                                          |                     |                                                   |
|----------------------------------------------------|----------------------------------|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|-----------------------------------|-----------------|------------------------------------------|---------------------|---------------------------------------------------|
| Age groups                                         | Teaching                         | Public<br>adminis-<br>tration              | Teaching                                                                                                              | Public<br>adminis-<br>tration     | Teac            | hing                                     | Pub<br>admi<br>trat | inis-                                             |

| Total                                              | 2,727                            | 41,703                                     | 100                                                                                                                   | 100                               | 3               | 34 49                                    |                     | 28 19                                             |

In the first place we notice much larger numbers in public administration—fifteen times as many. In the second place there is not nearly the correlation between age and earnings in the case of men as in the case of women. True the earnings of teachers advance with age faster than in the case of public administration but the proportions of male teachers at the later ages are much smaller than in the case of public administration. Male teachers have a tendency to immaturity regardless of earnings. The difference between males and females in this respect will be again referred to.

Turning now to Table 107 it is seen that the per cent male teachers under 25 and over 35 years of age are respectively 19·2 and 51·1 in the cities and 32·8 and 36·7 in the rest of the country, the disparity between the cities and the rest of the country being not nearly so great as in the case of females. Table 106 shows the ages in all the provinces of both male and female teachers by smaller age groups than can be given where age is associated with earnings. In

percentages of the total of each sex the ages of male and female were as follows:—

|                          | Per cent of the | e total at ag |
|--------------------------|-----------------|---------------|
| Age                      | Male            | Female        |
| 3                        | _               | 0.            |
| 7                        |                 | 1.            |
| 3-19                     |                 | 10            |
| D-24                     |                 | 36            |
| -34                      | . 30.3          | 29            |
| 5-49                     | . 26.4          | 14            |
| -64                      | . 12.8          | 5             |
| and over.                | . 2.0           | 1             |
| otal                     | . 100.0         | 100           |
| lean age                 | . 34.7          | 29            |
| ledian age               | . 32.0          | 25            |
| lean age of younger half | 24.7            | 20            |
| lean age of older half   |                 | 37            |

The mean age or what is usually termed the "average" age in this case does not mean much except in conjunction with the median age or the age above and below which the same number of persons are found. In this conjunction it shows that the older half of both males and females tend to stay in the profession; i.e., the exodus from the profession occurs most heavily in the earlier years. This is true to a greater extent among females than among males. Half the teachers tend to hold to the profession reasonably tenaciously. This is seen more clearly when we take the mean age of the younger half (below 32 in the case of men and 25 in the case of women) and compare it with the mean age of the older half.

Of course the mere fact that the occupants of a profession are young is not conclusive evidence that they leave it at an early age. It might be partly due to the opening of a large number of new positions. That this may be true can be shown by comparing the number of teachers in Canada in 1921 with that in 1911 as follows.

|                                          | 1911   | 1921   | Increase | Per cent<br>increase |
|------------------------------------------|--------|--------|----------|----------------------|
| Number of teachers— Total. Male. Female. | 42,286 | 60,837 | 18,551   | 43·9                 |
|                                          | 8,223  | 11,042 | 2,819    | 34·3                 |
|                                          | 34,063 | 49,795 | 15,732   | 46·2                 |

Notice incidentally the increasing feminization of the profession. Now an increase of nearly 44 p.c. in the number of teaching positions in the ten years would tend to increase the number and proportion of teachers with less than ten years' service, so that the latter phenomenon would not necessarily mean that teachers were leaving the profession at an early age. We are faced with the same difficulty of interpretation when we take the teachers by years' experience instead of by age. The census of 1911 did not give occupations by small age groups, but it may be worth while giving comparative data for the two decades with such age groups as are available for 1911 as follows:-

|                                            |                       | Nu                    | mber                         |                         | Per cent                                                                  |                     |                     |                     |                                |                      |  |

As mentioned the age groups are too broad to tell much, especially about the extent to which the absolute increase in the decade affected the proportions at the younger ages. Certainly the group 15 to 24 increased much less in the cases of both sexes than the average, which would be against expectations as to the effect of the increase. The ages have definitely increased during the decade except that the proportion over the age of 65 remained the same, but increased absolutely. The constancy in the proportion is likely due to the increase mentioned. Now it should be an indication of a much longer tenure that in spite of an increase of 44 p.c. in the number of teachers during the decade the proportion at the younger ages decreased. Notice that where by far the greatest increase took place among females was at an age above the median age of 1921. This increase must have taken place in spite of the increase in new positions, either because teachers are entering the profession at a later age than formerly or because these positions have been filled by ex-teachers.

To obtain some idea of the equation between the age of the teacher and his or her teaching experience we shall take the case of one province where the census gives the age of teachers in all classes of schools and the provincial education report gives the years' experience in schools under

public control.

| Experience                                                   | Per cent | Age                                                    | Per cent |
|--------------------------------------------------------------|----------|--------------------------------------------------------|----------|
| Less than 5 years. 5 to 29 years. 30 years and over.  Total. | 30.0     | Less than 25 years.<br>25 to 49 years.<br>50 and over. | 37.0     |

If we assume that teachers in private schools, business colleges, etc., are apt to have longer experience on the whole than teachers in public schools, this would account for a large part of the dissimilarity between the two sets of figures which, after all, are unexpectedly similar. A much closer approximation to similarity could be obtained from smoothing the two sets of figures but this was considered hardly worth while.

Table 108 deals with male teachers only and compares their age distribution with that of certain other occupations which imply training, experience and responsibility for discipline. Beside other professional occupations it seemed natural to take foremen in a number of industries into the comparison. It is clear from this table that there is a decided immaturity among teachers as compared with these occupations in spite of the training required of a teacher. This immaturity is clearly not altogether due to entering the calling at an earlier age, but to such conditions as have already been mentioned, viz., increase in the teaching positions and leaving the profession at an earlier age. However, the proportion under 20 years of age is very much higher

among male teachers than in the total of the callings listed.

Since some time has elapsed since the census year it will be necessary to use other than census data to investigate indications of change since 1921. We have data on the experience of teachers for five provinces, viz., Nova Scotia, New Brunswick, Quebec, Ontario public schools and Manitoba. An examination of the trend in these provinces should give some idea of the changes that have taken place in general. In such an examination of teachers' experience the two points already emphasized should be kept in mind, viz., 1, the increase in teaching positions which would necessitate an increase in new teachers and consequently an impediment to increase in experience; 2, an advance in the qualifications of teachers which would also tend to impede experience at initial stages, since, other things being equal, a high class teacher would be employed in preference to a low class teacher with the same experience.

in preference to a low class teacher with the same experience.

In Nova Scotia and New Brunswick the crude figures for experience do not show much change between 1921 and 1926, but if allowance is made for the increase in the number of new positions in the interval a considerable advance in experience is shown; still more if allowance is made for improved qualifications. In Quebec a distinct advance is shown even without allowing for the increase in positions. In Ontario public schools the crude figures show a very marked increase in the experience of female teachers but a decrease in the case of males. The male positions, however, have increased relatively much more rapidly than the female, and this may account for the apparent decrease. In the case of both sexes the advance in qualifications has been marked. In Manitoba a comparison of the crude figures of 1923 and 1926 shows a very marked increase in experience—indeed the indications are that the median experience has been almost doubled in this short period without making allowance for a slight increase in the number of positions and a stiffening up of standards, which would increase the time of preparation and thus lessen the experience.

It would seem, therefore, that the experience of female teachers at least has been definitely increasing since 1921, this signifying that their age is also increasing. Whether this can be said

for male teachers or not is uncertain.

The question now arises as to how far the dependence upon earnings with the age of teachers or their experience affects the cost of education in view of the increase of age of teachers with improvement in teaching conditions. This is a very important point and one which is generally overlooked. If teachers' salaries cost more than they did formerly we are at first apt to think that this is due solely and simply to increase in the remuneration of teachers. The fact that we often overlook the decreased value of the dollar is a familiar phenomenon, but the fact just mentioned is not quite so familiar, namely, that the only fair way to compare present salaries with past is to compare them man for man, class for class, and age for age. If we have to pay more for a first class teacher with nine or ten years' experience than we formerly had to pay for a third class teacher with one year of experience this is not an increase in remuneration at all, but a price paid for greater efficiency, or rather a necessity which the very nature of the situation compels us to meet. If salaries are dependent on experience and if experience is greater now than formerly, then the increased cost of education from this source should always be taken into consideration. We have only the earnings at each age group in 1921 for cities and we do not know what they were in 1911, but it would seem fair to suppose that the trend would not be very different in other parts of the province, and it might be at least interesting to see how the earnings at each age group in cities applied to the change in age distribution throughout the country between 1911 and 1921 would have raised the average earnings without any change in the remuneration for each age group in the interval. Owing to the importance of the point the data are given in full.

|           | Proportio | on at each a                                           | Weekly earnings<br>in cities, |             |                  |                  |
|-----------|-----------|--------------------------------------------------------|-------------------------------|-------------|------------------|------------------|
| Age Group | , Ma      | les                                                    | Fem                           | ales        | 1921             |                  |
|           | 1911      | 1921                                                   | 1911                          | 1921        | Male             | Female           |
| 15–24     | 32.0      | 28.5                                                   | 52.3                          | 49.6        | \$ cts.<br>18 82 | \$ cts.<br>18 41 |
| 25–64     | 65.7      | $\begin{array}{c} 69 \cdot 5 \\ 2 \cdot 0 \end{array}$ | 46·6<br>1·1                   | 49·3<br>1·1 | 36 92<br>32 85   | 23 25<br>14 82   |
| All ages  | 100.0     | 100.0                                                  | 100.0                         | 100.0       |                  |                  |

Weighting the earnings of 1921 by the age distribution of 1911 and 1921 we have average weekly earnings in 1921 of \$31.68 for males and \$20.77 for females; in 1911 with the same rate of earnings, we have \$31.02 for males and \$20.64 for females. The increase for males would be 64 cents a week or  $2 \cdot 06$  p.c.; for females, 13 cents a week or  $0 \cdot 63$  p.c. This alone would increase the index of cost of teaching in the case of males from 100 in 1911 to  $102 \cdot 06$  in 1921; in the case of females from 100 in 1911 to  $100 \cdot 63$  in 1921. Now the age groups taken are very broad and

without doubt the rise in the index would have been much greater if we had been able to use finer age groups. Notice that this does not take into consideration increased qualifications, or decreased value of the dollar, urbanization or specialization. It seems hardly necessary to point out that the value received for the small increase in cost is out of all proportion to its cost. As a further commentary on this value it may be pointed out that the increased average experience does not merely mean that teacher X had more experience in 1921 than he or she had in 1911. It is more likely to mean that out of two sets of teachers, X and Y, the proportion of X's as compared with Y's was greater in 1921 than in 1911. "X" thus refers to the real teacher and "Y" to the person who never intended to stay in the profession. The discovery of about 2 p.c. increase from this source alone—change in age distribution—leads us to believe that a thorough investigation of other factors that enter into increase in teachers' salaries over and above bare remuneration for the same service as was given in 1911 would give good results.

From the cursory examination that has been made the following general conclusion would

seem to be warrantable.

1. A definite increase in earnings of teachers of both sexes with increase in age.

2. Indications of increase in age of female teachers with improvement in earnings. This is

not so definite in the case of male teachers.

3. Indications of a lack of maturity among male teachers as compared with persons in other more or less similar occupations. This want of maturity does not seem to be altogether due to lower remuneration in teaching, nor to easily explained causes, including the weighting at younger ages due to the rapid increase in new positions. It would seem that much greater remuneration is required to enable teaching to compete with certain other callings in holding males.

4. The same idea is borne out in indications of a decrease in the experience of males in one

province since 1921 while that of females showed a definite increase.

5. It is borne out also by census evidence of increasing feminization of the profession between

1911 and 1921.

The fact that in cities, at least, the value of teachers is considered to grow with age, as shown by increase in remuneration, is of particular significance. The highest point by far reached in the case of males was the age group 50 to 64 while the average earnings of the profession were maintained after the age of 65. It would seem that no impediment to the stabilization of the profession arises from deterioration with age owing to the exacting nature of the work. A more thorough analysis is necessary to procure complete satisfaction on this point, but the indications are to say the least, interesting.

# CHAPTER II.—REVIEW OF PROVINCIAL EDUCATIONAL ACTIVITIES

#### PRINCE EDWARD ISLAND

Summary of all Educational Institutions.—During the school year 1925-26 the number of pupils and students in all educational institutions in Prince Edward Island was 18,724. These were distributed as follows: 17,324 in 471 elementary and secondary schools; 299 in Prince of Wales College; 657 in agricultural and technical institutions; 152 in the University of St. Dunstan's; 15 in the schools for the blind and deaf in Halifax, N.S.; 251 reported in private elementary and secondary schools; and 26 in Indian Schools. In addition there were 151 residents of the province attending Canadian universities and colleges outside the province. These bring the total up to 18,817, an increase over the corresponding total of the preceding year

the total up to 18,817, an increase over the corresponding total of the preceding year.

Publicly Controlled Elementary and Secondary Schools.—The 17,324 in publicly controlled elementary and secondary schools (exclusive of 299 in Prince of Wales College) were accommodated as follows: 11,008 in 415 primary (ungraded) schools, and 6,316 in 56 graded schools—

including high schools. By sex the enrolment consisted of 8,764 boys and 8,560 girls.

Average Attendance.—In the above schools the average daily attendance was 6,979 in primary and 4,844 in graded schools, or a total of 11,823. The percentages of attendance were: primary, 63·4; graded, 76·7; all schools, 68·2; corresponding to 65·6, 78·6 and 70·3 respectively in 1925. The figures of 1926 show a considerable decrease from those of 1925. On consulting Table 8, which shows the attendance by intervals of 20 days we notice a considerable difference between the distribution of the attendance in 1926 and 1925. Pupils attending over 180 days, representing over a quarter of the total enrolment, show to better advantage than in any previous year recorded in the table.

Secondary Education.—As in other provinces high school or continuation work is not confined to high schools but is offered by the various types of schools if the teacher is qualified to teach it. The result is that the number of pupils in secondary or higher grades is large in proportion to the total attending institutions of learning. Including 1,444 high school pupils in the graded and ungraded schools throughout the province, 299 in Prince of Wales College, 234 in technical day courses, the pupils of private high schools and the students of St. Dunstan's University who take high school as well as degree work, the total number doing some form of high school or higher work is not far short of 2,200 or about 12 p.c. of the total in institutions of learning.

Teachers.—The number of teachers in 1926 was 616, comprising 142 males and 474 females, an increase in males and decrease in females being shown over the preceding year. Increases in salary were shown in every class except Class I males and Class III females, the situation of

1925 and 1924 in this respect being reversed.

Teachers in Training.—Teachers in Prince Edward Island are trained in Prince of Wales College and Normal School, every first year student of this college being requested to take pro-

fessional training.

Agricultural and Technical Education.—These two activities are under one organization, both coming within the scope of the Dominion Technical Education Act of 1919. The work is under the administration of the Department of Agriculture but subject to inspection by the Chief Superintendent of Education who also acts with the Commissioner of Agriculture in an advisory capacity touching matters relating to the work. During the year there were 234 in day and 423 in evening courses as compared with 141 and 30 respectively in 1925. Students completing successfully a two years' course in agriculture are admitted to the second year of Nova Scotia Agricultural College. Fifty-three school fairs were held in 1926 in which 264 schools and 15,860 pupils participated.

Medical Inspection.—Eighty-three schools with 4,661 pupils were medically inspected. School Support.—The expenditure on school support during the year was \$454,671 as com-

pared with \$452,699 in 1925. Of this \$171,649 was contributed by the districts and \$283,022 by the Government. The cost per pupil enrolled was \$23.82, and in average attendance \$35.01. This refers to maintenance costs and is comparable to \$23.64 and \$33.62 respectively in 1925.

#### NOVA SCOTIA

Summary of All Institutions.—During the school year 1925-26 Nova Scotia had in all her institutions an aggregate of 120,940. This enrolment included 112,391 in ordinary general schools; 327 regular, and 363 summer, students in Normal College; 3,548 in technical and agricultural schools not including students of university standard; 549 in affiliated colleges exclusive of secondary pupils in technical schools; 1,434 in Universities; 1,348 in private elementary and secondary schools; 493 in private business colleges; 169 in the schools for the deaf and

blind exclusive of pupils from outside the province; and 318 in Indian Schools.

General Schools.—Of the enrolment of 112,391 in ordinary day schools (Grades I to XII)
38,813 were in 1,431 rural schools and 73,578 in village, town and city classrooms. These figures correspond to 39,248 in rural and 73,104 in village and other urban schools in 1925. The number

of rural schools decreased by 4 and of urban schools increased by 31 since 1925.

Average Daily Attendance.—The average daily attendance of 80,447 or 71.6 p.c. of the enrolment corresponded to 80,319 or 71.5 p.c. in 1925. The percentage attending 140 days or more in all schools was 62.8 in 1926 and 63.4 in 1925, the absolute number attending this period having decreased from 71,120 in 1925 to 70,596 in 1926. Thus while the general percentage of attendance increased this index decreased due to the small proportion attending over 180 days in 1926. The total days' attendance was 15,661,085 in 1926 and 15,742,696 in 1925, showing a decrease from 1925. Since the average daily attendance was greater in 1926 this can only mean that the schools were open on an average longer in 1925 which accounts for the better percentage in 1926. Dividing the total attendance by the average attendance shows that the schools were open on an average 194.7 in 1926 and 196 in 1925. This shows how misleading the percentage of attendance may be as an index of the amount of time in the course of the school year during which the pupils are receiving instruction. To throw further light on the attendance the following comparison is made between 1926 and 1925:-

| Enrolment. Attending less than 80 days. Attending 80 to 159 days. Attending 160 to 179 days. Attending 180 days and over | 112,391<br>20,136<br>37,015<br>26,819<br>28,421 | 112,352<br>20,131<br>35,390 | 39     |
|--------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|-----------------------------|--------|
| Attending 80 to 159 days. Attending 180 to 179 days. Attending 180 days and over                                         | 20,136<br>37,015<br>26,819                      | 20,131<br>35,390            | 5      |
| Attending 80 to 159 days. Attending 180 to 179 days. Attending 180 days and over                                         | 37,015<br>26,819                                | 35,390                      |        |
| Attending 160 to 179 days                                                                                                | 26,819                                          |                             | 1,625  |
| Attending 180 days and over                                                                                              | 28,421                                          | 25.719                      | 1,100  |

| Total, 4–17                                           | 129,591                                                                                                                          | 133,446                                                                                                                 | -3,855                                                                       | 1                                  |  |

By grades the figures of 1925 and 1926 compare as follows:—

| Grade                                                              | Boys                                                                                                          |                                                                                                               | Increase                                                                                     | Girls                                                                                                    |                                                                                                                      | Increase                                                                                                             |
|--------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| Grade                                                              | 1926                                                                                                          | 1925                                                                                                          | Increase                                                                                     | 1926                                                                                                     | 1925                                                                                                                 | Increase                                                                                                             |
| I (a). I (b). III. IIV. V. VI. VII. VIII. VIII. VIII. XX. XX. The increase of 39 in 1926 over the enrolment of 1925 was due to the ages of 12 and over

which increased over 1,100, the earlier ages showing a decrease of 1,061.

Grade, Age and Sex Distribution.—The above three tables show some interesting differences between 1926 and 1925. A decrease in the case of both sexes is shown in the earlier and an increase in the later elementary grades while there is a slight decrease in the high school grades. The decrease in Grade I (b) is probably very significant. This grade contains the repeaters of Grade I and up to 1925 was from year to year greatly in excess of Grade I (a), or those taking the grade for the first time. The following comparison of Grades I (a) and I (b) since 1920 may be of value. Both sexes are represented.

| Year                                                        | Grade I(a)                                                       | Grade I(b)                                                         | Total<br>Grade I                                                   | Total enrolment                                                           | Per cent<br>in<br>Grade I<br>of total<br>enrolment   | Grade II                                                           | Per cent<br>of<br>enrolment<br>in<br>Grade II |
|-------------------------------------------------------------|------------------------------------------------------------------|--------------------------------------------------------------------|--------------------------------------------------------------------|---------------------------------------------------------------------------|------------------------------------------------------|--------------------------------------------------------------------|-----------------------------------------------|
| 1920.<br>1921.<br>1922.<br>1923.<br>1924.<br>1925.<br>1926. | 9,700<br>9,939<br>10,904<br>12,875<br>12,891<br>12,753<br>12,927 | 21,828<br>21,300<br>19,223<br>13,404<br>12,597<br>12,308<br>11,215 | 31,528<br>31,239<br>30,127<br>26,279<br>25,488<br>25,061<br>24,142 | 108,096<br>109,483<br>114,229<br>114,458<br>111,594<br>112,352<br>112,391 | 29·1<br>28·5<br>26·4<br>22·9<br>22·8<br>22·3<br>21·5 | 12,008<br>12,733<br>14,016<br>13,992<br>13,037<br>12,818<br>12,821 | 11·1<br>11·6<br>12·3<br>12·2<br>11·7<br>11·4  |

The above table would seem to afford a striking illustration of the operation of cause and effect. The effect is the reduction of Grade I both absolutely and in proportion to the total enrolment, the latter having increased since 1920 by over 4,000, while Grade I decreased by 7,000. Without the other data of the table it might have been suspected that the reduction was due to a decrease in the number entering school, but Grade I (a), which presumably represents those in the grade for the first year, increased in the meantime by 3,000. Grade I (b), or those repeating the grade decreased from 21,828 in 1920 to 11,215 in 1926 or over 50 p.c., so that

it would seem quite safe to conclude that the cause of the reduction in the numbers in Grade I was a decreasing number of repeaters, a matter of great importance. Now if this decrease meant merely the dumping of the overflow in Grade I into Grade II it should be reflected in Grade II by continued increase. Although Grade II increased from 1920 to 1922 there is no evidence that the pupils who formerly repeated in Grade I are now repeating in Grade II since this Grade also has kept decreasing proportionately since 1922. An examination of the other grades shows that the earliest grade which has consistently increased since 1920 is Grade V, and that Grades III and IV have behaved in the same manner as Grade II. The data by ages and grades show no marked changes in the ages of Grade I (a), Grade I (b) or Grade V since 1920 except a very slight tendency to decrease. The reduction in Grade I, therefore, can not have resulted in serious retardation in later grades.

Secondary Education.—The enrolment in secondary grades of 11,948 showed a slight increase

over that of 1925. The high school grade boys, however, showed a decrease.

Teachers in Ordinary Day Schools.—The number of teachers in 1926 was 3,320, of whom 276 were males and 3,044 females. A considerable decrease (25) from 1925 was shown in the case of the males. All of these except 6, however, held low class certificates. Appreciable increase was shown in the case of the higher class female teachers. The number of normal trained teachers increased from 1,827 in 1925 to 1,947 in 1926. Teachers with service over 5 years showed a slight decrease.

Teachers in Training.—The number of students attending Normal College was 327 in the regular courses and 363 in the summer courses. In the regular courses 42 were men and 285 were women. All but 83 held certificates of Grade XI or higher, while 41 were in university graduates' course. The summer course during four weeks of July and August is designed to provide minimum training to candidates for licenses who have not yet attended the regular courses. It qualifies only for the two lowest classes of license and even these licenses receive no diplomas.

Agricultural and Technical Education.—See Section 7. Universities and Colleges.—See Section 12. Private Schools.—See Section 13.

#### NEW BRUNSWICK

Summary of all Educational Institutions.—During the school year 1925-26 the number enrolled in all educational institutions in New Brunswick was 85,927, including 80,769 in ordinary day schools; 2,290 in technical schools; 376 in normal school, and 48 in vocational teacher-training schools; 274 in Indian schools; 60 in the schools for the blind and deaf in Halifax, N.S.; 650 reported in business colleges; 509 reported in private elementary and secondary schools; 186 in preparatory courses in universities; 118 in short, special and correspondence courses in universities, and 647 in regular courses in universities. Besides the above total there were 490 residents of New Brunswick in universities and colleges situated in other provinces. The total of 85,927 corresponds to 85,247 in 1924-25.

Enrolment in Ordinary Day Schools.—Of the enrolment of 80,769 in ordinary day schools 75,454 attended during the first term ended December 31 and 75,091 during the second term ended June 30. The enrolment during the first term consisted of 36,880 boys and 38,574 girls; during the second term, 37,251 boys and 37,840 girls. The increase in the number of boys and the decrease in the number of girls in the second term; i.e., the winter and spring mo. ths, are interesting. The enrolments in the December and June terms respectively were distributed as follows: cities and towns, 23,786 and 23,338; other graded schools, 16,424 and 16,276; ungraded schools, 35,244 and 35,477, showing an increase in the ungraded schools and decrease in the other schools during the June term. This shows that the simple explanation of the boys increasing and the girls decreasing during the winter months as being due to climatic conditions and work is not tenable, since the decreases happen in the graded and the increases in the ungraded schools. One of the real reasons is that there are more boys than girls at the younger ages at school and the opposite at the later ages. A large number of children begin school in the spring, and of these the majority are boys. A large number of the older pupils discontinue in the fall, and of these the majority are necessarily girls, since girls form a great majority of the older pupils. This would have a tendency to give a larger number of boys in the spring term and of girls in the fall term. The reason for dwelling on his point is to show how misleading such figures may be.

Average Daily Attendance.—The 80,769 pupils enrolled for the year attended a grand total of 11,289,868 days while the schools were in operation an average of 193·5 days. From this we deduce that 58,345 attended daily on an average of 72·2 p.c. of the enrolment. The attendance by twenty-day periods may be seen in Table 8. Bearing upon the regularity of attendance is the fact that provision has been authorized for the payment of board and the conveyance of isolated pupils in unorganized districts.

Secondary Education.—The majority of pupils in secondary grades in New Brunswick are taught in grammar schools situated in county towns and free to all pupils of high school grade in the country. About 1,173 are taught in superior schools free to all pupils in Grade VII and upwards in the parish where the school is situated. The total number of pupils given as in secondary grades by half years was 3,685 for the fall term and 3,443 for the spring term, but these only

include the secondary pupils in graded schools. As in other provinces work equivalent to high school work is done in ungraded schools; further the pupils of the normal school are also doing academic work, while a large element of the high school population is taught in Convent schools not reporting to the Department. Further particulars may be seen in Section 5.

Teachers.—The numbers of teachers during the second term was 2,525; an increase of 41 over the corresponding term of the previous year. The classification, average salaries and experience of these may be seen in Table 112. The Chief Superintendent reports that the supply of teachers now exceeds the demand and that local licenses are no longer used. The loan to student teachers mentioned in previous reports, being a temporary measure, is likely to be discontinued in view of this sufficiency in supply. For some years the Department has been granting loans at six per cent interest to qualified students to enable them to attend normal school. At present the province is spending approximately \$20,000 per year as pensions of which the teachers contribute about four-fifths; professors of the State University who hold valid licenses to teach in the province are included in this pension scheme.

Rural Schools.—The number of pupils enrolled in rural ungraded schools in New Brunswick was 35,244 during the first term and 35,477 during the second term, the number of one-room schools during these terms being respectively 1,310 and 1,295. As mentioned in last year's report there has been a recent arrangement to provide for the board and conveyance of pupils in

unorganized and isolated school districts.

Technical Education.—Day technical classes were conducted in 8 and evening technical classes in 9 municipalities, the number of pupils in these classes being 561 in day and 1,433 in evening while 296 were taking correspondence courses. Teacher-training for vocational work was carried out in one institution with an enrolment of 48 teachers in training. These figures refer only to work qualifying for grants under the Dominion Technical Education Act.

Special Classes.—Among the announcements in the report of the Superintendent is that Saint John School Board has been authorized to spend a sum not exceeding five thousand dollars for free kindergarten work in that city. While kindergarten classes are not strictly speaking special classes, there is little doubt that they serve one at least of the purposes which special classes accomplish, viz., lightening the load of the regular classes in the first grade. Mention was made in last year's report of seven opportunity classes for retarded pupils being opened in Saint John in 1924.

#### **OUEBEC**

During the year in which the latest statistics of all educational institutions could be brought together for summarizing (1925) the total enrolment excluding duplicates in all institutions in Quebec was 593,414 pupils and students of whom 516,036 were in Catholic and 77,378 were in Protestant institutions. This enrolment included 548,519 in publicly controlled and independent primary schools; 1,771 in normal schools; 9,363 in classical colleges; 541 in independent schools not subsidized where classical education is given; 7,478 in universities exclusive of classical colleges and schools to be mentioned presently; 409 in independent superior institutions (mostly theological); 195 in protestant theological colleges; 111 in the Polytechnic school; 1,253 in schools of fine arts; 563 in the School for Higher Commercial Studies; 2,413 in the Technical school; 695 in agricultural schools; 267 in a dairy school; 5, 66 in night schools; 32 in Rangers' school; 3,894 in schools of arts and trades; 2,318 in dressmaking schools; 6,095 in nursery schools; 698 in schools for the deaf-mutes and blind; 984 in public lessons in the Monument National School at Montreal and 40 in school for historic guides. Table I groups the above figures into categories comparable to figures in other provinces. In this table mention is also made of 2,971 reporting in private business colleges and 1,598 in Indian Schools. These, however, may be included in the list of institutions already mentioned. The enrolment of 593,414 represents an increase of 9,509 over the enrolment of the previous year. It was accommodated in 8,086 institutions including the four universities and their affiliated or annexed schools. The number represented by each type of school is to be found in Table 2 of this report.

Primary Schools.—The primary school in Quebec includes what is usually considered as the ordinary day schools in other provinces. They include kindergarten schools, elementary schools and Catholic complementary schools. The last mentioned especially carry pupils on to work that would be known in other provinces as high school work. The Academic training of some of the teachers for primary schools is completed in these schools while that of others is completed in the normal schools. The publicly controlled primary schools consist of "Commissioner" or majority schools and "Trustee" or minority schools. There is also a large number of independent primary schools, i.e. independent of the control of commissioners or trustees. The Protestant high schools although ranked as secondary schools are usually included with the primary schools in statistical tables. Details of these schools, viz., the number of institutions, teachers and pupils by sex as well as the average daily attendance are to be found in Table 2 of this report.

Average Daily Attendance.—The average daily attendance of all institutions except universities and night schools was 79.9; that of primary schools alone being roughly the same. As in former years the province ranks high in this important aspect of the school situation. This fact was also noticeable in the data on school attendance in the census of 1921.

Secondary Schools.—The secondary schools in Quebec are represented by 21 classical colleges and little seminaries; 10 independent classical schools and 53 Protestant high schools.

In addition to these are certain secondary institutions for girls. It must be remembered, however, that a large number of pupils doing work of high school grade are enrolled in Catholic complementary schools. The distinction between "primary" and "secondary" in Quebec is not the same as that between "elementary" and "high school" in other provinces. The real meaning of secondary schools in Quebec is illustrated in the following data:—

In 1925-26 eight little seminaries with 880 students and 2 classical colleges with 256 students were affiliated to Laval University; while 5 little seminaries and 6 classical colleges had a combined enrolment of 1,301 students affiliated to the University of Montreal. One secondary institution for girls with 43 students in arts was affiliated to Laval and 1 with 64 students was affiliated to Montreal. One institute of modern secondary Education with 16 students was affiliated to Laval, and 1 with 171 students was affiliated to Montreal. In 13 convents and 2 household science schools affiliated to Laval there were 2,537 students in Arts and in 17 convents and 3 household science schools affiliated to Montreal there were 3,795 and 356 students respectively. All the above students were affiliated for Arts only and do not represent the full enrolment of the institutions mentioned. A secondary institution in Quebec may carry a pupil all the way from the earliest grades to the end of a full course in Art.

Teachers.—The number of teachers, religious and lay, in all institutions in 1924-25 was

22,282 including 5,759 male and 16,523 females.

Normal Schools.—In 1924-25 there were 18 normal schools including 17 Catholic and 1 Protestant. The report of 1925-26 mentions 19 including the New Roberval School. Of these 18 are Catholic. No less than 1,854 teachers-in-training were enrolled in 1925-26. The number of diplomas awarded by these normal schools was 822 in 1925 as compared with 667 in 1924.

Special Schools.—These include one polytechnic school with 126 enrolled and from which 12 engineers graduated in 1925-26; two schools of fine arts with 48 students in regular courses in architecture and 1,057 in special day and night courses; one school of High Commercial Studies with 491 enrolled; seven technical schools with 2,441 students; three agricultural schools with 503 students; sixty-two night schools of which 61 were kept at Government expense and 1 independent (in Montreal) the enrolment in the 62 being 5,490; fifteen schools of Arts and Trade; thirty dress-cutting and dress-making schools; thirty-three nursery schools with 6,095 pupils (in 1924-25); two schools for the blind and three schools for the deaf with 670 pupils; the Monument National School or public course composed of 318 regular public lectures and attended by 836 students and the School for Historic Guides at Quebec with an attendance of 60. In addition to these were 31,212 farming and gardening pupils and 13,473 pupils in Household Science course who have already been included with the data on primary schools. The above figures are mostly for 1925-26 and in consequence differ from the figures in the general summary for the province which as already explained are for 1924-25.

The schools handling technical education in Quebec included several of the institutions

mentioned above. This type of education in the province calls for more than passing mention. The institutions subsidized under the Dominion Technical Education Act include industrial, commercial, fine arts, household science and forestry schools, one or more of which is situated in different parts of the province. Nearly 10,000 students were enrolled in these institutions, this number being already included among the figures given for special schools. It should be remembered that the figures of special schools included also students of university standard and that these as well as certain other students are not included with the 10,000 just mentioned. Accounts of the progress made in bringing about the co-operation between these technical schools and various industries as well as other important details are to be found in the reports of the

Dominion Director of Technical Education.

Superior Education.—The two Catholic universities enrolled 14,720 students and the two Protestant universities 3,280 students. In addition, eleven non-subsidized independent institutions prepared 501 candidates for the Catholic Priesthood while 209 were enrolled in the four Protestant Theological colleges. These figures also are for 1925-26. Further details of these superior institutions will be found in the section on Higher Education, but the data in this section include the affiliated schools most of which were mentioned under "Special Schools" and also the Catholic secondary schools, the Protestant normal college and several institutions which have not been mentioned elsewhere. As will be seen this section is for the purpose of giving a survey of higher education from a general point of view and differences in the data from the data in a summary for the province arise from differences in grouping and from differences in the dates of making returns.

Expenditure.—The contributions of the province for the year 1924-25 amounted to \$28,980,-568 including \$3,771,317 by the Government and \$25,209,251 by municipalities and independent and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,251 by municipalities and \$25,209,25 schools. The total contributions correspond to \$27,917,738 in the previous year and to \$3,131,706 in the first year of the century.

#### ONTARIO

Summary of all Educational Institutions.—During the school year last reported (calendar year, 1925, for public and separate schools; school year 1925-26 for other schools), the total number attending educational institutions in Ontario was 774,493. These included 677,452 in ordinary day schools under public control including public, separate, continuation, high schools and collegiate institutions; 60,254 in day and evening technical schools and in night elementary and high schools; 2,657 in schools for teacher-training including normal schools, model schools and vocational teacher-training schools, but not including extra mural students nor the students of the College of Education who are elsewhere included with the figures of universities and colleges; 3,830 in Indian Schools, 399 in schools for the blind and deaf; 7,148 reported in private business colleges; 6,533 reported in private elementary and high schools; 2,839 in preparatory courses in universities and colleges; 6,353 in short, special and correspondence courses in universities and colleges; 943 in regular courses in colleges and 6,085 in regular courses in universities. Those mentioned as "regular students" include only such as are of university standard and are taking regular courses. Other students of university standard are included with the figures of short and correspondence courses. The rigid elimination of students below university standard render the figures of this year incomparable with those in previous reports.

Elementary and Secondary Day Schools (Public, Separate and Secondary Day Schools).— These included 6,389 public with 518,696 pupils; 716 separate with 95,300 pupils; 186 high schools (including 52 collegiate institutes) with 53,512 pupils; 201 continuation schools with 9,944 pupils and 35 day vocational schools with 15,201 full time pupils, 2,743 part-time and 1,705 special day pupils. The public schools included 5,627 rural, 333 city, 265 town and 164 village schools; the separate 420 rural, 170 city, 103 town and 23 village schools. Elementary and secondary work are also done in 20 night elementary schools with 1,832 pupils and 18 night high schools with 3,547 pupils.

Average Daily Attendance.—The average daily attendance in elementary day schools in 1924-25 was 442,642; in continuation schools, 8,159; in high schools and collegiate institutes 45,554 and in full time vocational schools, 11,689 pupils, the total average daily attendance being 508,044. This represents an increase of 11,300 over the previous year. The distribution of this increase may be seen as follows:—

|                                                                                                               | Average Attendance, 1924–25                                                               |                                                              |                                                                                           | Increase over previous year           |                                                  |                                                                         |
|---------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|--------------------------------------------------------------|-------------------------------------------------------------------------------------------|---------------------------------------|--------------------------------------------------|-------------------------------------------------------------------------|
|                                                                                                               | Public                                                                                    | Separate                                                     | Total                                                                                     | Public                                | Separate                                         | Total                                                                   |
| Rural. City. Town. Village Total Elementary. Continuation. High Schools. Vocational (full time). It will be noticed that out of the increase of 11,301 almost 45 p.c. were rural and about 28 p.c. were high school and vocational, town public and continuation schools showing a decrease. It will also be noticed that the largest proportional increase occurred in day vocational and city separate schools; also that 64 p.c. of the increase in city school attendance was due to separate schools. The increase in the rural public school attendance is mainly due to increased regularity since the enrolment increased only 859 while the average daily attendance increased 4,685; a similarly marked increase in regularity occurred in the town separate schools where the enrolment decreased by 1,661 while the average daily attendance increased by 36. The percentage of the total enrolment in average daily attendance in rural schools was 67·2 as compared with 65·6 in the previous year. A steady increase at this rate would bring the average attendance in rural schools up to the general level of urban schools in Canada in two or three years. Considering the various difficulties in the way of attendance in rural schools this would be a remarkable achievement.

Age—Grade—Sex Distribution.—Data on this subject are to be found in sections 2, 3 and 4 of this report. A comparison of rural and urban schools should take into consideration the statistics of secondary schools which are to be found in section 4; also that the statistics of public and separate schools are for the calendar year while those for secondary schools are for the school year ended June 30. With these points in mind the tables referred to should be studied carefully as they give an enormous amount of condensed information. If we examine the distribution at a particular age, say the age of 12 years, there is every evidence that a full quota is shown above Grade VII although a pyramiding is noticeable at Grade VIII which can not all be explained by the fact that Grade VII and Grade VIII are sometimes completed in the same year. Grades VI and VII seem to be short of expectations, the shortage being compensatory to excesses below these grades with the exception of a small number drawn from Grade VII by Grade VIII. The interesting part, however, is that the number of pupils who reach Grade VIII at the age of 12 seems to be full.

Secondary Education.—Secondary education in Ontario as in other provinces is carried out in different types of secondary schools and also in continuation classes of schools which are usually known as elementary. In Ontario the secondary schools consist of 186 high schools (including 52 collegiate institutes which in 1925-26 had 53,512 pupils in high school grade; 201 continuation schools which enrolled 9,944 pupils of high school grade and 35 day vocational schools which had 15,201 pupils of post high school entrance grade. In addition to these 6,327 pupils in public and 3,582 pupils in separate schools were doing work beyond high school entrance, or work covering Grades IX and X. Some of these (2,039) were in organized "Fifth Classes."

The day vocational schools had also 2,473 part-time and 1,705 special pupils. There were also 3,547 pupils in night high schools. The 35,226 in evening vocational schools were not necessarily of high school grade. Without including special and part-time pupils of vocational schools we find that the high school grade pupils numbered 92,113 or about one-eighth of the total enrolment.

Perhaps the most important feature distinguishing the continuation school from the other high schools is the fact that it is spread out into a large number of small urban centres and thus accessible to rural pupils who have qualified for high school work. Thus out of the 9,944 pupils in continuation schools 5,311 or about 53 p.c. were children of agriculturists. At the same time it is noticeable that of the 15,201 in full time day vocational classes 621 or about 4 p.c. were children of agriculturists; of the 53,512 pupils in high schools 11,735 or about 22 p.c. were children of agriculturists. The high schools it is seen educate more than twice as many of these children of agriculturists as the continuation schools. Of the pupils in high school grades in public and separate schools 5,027 were in rural schools. Thus roughly 22,600 pupils in high school grades were either rural children or whose parents were engaged in agriculture. This is about one quarter of the total in high school grades in day schools. Now we find 235,570 public and separate school pupils in rural schools and 378,426 in urban schools so that about 38 p.c. of the total are in rural schools. Since rural children doing work of high school grade are also to be found in secondary agricultural schools and in private schools it would seem that there is no great incomparability between the proportions of rural children and others who go on to high school work. Another interesting feature is the proportion of boys and girls in high school grades. In 1925-26 the comparative numbers were roughly 38,180 boys and 44,039 girls. These figures are short of a certain number not given by sex. We notice that boys to girls are in the proportions of 100 to 115. If however, we take the relative numbers of the sexes according to the class of school they attend we have the following figures:—

|                                                                                                                                              | Absolute numbers                                     |                                                       | Girls<br>per                    |  |
|----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|-------------------------------------------------------|---------------------------------|--|
|                                                                                                                                              | Boys Girls                                           |                                                       | 100 boys                        |  |
| Continuation classes in public and separate schools. Continuation schools. High schools. Collegiates. Day vocational full time. All schools. | 1,495<br>4,071<br>9,516<br>15,693<br>7,404<br>38,180 | 2,067<br>5,873<br>12,108<br>16,194<br>7,793<br>44,039 | 138<br>144<br>127<br>103<br>105 |  |

Now over half of the pupils in the continuation classes in public and separate schools are to be found in urban centres among which are the largest cities, so that on an average the "Continuation schools" represent the smallest urban centres and the collegiate institutes and day vocational schools the largest. We see, therefore, that the proportion of boys to girls in high school grades has a tendency to increase with the size of the urban centre. It would seem, therefore, either that the variety of work offered in the larger institutions attracts boys or that certain influences of smaller centres, such as the need to go to work, tend to keep boys from high school work. However, the age at which boys completed elementary work as compared with girls should be taken into consideration. The median age of boys in Grade VIII was 14·0; of girls 13·8 years. The mean ages were: boys 13·6; girls 13·4. These two averages would seem to show that the handicap of earlier graduation from elementary work does not enter very strongly into the different proportions of boys and girls in high school. A new table in Section 5 of this report (Table 79) shows the numbers entering secondary schools as compared with the numbers leaving elementary schools as far back as these data are recorded. It shows a surprisingly small leakage between the elementary and secondary schools; also unexpectedly large proportions between those entering school for the first time and those entering secondary schools.

Teacher-training.—Teacher-training has been carried on in English and French model schools (lower class teachers); normal schools (second and first class teachers); one school for vocational teacher-training and the College of Education (high school teachers, doctors of pedagogy and

The director of professional training reports the discontinuance after a duration of fifty years of the model schools for third class teachers. This marks an epoch since it means that the supply of teachers with matriculation or higher academic standing has become sufficient to warrant the discontinuance of training of teachers with a lower standing. In this report he gives interesting comparative figures for 1877 and 1925 as follows:—

|                                         | 1877                  | 1925                   |
|-----------------------------------------|-----------------------|------------------------|
| First class. Second class. Third class. | 250<br>1,304<br>3,926 | 1,810<br>11,900<br>846 |

The total registration of the College of Education was 474; of the six normal schools, 2,064 of whom 727 were in first class courses. During the year a special spring course was established in the normal schools to enable first class candidates to qualify for certificates in Elementary Art or in Elementary Physical Culture. Special courses in household science were also established in Hamilton Normal School. In addition to the normal school are English-French training schools with a total of 321 students in the regular session and 132 in the summer course. were also 280 in kindergarten primary summer courses in three normal schools. In addition to all these courses were special professional spring and summer courses at various centres with a total in 1926 of 1,222 students.

Rural Schools.—The Director of rural school organization reports that there were 5,017 one-teacher rural schools in 1925, of which 1,342 had an average of ten pupils or less. Twenty-eight consolidated schools were in operation, one being built in 1926. These schools had 3,708 pupils of whom over 1,500 were conveyed and 369 were in high school grades.

Technical Education.—The total number of full-time schools was 32 including two agricultural schools. In addition three full-time day schools in navigation and marine engineering were in operation in January, February and March. The number of part-time pupils increased from 1,739 in 1925 to 2,743 in 1926 or 57.7 per cent. Evening schools were carried on in 58 places while for a part of the year five villages in addition gave instruction in motor mechanics by employing jointly itinerant teachers, making a total of 63 in operation, an increase of 21 per cent. There has been a steady enrolment of around 35,000 in these evening schools for three

The University of Toronto has extablished a matriculation course for students in technical schools who are candidates for admission to the first year in the Faculty of Applied Science.

Auxiliary Classes.—The inspector of auxiliary classes reports the following classes: 99 training classes in 25 centres; 5 sight-saving classes in three centres; 7 orthopaedic classes in three centres; 5 hospital classes in two centres; open air and forest schools; 4 prevention classes, 4 lip-reading; 4 institutional; 10 promotional; 20 special industrial—a total of 165 classes. Auxiliary class surveys have been conducted in twelve places.

School Support.—The expenditure on education during the year was \$45,655,613 of which \$24,676,304 was in teachers' salaries in public, separate, continuation, high and vocational schools. The corresponding figures for 1925 were: total expenditure, \$45,030,685, and teachers' salaries, \$23,687,557.

#### **MANITOBA**

Summary of all Educational Institutions.—During the school year 1925-26 the enrolment in the educational institutions of Manitoba was 161,968 distributed as follows: 148,279 in ordinary day schools; 3,355 in technical day and evening schools; 636 in teacher-training; 2,263 in Indian schools; 93 in the school for the deaf in Winnipeg and in the school for the blind in Brantford, Ontario; 2,222 reported in private business colleges; 646 reported in private elementary and secondary schools (this figure, however, is only partial); 115 in preparatory courses in the proposition of the school for the deaf in Winnipeg and in the school for the blind in Brantford, Ontario; 2,222 reported in private business colleges; 646 reported in private elementary and secondary schools (this figure, however, is only partial); 115 in preparatory courses in the proposition of the school for the deaf in Winnipeg and in the school for the blind in Brantford, Ontario; 2,222 reported in private business colleges; 646 reported in private elementary and secondary schools (this figure, however, is only partial); 115 in preparatory courses in the school for the blind in Brantford, Ontario; 2,222 reported in private business colleges; 646 reported in private elementary and secondary schools (this figure, however, is only partial); 115 in preparatory courses in the school for the blind in Brantford, Ontario; 2,222 reported in private business colleges; 646 reported in private elementary and secondary schools (this figure, however, is only partial); 115 in preparatory courses in the school for the blind in Brantford (this figure, however) and the school for the blind in Brantford (this figure, however) and the school for the blind in Brantford (this figure, however) and the school for the blind in Brantford (this figure, however) and the school for the blind in Brantford (this figure, however) and the school for the blind in Brantford (this figure, however) and the school for the blind in Brantford (this figure, however) and the school for the blind in Brantford (this figure, however) and the school figure, however, is only partial (this figure, however). colleges; 1,821 in short, special and correspondence courses in university and colleges (exclusive of a considerable number which may also be included with regular students); 420 in regular courses in colleges and 2,118 in regular courses in the university. One college and some private schools did not report so that the total given is probably short by a small percentage.

The accommodation for this enrolment was 1,995 elementary and secondary school buildings with 3,956 departments and 4,067 teachers; day vocational schools in 3 municipalities and evening in 1 municipality with 251 day and 46 evening teachers; 1 school for the deaf in Winnipeg, the blind pupils being sent to Brantford, Ontario, by interprovincial arrangement; 1 industrial school for delinquents at Portage La Prairie; 4 normal schools; 1 provincial university; 5 colleges besides private schools and Indian schools. For greater details see Table 2.

Public Elementary and Secondary Schools.—Enrolment.—The enrolment of 148,279 showed an increase of 2,445 over that of the previous year. The accommodation as measured by the number of departments increased by 44.

Average Daily Attendance.—The number of pupils in average daily attendance was 106,809, an increase of 2,497 over that of the previous year. The per cent of enrolment in average attendance was 72.03. While the total enrolment increased by only 2,445 since last year the number of pupils attending more than 150 days increased by 3,980, those attending less than 100 days meanwhile decreasing by 2,187. Progress in this respect is more easily seen if we compare 1926 with, say, 1920. The enrolment since then has increased by 24,827 while the pupils attending more than 150 days have increased by 37,479 and those attending less than 100 days have decreased by 11,341. The enrolment today as compared with even a few years ago shows that enrolment is growing in significance as well as in size. A decrease in pupils attending less than 100 days or about 5 months with increase in those attending more than 150 days or about 8 months is one of the best evidences of a decrease in retardation. How this is reflected in the standing of pupils at a certain age, say the age of 13, can be seen by comparing the distribution by grade at this age in 1926 with that at the same age in 1921. There is a certain degree of incomparability between the data of the two years owing to the fact that a considerable portion of the data of 1921 was reported after midsummer promotion had taken place, but even with this handicap in favour of 1921, there is evidence of decided improvement. It is noticeable that this improvement occurred around the average grade and diminishes as the grades recede

on either side of this average, disappearing at the upper extreme especially. This is what might be expected as a result of improved regularity of attendance. The most advanced pupils were probably always regular while there is apt to be a residue at the other extreme who are incapable of improvement. To the latter may be added those who begin school late, and those who begin school in the spring and consequently have had no time for promotion before the end of the school year. Without the incomparable portion the data were as follows:—Number per 10,000 at the age of 13 in each grade:—

| Grade | 1921                                                                              | 1926                                                                      | Difference                                                                                        |
|-------|-----------------------------------------------------------------------------------|---------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| I     | 140<br>240<br>620<br>1,260<br>1,930<br>2,390<br>1,720<br>1,230<br>420<br>40<br>10 | 130<br>220<br>510<br>1,030<br>1,740<br>2,318<br>2,230<br>1,490<br>40<br>2 | $\begin{array}{c} -10 \\ -20 \\ -110 \\ -230 \\ -190 \\ -72 \\ 510 \\ 260 \\ -130 \\ \end{array}$ |

It will be seen from the above that a marked upward movement has taken place. The beautiful symmetry on each side of Grade VI of the distribution in 1921 is striking and its precise meaning is baffling.

Secondary Schools.—The number in secondary grades was 13,551 or 9.2 p.c. of the enrolment. As in former reports an analysis of the high school enrolment since 1918 is given below:-

| Year  | Actual    | Per cent                                              | Per cent of total |                  |
|-------|-----------|-------------------------------------------------------|-------------------|------------------|
|       | enrolment | total                                                 | high school       |                  |
|       | Grades    | enrolment                                             | enrolment in      |                  |
|       | IX-XII    | XII Grades<br>IX-XII                                  | Grades<br>X-XII   | Grades<br>XI-XII |
| 1918. | 6,579     | 5.98 $5.92$ $6.48$ $6.68$ $7.84$ $8.99$ $8.91$ $9.17$ | 53                | 22               |
| 1919. | 6,803     |                                                       | 49                | 19               |
| 1920. | 7,996     |                                                       | 52                | 22               |
| 1921. | 8,615     |                                                       | 49                | 20               |
| 1922. | 10,719    |                                                       | 53                | 21               |
| 1923. | 12,803    |                                                       | 54                | 23               |
| 1924. | 12,876    |                                                       | 57                | 25               |
| 1925. | 13,367    |                                                       | 56                | 26               |
| 1926. | 13,551    |                                                       | 56                | 27               |

The upward trend in the proportion of the high school enrolment formed by the two upper grades is seen to have continued unbroken since 1921. Increase in Grade XII was responsible for this continuity in 1926.

Teachers.—The number of teachers during the year was 4,067—849 male and 3,218 females. The proportion of third class as compared with first and second class teachers has fallen from 30 p.c. in 1918 to 19 p.c. in 1926 while the standard of third class has been raised in the meantime; the proportion of first class has increased from 13 p.c. in 1918 to 21 p.c. in 1926. The number of teachers' residences is now 336, an increase of 9 over the previous year.

Teachers-in-training.—The number of teachers-in-training was 636, of whom 86 were candidates for first class certificates and 47 were university graduates. In the Manitoba Teachers' Summer School under the joint auspices of the Department of Education and the University the enrolment was 648.

School Support.—The expenditure on education during the year was \$9,993,961 (\$8,805,105 exclusive of promissory notes). Of this \$1,091,151 was contributed by the government and \$4,914,086 was expended on teachers' salaries. The corresponding figures for the last year were total expenditure less promissory notes, \$8,547,445; government contribution, \$1,310,067; teachers' salaries, \$4,838,723.

#### SASKATCHEWAN

Summary of Attendance in All Schools.—During the school year 1925-26 the enrolment in all educational institutions in Saskatchewan was 237,229 distributed as follows: 213,404 in ordinary day schools under public control; 1,474 in technical day and evening schools; 1,655 in teachertraining schools; 1,892 in Indian schools; 68 in schools for the blind and deaf situated in Brantford, Ontario and Winnipeg, Manitoba; 442 reported in private business colleges; 2,712 in private elementary and secondary schools; 34 in preparatory courses in universities and colleges; 14,361 in short, special correspondence and extension courses of the university; 150 in regular courses in colleges and 1,037 in regular courses in the university.

Elementary and Secondary Schools.—The enrolment of 213,404 in these schools consisted of 122,973 in rural schools, 23,755 in city, 22,055 in town and 37,179 in village public and separate schools and 7,442 in collegiate institutes and high schools. For greater detail see Table 2.

Average Daily Attendance.—The average daily attendance in 1926 was 152,430 or about 71.5 p.c. of the enrolment. Progress in this respect during the last few years has been exceedingly rapid. In 1921 the per cent was about 63. A comparison of the attendance by 20 day periods in 1921 with that of 1926 is given as follows:—

|                           |         | Absolute numbers |       | enrolled |
|---------------------------|---------|------------------|-------|----------|

| ess than 20 days.         | 8,822   | 8,661            | 49    | 4        |
| 20- 39 days               | 11,343  | 12,682           | 64    | 6        |
| 40- 59 ""                 | 12,761  | 16,000           | 72    | 7        |
| 60-79 "                   | 14,906  | 10,033           | 84    | 4        |
| 30-99 "                   | 14,393  | 10,162           | 81    |          |
| 00-119 "                  | 18.046  | 10,758           | 101   |          |
| 20–139 "                  | 17,656  | 12,933           | 99    |          |
| 40–159 "                  | 19,411  | 19,996           | 109   | 1        |
| 60–179 "                  | 26,141  | 38,026           | 147   | 1'       |
|                           | 29,694  | 62,350           | 167   | 29       |
| 80-199 " 00 days and over | 4,735   | 11,281           | 27    | -        |
| otal thus classified      | 177,908 | 212,882          | 1,000 | 1,00     |

As in other provinces the general drift of the improvement seems to be a certain amount of constancy in the case of those attending for very short periods; a heavy-decrease in the proportion attending between 60 and 160 days and a corresponding increase in the proportion attending more than 160 days. Thus between 1921 and 1926 there was a decrease of about 180 per thousand of the total enrolment between 60 and 160 days and a corresponding increase in those attending more than this period.

A comparison will now be made as was made in the case of Ontario and Manitoba of the distribution by grade at a certain age—say 13—between the pupils of 1926 and those of an

earlier year—say 1921.

|       |                                                                                  | Number per 10,000 at the age of 1 each grade                                 |                                            |  |
|-------|----------------------------------------------------------------------------------|------------------------------------------------------------------------------|--------------------------------------------|--|
| Grade | 1921                                                                             | 1926                                                                         | Difference                                 |  |
| I     | 190<br>260<br>660<br>1,360<br>1,810<br>2,140<br>1,470<br>1,680<br>380<br>45<br>5 | 120<br>180<br>430<br>1,050<br>1,580<br>2,170<br>1,600<br>2,150<br>610<br>100 | - 70 - 80 -230 -310 -230 30 130 470 230 55 |  |

Of all the three provinces thus examined we find here the most unambiguous case of improvement in the period. The peak at Grade VIII is mainly compensatory to the depression in Grade VII. It will be seen that nearly 45 p.c. of the age are in Grade VII and over in 1926 as compared with about 36 p.c. in 1921. The data of 1921 are altogether on a higher level than the earlier year's.

Secondary Education.—The number in secondary grades has now reached 19,501. Including the technical day schools, private schools and Indian schools it has passed the 21,100 mark. This is well over 9 per cent of the total enrolment; in 1921 it was about 6 per cent. This remarkably increased high school enrolment is accommodated in high schools and collegiate institutes and in 420 continuation rooms in towns, villages and rural graded schools. These rooms had 12,143 pupils including 3,525 in Grade VIII. The technical schools and the private schools are in addition to these.

Technical Education.—Day technical education was carried on in 4, and evening in 3, municipalities with 41 day and 28 evening teachers and 826 day and 648 evening pupils. Agricultural education is carried on extensively. The large numbers in extension courses of the university may be seen in Table I and in the sections on higher education.

Rural Schools.—Details of the attendance in rural as compared with other schools may be seen in Table 2. In order to provide educational facilities for families living in frontier settle-

ments the Department opened "The Outpost Correspondence School" early in February, 1925. The various courses cover the work of the eight elementary school grades. Since this school deals with isolated cases a large enrolment cannot be expected, but the number taking advantage of the course increased from 7 in February to 100 in December from 56 homes. These figures may not convey much to one unacquainted with pioneering conditions, but to persons who have passed through them and seen the vast areas that may be covered by 56 homes and the villages and towns and the hundreds and even thousands of people afterwards occupying these areas, these figures are highly significant.

School Support.—The expenditure on public and separate schools was \$14,290,836, and on secondary schools \$690,247. These amounts included \$6,828,428 in teachers' salaries in public and separate and \$459,630 in secondary schools.

#### **ALBERTA**

Summary of all Educational Institutions.—During the school year 1925-26 the enrolment in all educational institutions in Alberta was 160,976 as compared with 158,063 in the previous year. These were distributed as follows: 148,245 in publicly controlled elementary and high schools; 4,178 in day and evening technical schools; 739 in teacher-training; 1,283 in Indian schools; 46 in schools for the deaf and blind situated in other provinces; 2,739 in private business colleges; 2,281 in private elementary and secondary schools; 44 in preparatory courses in colleges; 203 in short special and correspondence courses in university and colleges; 167 in regular courses in colleges and 1,051 in regular courses in the university.

Publicly Controlled Elementary and Secondary Schools.—The 148,245 in these schools were accommodated in 3,041 schools including 66 city and town, 251 village and 2,724 rural schools, the number of departments in operation being 4,803, an increase of 44 departments over the previous year and from 628 departments in 1903.

Average Daily Attendance.—The average daily attendance in these schools was 110,928 or 72·7 p.c. of the enrolment. The comparative figures for pupils attending by 20 day periods in 1926 and 1922 are as follows:—

| Number per 1,000 of the enrolment attending |       | 1926  |
|---------------------------------------------|-------|-------|
| ss than 20 days                             | 39    |       |
| ⊢ 39 days                                   | 69    | Ì     |
| - 59 · · · · · · · · · · · · · · · · · ·    | 72    | ě     |
| F 79 "                                      |       | 2     |
| - 99 "                                      | 1     | 2     |
|                                             | 71    |       |
| - <del>1</del> 39 "                         | 75    |       |
| -159 "                                      | 104   | 1     |
| 180 (4                                      | 170   |       |

| days and over                               | 21    |       |
|                                             | 1,000 | 1.000 |

As in the case of Saskatchewan, notice a decrease up to 160 days and a decided increase after. As in the case of Ontario, Manitoba and Saskatchewan a comparison will now be made of the distribution by grade at a certain age—say 13—as follows:—

| Grade | Number per 10,000 at the age of 13 years in each grade                                   |                                                                               |                                                                       |                                                                                      |  |  |
|-------|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|-----------------------------------------------------------------------|--------------------------------------------------------------------------------------|--|--|
| Grade | 1922                                                                                     | 1926                                                                          | Difference                                                            | Quetelet's<br>numbers                                                                |  |  |
| I     | 160<br>215<br>580<br>1,042<br>1,660<br>2,480<br>2,275<br>1,350<br>250<br>35<br>35<br>3 - | 56<br>114<br>388<br>765<br>1,551<br>2,226<br>2,667<br>1,839<br>348<br>45<br>1 | -104<br>-101<br>-192<br>-277<br>-109<br>-204<br>489<br>98<br>10<br>-2 | .2<br>5.<br>63.<br>432.<br>1,553.<br>2,946.<br>2,946.<br>1,553.<br>432.<br>63.<br>5. |  |  |

As in the case of Saskatchewan the difference is free from ambiguity and shows definite and striking improvement. In this case it seemed interesting to place in juxtaposition the distribution of 10,000 persons according to Quetelet's numbers, his eighty ranks on each side of the average

being reduced to six each placed opposite a grade. This is in line with Galton's idea of the proportion that would be found in each of these ranks on the basis of ability. It must be remembered that the distribution by grade at any age depends upon other factors as well as ability, even if we extend the meaning of ability to include health, powers of application and character as well as native intelligence. Pupils beginning school late are not so far advanced as they would have been if they had begun earlier. As to regularity of attendance except in so far as it is the product of improved opportunities, it is a question whether it is not so intimately associated with ability that it need not be considered separately. The correspondence between Alberta's figures in 1926 and Quetelet's numbers is very striking, especially from Grade V to IX. The result of combining Grade VII and VIII seen in this juxtaposition would be lost sight of without it; i.e. Grade VIII is larger than expectations and evidently draws from both Grade IX and Grade VII. The latter would seem to be a good feature inasmuch as they are the brighter pupils who are so advanced; the former is probably due more to lack of high school accommodation than to any artificial retardation. A very little readjustment of Grade VIII would give a perfect correspondence between the upper part of the distribution and Quetelet's numbers.

The increase in the upper grades as compared with the lower since 1912, the year in which

the grade system was introduced may be seen as follows:-

P.C. OF TOTAL ENROLMENT

| Year                       | Grade I                                                                                                  | Grades<br>IX to XII                                                                                          | Grade<br>VII to XII                                                                                          |
|----------------------------|----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|

The distribution by grade of pupils leaving school at the age of 15 years since 1919 was as follows:—

|                                                                      | Grades                                                       |                                                              |                                                                                                                                             |                                                                                             |                                                               |                                                                    |                                                                                   |

| Year                                                                 | VIII                                                                 | IX                                                                | X                                                             | XI                                                           | XII                                                          | Total                                                |
| 1919.<br>1920.<br>1921.<br>1922.<br>1923.<br>1924.<br>1925.<br>1926. | 26·60<br>29·98<br>33·55<br>29·79<br>28·50<br>32·87<br>34·94<br>34·69 | 8·40<br>12·14<br>6·65<br>6·59<br>11·90<br>14·48<br>12·60<br>15·20 | 3·10<br>5·92<br>1·47<br>2·34<br>4·59<br>7·36<br>7·19<br>10·53 | 2·00<br>3·41<br>0·24<br>0·81<br>2·18<br>2·47<br>2·84<br>1·46 | 0·40<br>2·80<br>0·00<br>0·02<br>0·40<br>0·07<br>0·10<br>0·26 | 100<br>100<br>100<br>100<br>100<br>100<br>100<br>100 |

We notice that 1926 showed the smallest proportion leaving at Grades I to IV of any year and the largest at Grades IX and X. Grades V to VIII and XI to XII are difficult to interpret. The elimination of those leaving school below Grade V is particularly striking; there were about 12 p.c. in 1919 and only about  $3\frac{1}{2}$  p.c. in 1926.

Secondary Education.—The number in high school grades was 14,453. The number in the previous year was 14,713 so that there was a slight decrease in 1926. There was also a slightly smaller proportion over the age of 15 years in 1926 than in 1925. The distribution of the high school pupils by grade from 1924 to 1926 was as follows:—

|     | 1924   | 1925                                                       | 1926 |
|-----|--------|------------------------------------------------------------|------|
| IX  | 43 · 8 | $\begin{array}{c} 47.8 \\ 26.2 \\ 20.1 \\ 5.9 \end{array}$ | 45·1 |
| X   | 30 · 4 |                                                            | 30·9 |
| XI  | 19 · 4 |                                                            | 17·1 |
| XII | 6 · 4  |                                                            | 6·9  |

Teachers.—The number of teachers in elementary and high schools was 5,135—1,453 male and 3,682 female. By class of certificate the distribution was 1,537 first; 3,306 second; 188 third, 38 permit; 24 pending and 42 special. The numbers with third class permit and pending (i.e. certificates from other provinces to be made permanent after trial) are decreasing fast. In 1921 for example there were 1,508 of these, or nearly 30 p.c. of the total—in 1926 there were only 250 or less than 5 p.c. of the total.

Teachers-in-training.—See Table 121.

Technical Education.—Day vocational schools were conducted in 3 municipalities with 82 teachers and 1,902 pupils; evening in 6 municipalities with 74 teachers and 2,122 pupils. There were also 154 pupils in correspondence courses.

School Support.—The total disbursements during the year were \$10,826,790 of which \$8,764,479 was the actual cost of operation. This was \$59.12 per pupil enrolled and \$80.49 per pupil in average attendance, a decrease from the per pupil cost of last year. For details, see Section 11.

#### BRITISH COLUMBIA

Summary of Enrolment in all Educational Institutions.—During the school year 1925-26 the enrolment in all educational institutions was 118,744 as compared with 115,618 in 1925. This enrolment was distributed as follows: 101,688 in publicly controlled elementary and high schools; 8,879 in day and evening technical schools; 849 in teacher-training; 2,852 in Indian schools; 79 in the school for the deaf and blind; 1,153 reported in private business colleges; 1,092 reported in private elementary and high schools; 521 in short, special and correspondence courses in colleges and university; 168 in regular courses in colleges, and 1,463 in regular courses in the university.

Publicly Controlled Elementary and High Schools.—The 101,688 in these schools were distributed as follows: 8,077 in high schools in cities; 3,304 in high schools in rural municipalities; 398 in high schools in rural districts; 41,684 in elementary schools in cities; 28,678 in elementary schools in rural municipalities; and 19,547 in elementary schools in rural districts. Increases since last year were especially noticeable in elementary and high schools in rural municipalities.

Average Daily Attendance.—The average daily attendance was 85,293 or 83·9 p.c. of the enrolment, a slight decrease from the record mark of  $84\cdot 5$  in 1925.

Teachers.—The number of teachers in these schools was 3,225 grade teachers and 171 special instructors or a total of 3,396, distributed as follows: 266 in city high schools; 114 in rural municipality high schools; 21 in high schools in rural districts; 1,189 in city elementary; 889 in rural municipality elementary; and 917 in rural elementary. By sex there were 866 male and 2,530 females. By class of certificate there were 548 academic, 887 first class, 1,603 second class, 158 third class, 29 temporary and 171 special. An increase of 13 academic, 97 first class and 6 second class, and a decrease of 29 third class continued the trend mentioned in former reports. Analysis of the changes in teachers' classifications within the last decade shows that increase in first class certificates were especially marked the year 1926 from 1925; the decrease in third class being the steady element of the trend. Last year it was remarked that the increase in second class at the expense of all others during the decade was most marked.

Teachers-in-Training.—For statistics of teachers-in-training in the normal schools see Section 10 of this report. The seventh session of the summer school of the University of British Columbia had an enrolment of 441 students, 347 writing off the final examinations. Instruction in the third year of arts course was given for the first time by the summer session. Teachers are thus enabled to obtain degrees eventually. Teacher-training for commercial work is also taken at the summer courses. The provincial summer school had an enrolment of 346 teachers. A demonstration school of five classes is used in connection.

Agricultural and Technical Schools.—The enrolment in the two-year course in agriculture in high schools in the province was 566. Day technical education was carried out in 14 municipalities with 136 teachers and 2,667 pupils; evening in 37 municipalities with 229 teachers and 6,017 pupils. Correspondence courses were taken by 195 pupils under a staff of 2 teachers. Vocational teacher-training was offered in 2 schools to 50 students.

School Support.—The expenditure on education during the year was \$8,311,629, including \$516,241 grant to the university. The amount contributed by the Government was \$3,216,209 including said grant to university, also industrial education, normal schools, etc. The amount paid in teachers' salaries was \$4,857,115.

#### CHAPTER III.—MISCELLANEOUS NON-PROVINCIAL ACTIVITIES

Division of Child Welfare Dominion Department of Health.—A Department of Health was created by an Act of the Dominion Parliament in 1919. A deputy minister and an assistant deputy minister were appointed in September of the same year and medical services formerly under the direction of other departments were transferred to the New Department of Health, each service becoming a division of the new ministry under a chief. Certain new divisions were also created, the first of which was the Division of Child Welfare organized in 1920. In accordance with the letter and spirit of the whole Act which strictly recognizes the autonomy of the provinces in matters pertaining to public health, the plan of work and general policy of the division of Child Welfare is co-operation with all provincial authorities carrying on child welfare work and with all voluntary organizations carrying on or interested in this work. A direct channel for such co-operation and inter-communication is offered by the Dominion Council of Health also created by the aforementioned Act. The aim of such co-operation is to assist workers to obtain the best results and to secure general unity of purpose and harmony of method so far as these can be applied. Of special bearing on education is the plan to co-operate with ministers and departments of education in reference to the promotion of school hygiene, medical and dental inspection of schools, provision of school nurses, the special care and training of children needing special care and the instruction of teachers in normal schools on principles and methods of child welfare. Among other subjects receiving the attention of this Division are the following: pre-natal care, the pre-school child, children's courts, diseases of childhood, education and illiteracy, immigrant child welfare, morals and manners, nutrition and feeding, recreation, and women and children in industry. The first publication was the Canadian Mother's Series; The Home Series; and the Household Series (Chief of the Division, Dr. Helen

Technical Education, Branch of the Department of Labour.—This Branch administers the Technical Education Act under the terms of which the sum of \$10,000,000 was made available for the payment of grants to the provincial governments for the purpose of promoting technical education in Canada during a ten-year period. The amount set aside each year varies from \$700,000 in 1919 to \$1,100,000 in 1924 and remains fixed at this amount until the expiration of the Act in 1929. The yearly appropriations are allotted to the provinces by setting aside \$10,000 for each province and dividing the remainder in proportion to population. Grants amounting to one-half of the approved expenditures by the provincial governments are paid quarterly; thus the Dominion Government shares equally with each provincial government expenditures on secondary vocational education. Unearned amounts, to the extent of one-quarter of the annual appropriation to each province, are carried forward for use during any one or more of the succeeding years.

Ontario is the only province which annually earns more money than can be paid under the terms of the Act. Alberta's expenditures exceeded the amounts paid from federal funds during the two years 1921 and 1922 but this province now has an accumulated surplus. Quebec is the only other province which has in any year earned more than the amount allotted to the province from the total annual appropriation but the unearned amounts carried forward from previous years were more than sufficient to cover the extra expenditures by the provincial govern-

ment.

The total amount paid to the provinces during the seven year period ending March 31st, 1926, was \$4,798,944.10 of which \$944,336.69 was earned in the last year. The number of municipalities conducting day classes has increased from 32 in 1919 to 72 in 1926. The centres in which evening classes are conducted now number 166, an increase of 69. The total enrolment in all vocational classes during the school year ended June 30th, 1926, was 88,961, which represents an increase of 28,413 in seven years. The most important developments have been in connection with day vocational schools in which the enrolment has increased from 8,512 to 29,010, a growth of 241 p.c.

The work assisted includes pre-vocational or junior high school courses, technical, industrial, commercial, home-making and applied art courses in secondary schools, part-time and continuation classes for apprentices and employed adolescents, short-term courses for adult workers, evening classes for adults and correspondence instruction for workers in isolated districts. Agricultural education is not included because it was provided for under a separate Act which expired

in March, 1924. (Director—A. W. Crawford, Department of Labour, Ottawa.)

Indian Education.—During the year ended March 31, 1926, there were in operation a total of 344 Indian schools, of which 254 were day schools, 74 residential, and 16 combined public and Indian. The total enrolment for the year was 14,782 pupils, of whom 7,318 were boys and 7,464 were girls, being an increase of 560 over 1925. The enrolment was distributed as follows: Day Schools, 8,242; Residential Schools, 6,327; and Combined, 213. The average attendance was 10,598, or an increase of 719 over the preceding year. In addition, there were about 130 Indian children receiving secondary education in high schools and private institutions throughout

the Dominion. The 74 Indian residential schools in operation were conducted under the following auspices: Roman Catholic, 40; Church of England, 20; Methodist, 7; and Presbyterian, 7. The expenditure for Indian Education from Parliamentary Appropriation for the fiscal year ended March 31, 1926, was \$1,918,441. In addition to this, various bands of Indians contributed \$66,901 towards the payment of teachers' salaries, etc. (Superintendent, Russell T. Ferrier, M.A., Department of Indian Affairs.)

The Boy Scout Movement in Canada.—The Boy Scout Movement originated in England in the fall of 1907, and was incorporated by Royal Charter in 1910. It found a foothold in Canada almost as soon as Sir Robert Baden-Powell had finished his book "Scouting for Boys" in 1907. It was incorporated in Canada by an Act of Parliament in 1914, and at the end of that year there were fourteen thousand Scouts in Canada. Since then the numbers have increased rapidly and to-day there are in Canada over forty thousand Boy Scouts and Wolf Clubs.

and to-day there are in Canada over forty thousand Boy Scouts and Wolf Clubs.

The movement is organized in each Frovince under a Provincial Council with national headquarters at Ottawa. The Chief Scout for Canada is His Excellency the Governor-General. The chief executive officer in the movement is the Chief Commissioner for Canada, Dr. James W.

Robertson.

The essential features of the Scout system are the emphasis placed on the word honour, the responsibility of Scouts through their own Court of Honour, and the patrol system. The key activity is woodcraft and in all its aspects Scouting is supposed to be a game. The movement is inter-national and embraces all creeds and classes. (For statistics see Table 104. Chief Commissioner, Dr. J. W. Robertson, Ottawa.)

Canadian Association of Child Protection Officers.—At the close of the National Conference on Child Welfare in 1920, two or three provincial Superintendents of Neglected Children and one Juvenile Court Judge gathered together and discussed the possibility of forming a separate association from that of the general council on Child Welfare in order to direct more specialized attention to the questions of neglected, dependent and delinquent children. As a result of this discussion a group composed of Juvenile Court Judges, provincial Superintendents of Neglected Children, children's aid officials, and officials in charge of industrial schools, shelters, etc., met at the Parliament Buildings, Winnipeg, on October 5th, 6th and 7th, 1921, this being the first meeting of the Canadian Association of Child Protection Officers. The second annual meeting was held in Toronto in September, 1922; the third in Winnipeg, in September, 1923, the fourth in Toronto in June, 1924; the fifth in Ottawa, September, 1925; the sixth—a short business meeting only—in Ottawa, September, 1926, and the seventh in Vancouver in May, 1927. At present there are 52 members on the paid up roll. The next annual meeting will be at the same place and time chosen by the Canadian Council of Child Welfare, probably Winnipeg.

The objects of the Association as declared in its constitution are:-

First—The discussion of questions involved in the administration of laws relating to the protection and care of children.

Second—The securing of uniformity in these laws and in the methods of their administration

and enforcement so far as advisable.

Third—Co-operation between departments charged with the administration and enforcement of these laws, and with other agencies operating in the field of child welfare. (Secretary—Judge Ethel MacLachlan, Regina, Saskatchewan.)

Canadian Council on Child Welfare.—The Council originated in a large consultative conference called at Ottawa by the Federal Government in October, 1920, as a result of recommendations from practically every National Child Welfare Agency in the Dominion. At this, and a subsequent meeting in May, 1921, the constitution and aims of the Council were agreed upon. The purpose of the Council, as set forth in the constitution is to promote in co-operation with the Child Welfare Division of the Federal Department of Health, and other agencies, the general aims of the council: by annual deliberative meetings; by activities of subsections of memberships on Child Hygiene, Child Industry, Recreation and Education, the Child in Need of Special Care and the Spiritual and Ethical Development of the Child; by affording a connecting link between the Child Welfare Division of the Department of Health and the Council's Constituent bodies; and by such further developments of the general programme of Child Welfare as may be recommended from time to time by the executive or any sub-committee thereof.

The Council at present is composed of 21 national and 24 provincial and 48 municipal associations interested in child welfare effort, also of individual members. The executive consists of representatives of each of these constituent bodies. The governing council also includes the chairmen of the five subsections under which the work of the Council is carried on. Each of these sections advises on the particular problems within its field, provides the sectional programme of the annual conference and assumes responsibility for publications on its phases of the general

problem

The Council is supported by membership fees and by a grant from the Federal Government. Activities so far have included the Annual Conference; educational lectures by its officers; publication of articles in the popular press; and publications on various phases of the Child Welfare problem. Within the last year the Council has opened offices in Ottawa, resulting in a greatly increased volume of work. The most important of its new undertakings has been the establishment of a Dominion wide system of prenatal letters, and the publications of well children examination forms. A special survey on juvenile immigration is at present under way. A large general correspondence on Child Welfare propaganda is maintained and advisory research, statistical and legislative work in response to special request is also undertaken. (Secretary, Miss Charlotte Whitton, M.A., Plaza Building, Ottawa.)

Canadian Girl Guides.-The Girl Guide movement was founded by Sir Robert Baden-Powell, the Chief Scout, to afford an attractive scheme of work and play whereby girls should receive a special training in character and efficiency. The training tends in four main directions: (a) character and intelligence, (b) skill and technical knowledge, (c) service for others, and practices planned for the purpose. Development of the individuality of the girl is one of the essential points.

The movement is designed to help parents and teachers in their task of education for good citizenship. It is non-class, non-political and inter-denominational. A Guide on enrolment promises (1) to be loyal to God and the King, (2) to help others at all times, (3) to obey the Guide

Law.

The Guide Law is:—

1. A Guide's honour is to be trusted.

2. A Guide is loyal.

3. A Guide's duty is to be useful and to help others.

4. A Guide is a friend to all and a sister to every other Guide.

5. A Guide is courteous.

6. A Guide is a friend to animals.

7. A Guide obeys orders.

8. A Guide smiles and sings under difficulties.

9. A Guide is thrifty.

10. A Guide is clean in thought, word and deed.

Guides were first organized in Canada in 1910. The Canadian Council of the Girl Guides Association was formed in 1912, and incorporated by Dominion statute in 1917. The Chief Commissioner for Canada is Mrs. H. D. Warren of Toronto, and the Canadian Guide Head-quarters are at 22 College Street, Toronto.

The movement now has four distinct branches: Brownies for girls 8 to 11, Guides for girls 11 to 16, Rangers and Sea Guides for girls over 16. In December, 1926, there were 597 Guide Companies, 251 Brownie Packs, 35 Ranger Companies, 6 Sea Guide Companies, 5 Lone Guide Companies, 3 Cadet Companies, active in Canada. Each Company or Pack manages its own funds but makes no contribution to Headquarters. The Canadian Council Girl Guides Association receives a grant from the Dominion Government. For statistics see Table 103.

The Canadian Red Cross Society.—The Canadian Red Cross Society has developed a peace-time service to the people of Canada in accordance with article XXV of the Covenant of the

League of Nations to which Canada agreed at the Peace Conference:-

1. The first duty of the Red Cross, acting as an auxiliary to the Government is to render

help and comfort for sick and disabled ex-service men.

2. In the Junior Red Cross more than 137,000 Canadian school children in 5,421 Junior Branches are banded together to play the health game; to render helpful service to others less fortunate than themselves; and to become good citizens. The organization and activities of the Junior Red Cross are dealt with in a separate report in this volume.

3. Public Health Nurses relieve suffering and by health teaching carry on an important part of the Nation's health service. The Red Cross has promoted their training for public health

service and fosters their employment.

4. Red Cross Nursing Outposts bring nursing service within the reach of the families widely separated on the edges of pioneer settlement. There are 39 outposts, chiefly in the Prairie Provinces and Northern Ontario. A nursing outpost, as conducted by the Red Cross, soon becomes a health centre for the district in which it is established, and particularly in emergency and maternity cases it may perform the functions of a hospital. From it the nurse (or nurses) visits the homes, and, where necessary, the schools of the surrounding district and in this way is in a position to give advice on general matters of health.

5. Classes in home Nursing have brought to over 11,000 women a knowledge of simple nursing care, of home hygiene and healthy living that the families may "keep well." The Red Cross course provides 12 periods of instruction and demonstration of about two hours each. The lessons are usually taken about one week apart. Many of the Home Nursing Classes are organized through local Red Cross Branches and others through co-operating organizations such as Women's Institutes, I.O.D.E., Y.W.C.A., Women's organizations in churches and other groups. The teachers of Home Nursing Classes are usually trained nurses not actively engaged in their profession. Such nurses have rendered excellent community service at the call of the Red Cross.

6. Red Cross Seaport Nurseries for immigrant mothers and their children are conducted by the Society in the Dominion Immigration buildings at Quebec, Halifax, and Saint John, in co-operation with the Department of Immigration and Colonization. This Department has

expressed the following appreciation of this work of the Red Cross:-

"This welfare work of the Red Cross does not stop at the port. The trained nurse in charge has a quiet conversation with the mothers regarding their children, and finds out from them whether they wish a visit from a public health nurse. This information is forwarded by whoever is in charge at each port to the Red Cross Head Office in Toronto and from there distributed to the various centres, where arrangements are made for a representative of the Red Cross, or some other organization to visit the family. The nurseries are always open to both British and foreign families. A cup of tea is given to the tired mothers, and milk and biscuits to the children.

"The equipment and space is provided by the Department of Immigration, but the credit of the work is entirely due to the Red Cross Society. It is indeed difficult to estimate the value of the work which is done by this organization. Tired mothers are able to leave their little flock in the nursery while they attend to their luggage and other business.

"On all sides one hears nothing but praise of this work done for women and children at our

ports."

During the past six years the three nurseries have cared for over 84,000 infants and children

with follow-up work for nearly 18,000 families.

7. The Society publishes two monthly magazines, one for seniors the other for junior members. The purpose of these magazines and of the educational leaflest issued by the Society is to The Society publishes two monthly magazines, one for seniors the other for junior mempresent reliable health information in a simple manner understandable to the average reader.

8. Disaster relief preparedness consists of a skeleton organization which can be amplified in case of civil disaster. The Society has an agreement with the Department of National Defence by which, in case of disaster, tents, blankets, field kitchens, oil stoves and other necessary supplies may be issued from military stores. Disaster relief has been required in forest fires in British Columbia, Ontario and the Maritime Provinces and in crop failure districts of the Prairie Provinces

One broad effect of all the general educational work of the Society is the gradual formation of a public sentiment in favour of public health measures, thus making it easier for the Governments to apply legislation for the betterment of the health of the people. The work which the Red Cross Society has done, or has made it possible for others to do, has helped the various provinces of Canada to make great progress in the Public Health work since the Armistice. (Chief Commissioner—Lieut.-Col. James L. Biggar, Toronto.)

The Canadian School Trustees' Association.—This Association was organized in Toronto at the annual convention of the Ontario School Trustees' and Ratepayers' Association of 1923.

There were fraternal delegates from most of the other Provincial Organizations.

The purpose of the provincial organization is to develop a more intelligent interest in the function and value of the school as the greatest agency in democracy for training the future generations for life and citizenship. These provincial organizations endeavour to attain this objective by means of provincial, county and township conferences. There are organizations in nearly all the counties of Ontario and in quite a few townships. The Associations of Manitoba and Saskatchewan are adding yearly to their list of municipal organizations.

The Canadian School Board Journal was started in January, 1922, as the Ontario School Board Journal, being the official organ of the Ontario Association. In the succeeding year, it was endorsed by the other provincial organizations and in July, 1923, the magazine was enlarged and assumed the name of The Canadian School Board Journal. It is still the property and official organ of the Ontario Association but is subscribed for by members of the other provincial

The Journal now has a circulation of 6,500 copies per month. Its circulation is chiefly among members of School Boards both rural and urban. It tries to give its readers the information they require in the administration of their schools. It is a fairly well established fact today that the weaker side of our school system is the administrative. Our teachers are certified by the Department of Education, supervised in their work by inspectors, stimulated to further study by institutes and provided with summer courses for post graduate studies. On the other hand, it is seldom that members of boards of education—particularly in rural areas—come to-gether in conference either by townships or counties to exchange views upon educational matters, or become better informed upon the science of school administration. These provincial and Dominion wide Associations are hoping, therefore, through conferences and the Canadian School Board Journal, to create a more intelligent public opinion regarding the training of youth. They believe the Public School can be made a more potent agent in fitting the youth for prosperous and happy country life. They also believe that education, particularly such as trains for the responsibility and privileges of citizenship, is vital to the success of democracy. (Secretary-Treasurer, W. M. Morris, 1104 Bay St., Toronto.)

Manitoba School Trustees' Association.—Organized 1906, having held its 20th Annual Convention in Winnipeg in 1926. Secretary, Robert Love, Melita, Manitoba.

Alberta School Trustees' Association.—Secretary, Mrs. A. H. Rogers, Ft. Saskatchewan, Alberta.

Saskatchewan School Trustees' Association.—Secretary, J. H. Cunningham, Regina, Sask.

Ontario School Trustees' Association.—Organized 1887, having held its 40th annual Convention in Toronto, April, 1927. President: Samuel Farmer, Port Perry, Ontario; Secretary-Treasurer, W. M. Morris, Toronto, Ontario.

Junior Red Cross in Canada—1926 Report.—"Junior Red Cross began in Canada early in the Great War. As a war-time movement, it had one aim only—that of extending to children and young people the privilege of participating in the humanitarian work of the Red Cross. So whole-hearted was the response of the young people of Canada to this appeal, that those who were closely in touch with the movement began to realize the vast potentialities of the forces which were being expressed through Junior Red Cross. At the close of the war, when steps were being taken to form the League of Red Cross Societies to carry on a peace-time program, Sir Richard Lake, our Canadian representative at the first League Conference in Geneva, spoke

49071-c

strongly in favour of continuing the Junior Red Cross as part of the peace-time policy. There was unanimous approval of this idea, and many countries which did not have a Junior section

during the war, proceeded to organize then.

Junior Red Cross is now established in 38 countries with a membership of 9,600,000 children and young people. In Canada it is organized in each of the nine provinces with the endorsation of the provincial departments of education. Over 5,000 teachers in Canada have adopted it in their classrooms and the membership is now 137,494. (See statistics on Page 74.)

The Junior Red Cross has three distinct aims:-

The promotion of good health.

(b) The promotion of service one for the other. (c) The promotion of good citizenship and international friendliness.

The class-room is the unit of organization and the teacher is the local director. It is entirely voluntary both on the part of the teacher and of the children who become members. of the Junior Red Cross are carried into effect by the children themselves through their own duly elected officers and conveners of committees, and with a minimum of guidance from the teacher-

Junior Red Cross in the field of health does not in any way attempt to supplant the valuable work already being done in Canadian schools by the constituted authorities but rather to make the instruction given effective by providing a stimulating motive. Because Junior Red Cross belongs to the children—they appoint their own officers and conveners of committees, and their meetings are conducted according to correct procedure—and because there stand behind the members the traditions and ideals of unselfish service of the Red Cross, and because they are linked up not only with a great national but also a great international organization, because they are working together in a real co-operative undertaking, chiefly, perhaps, because this movement appeals to the spiritual forces latent in all children, there comes to the child a strong desire to put

into practice the program for which the Junior Red Cross stands.

Junior Red Cross does not bring into the schools any new principles or methods of education, but it does open up practical channels of applying theories. The desirability of unselfish service one for the other is no new thing, but children are learning this great ethical principle in Junior Red Cross through actual practice. In Canada, we are concentrating on our 'Crippled Children's Fund' which is maintained by contributions either earned or saved by the Juniors. By this means, we have been able to have treated during the last four years approximately 5,000 children mostly from rural and small town communities who otherwise would not have received treatment. The effect of this on the children treated is readily seen, but equally important is the effect on the children who are learning early in life the responsibility and joy of unselfish service for others.

Junior Red Cross seems also to be adapted to giving children a practical grasp of the ideals of good citizenship. The members of the Junior Red Cross learn how to protect their own health and that of others; they learn the habit of public service; they learn how to conduct meetings according to correct procedure; they learn how to speak in public; they learn the principle of selecting their own leaders; they learn resourcefulness in raising funds and good business methods and public honesty in the handling of these funds.

Through their interschool correspondence and their national Junior Red Cross magazines the members of the Junior Red Cross in any country are linked up with the members in other parts of their own country and with the great world-wide membership. To quote from Sir Phillip Gibbs:—"The front door of any little school which has membership in the Junior Red Cross opens to the wide world, and the spirit of the school is directly in touch with the children of many countries."

The question so frequently asked is—'Is Junior Red Cross another burden for teachers It does take time to explain the objects of the organwho are already working to capacity?" ization, to explain Parliamentary procedure and to help with the election of officers in order to get the children started. But there comes a time when all this comes back to the teacher with compound interest, chiefly because the children become responsible themselves for many things

for which the teacher had to be responsible.

A medical inspector told with amazement about a boy in one of his schools who as far as any one could see observed none of the health rules. The teacher, the school nurse, the medical inspector himself, all struggled with him, particularly in regard to personal cleanliness, but all to no avail. Finally, Junior Red Cross was organized in that class, and the teacher, who must have been a wise and subtle person, put it into the heads of the pupils to elect this boy as convener of the cleanliness committee. The result was astonishing beyond all expectations. Not only did he appear at school spick and span himself, but he was a terror to the others in the discharge of his official duties.

A teacher speaking in a Teachers' Institute said that in addition to the change in cleanliness, and health habits since she had organized the Junior Red Cross in her class-room, she had observed that the children were more considerate to each other and certainly more considerate to their teacher. Another teacher said: 'I would never commence another school term without the Junior Red Cross. Besides being the best means of promoting health and teaching civics, it stimulates efforts in all subjects and is a great aid to discipline because the children learn to

govern themselves.

In the abundance of good things that are being done for children to-day by governmental and municipal agencies, and by various voluntary organizations, Junior Red Cross stands out as the means through which the children themselves are actively promoting their own cause. As Professor Cizech, the famous Austrian artist says: 'Children are people and have their own

ideas and their own ways of expressing them'." (Director: Miss Jean E. Brown, 410 Sherbourne Street, Toronto).

The League of the Empire.—The League of the Empire was founded in London, England, in 1901, Lord Strathcona being its first President.

Shortly afterwards a branch was formed in Toronto, Ontario, with Principal Hutton of

University College as its Chairman.

The fundamental aim of the League is to bring the overseas Dominions more closely in touch with the Motherland and with each other, and to promote better understanding among all parts of the Empire by means of educational co-operation.

The League has from the first made a special effort to unite the schools of the Empire in management and in methods. In order to attain these objects the following courses have been

followed:-

1. Representative Gatherings.—Three conferences of delegates from all over the world have met in London to consider every phase of educational progress. The fourth Conference took place in Toronto, in August, 1921, at the invitation of the Ontario Government and with the Honourable the Minister of Education as Chairman. This gathering was a great success. Over 400 delegates were present from all parts of the world. The fifth Conference, held in London in 1924, was attended by many Canadians. This year another Conference is being held in Paris and a party of Canadians is to attend it.

2. Comrades' Correspondence.—Through this branch teachers and pupils from all parts of

the Empire are introduced to each other by correspondence. In the last few years thousands of Ontario children have made friendships all over the world in this way.

3. Exchange of Teachers.—This department of the work began in the Head Office in England in 1907, and through its efforts teachers and inspectors have been exchanged, except during the war, every year since. In the year 1925 the League had fifteen exchange teachers in Ontario, six in Quebec, two in Nova Scotia, eight in British Columbia, ten in Alberta and eight in Manitoba. This scheme has so proved its usefulness that the different departments of education have now undertaken this work themselves, but a large share of useful work in the way of introductions, information, arrangements for lodging, etc., will always remain to be done.

In the Provinces where there is a branch of the League monthly meetings, partly social and partly educational, are held and the overseas teachers are given the opportunity of hearing addresses by prominent Canadian speakers on different phases of Canadian life. Trips are arranged to places of interest and everything possible is done to acquaint them with the spirit

4. Travel Tours.—In 1925 a party of English teachers travelled across Canada to the Pacific Coast; another party is expected this year. Three parties of Canadians are to tour Europe this year and it is hoped that both these tours may be an annual event. (Secretary for Canada -Mrs. H. S. Strathy, 8 Earl Street, Toronto.)

The Ontario Federation of Home and School Associations.—The Home and School movement in Ontario was founded by the late Mrs. A. C. Courtice in Toronto, in March, 1916, and in the province in 1919, in the faith that education needs the active co-operation of parents and teachers, of home and school. The reception of this idea and the growth of the movement have more than justified the vision of its founder. It is an organization of men and women, its ideal executive committee being composed of an equal number of men and women. The Annual Convention is held Easter week in connection with the O.E.A. of which it is a section.

There are now some 300 associations in Ontario, gathered in Councils in cities and towns, and operating as individual associations or clubs where there is only one or a small number of clubs in the vicinity. In the larger cities, the Councils have in affiliation from five to thirtyfive clubs, each carrying on its work in its own school and meeting in a general session monthly or every two months for inspiration and information on special phases of their educational work. There is an increasing demand for the organization in rural schools, the rural clubs now numbering

about fifty.

The Objects of the organization, as expressed in the Constitution, are:—

"To promote co-operation between teachers, parents and school trustees; to get the largest possible returns to the community from the school for old and young alike; to support all progressive measures of the Local Board of Education and of the Provincial Department of Education in regard to school improvement; to inquire into educational problems, and in every way possible to create the best conditions for the training of boys and girls into good Canadian citizens. Any person who sympathizes with the object of the Association shall be eligible for membership.

The organization is of as great value in high schools and collegiate institutes as in the elementary schools, some of our cities scoring a hundred per cent in organization by having a Home and

School organization in every elementary and secondary school.

While the early efforts of the majority of associations are given to the supplying of material needs of the school, such as pianos, gramophones, flags, dishes, gasplates, playground equipment, hot noon lunches, the supplying of these needs has led on to the providing of pictures and libraries and other intellectual aids, and to the formation of study groups.

The Federation's interests are presented to its members in the Ontario Home and School Review, an 8 page publication issued quarterly, and to the general public in the "Canadian Child,"

and other publications.

The endeavour to create public sentiment in favour of new and improved methods and measures being adopted, is meeting with reasonable success. There is a gratifying increase in the numbers of school principals and school trustees who ask for aid in getting the parents to

take a greater interest in their children's progress in school.

While there are Home and School or Parents' Associations scattered throughout almost every portion of Canada, the only provinces systematically organized are Ontario and British Columbia. The British Columbia Parent-Teacher Federation was organized about four years ago, and now numbers about one hundred associations. (The President is Mrs. J. E. Jamieson, New Westminster.) Calgary, Alta., has a strong Parent-Teacher Federation (President, Dr. G. W. Kerby, Mt. Royal College, Calgary), and it is hoped that the province will soon be organized. (Hon. President, Prof. J. A. Dale, University of Toronto; President, Dr. A. E. Marty, Inspector of Schools, Toronto; Executive Secretary, Mrs. W. H. Becker, Toronto.)

Overseas Education League.—The conception of this movement was co-incident with the visit of the British Association to Winnipeg for its annual meeting in 1909, and an exchange of educational views and ideas which purely informal at that time, gave rise to a definite desire for a clearer understanding between Great Britain and Canada in matters educational. The outcome was the first organized visit of 165 Manitoba teachers to Great Britain during the summer vacation of 1910 under the auspices of an organization which subsequently received the title of the "Hands Across the Seas" movement. Having its inception in Manitoba, it speedily gained the co-operation of other provincial educational authorities, one after another giving it official recognition and support, with Ministers of Education as members of its Dominion Council and the Deputy Ministers as provincial presidents. In 1911-12 it received the endorsation of the governments of the Dominion of Canada and Newfoundland, and the addition to its Advisory Council of the Minister of the Interior for Canada and the Prime Minister of Newfoundland. The visit of 165 teachers to Great Britain, Ireland, Northern France and Belgium in 1910 was followed by yearly visits on a larger scale. In 1912 the number of visiting teachers reached 300, half of whom visited the Mediterranean, including Gibraltar, Malta and Egypt, on a specially chartered vessel. The visit of 1914 was interrupted by the outbreak of the war, and the activities of the movement had to be suspended until 1920. During this first period of its existence—in addition to the beneficial results of travel to the teachers participating in visits across the seas it carried into effect a scheme for the interchange of teachers for the period of one year between Canada and other parts of the Empire, the first interchange taking place in 1913, when there was an interchange between three teachers from Manitoba and New Zealand; and by arrangement with the London County Council, thirteen teachers from various provinces in Canada were placed in London schools. A magazine devoted to the furtherance of the ideals and aims of the movement was issued monthly commencing January, 1913. A sum of \$4,000 had been raised to open a residential headquarters for overseas teachers in London when the outbreak of war interrupted further operations. In 1920, upon the return to Canada of the founder and honorary organizer, Major F. Ney, M.C., after distinguished service in the Great War, the movement was reorganized: its executive body was reconstituted, and its title was changed to the Overseas Education League. In each provincial department of education, except the Maritime provinces and in that of Newfoundland, a member of the staff was appointed provincial secretary of the Overseas Education League with the deputy Minister as a member of the executive committee and the minister as a member of the advisory council. The scheme has been transferred to New Zealand, Australia and South Africa. In 1922 there were sent to England 3 teachers from British Columbia, 4 from Alberta, 1 from Saskatchewan, 3 from Manitoba, 26 from Ontario, and 1 from Quebec, England sending about an equal number to each of these provinces; to Scotland, 3 teachers from Vancouver and 1 from Regina, Scotland sending 10 teachers to Canada; to New Zealand, 1 teacher from British Columbia, 1 from Manitoba and 1 from Ontario; to Australia, 4 teachers from Winnipeg, Australia sending 11 teachers to Canada.

In 1923, 1924 and 1925 a large number of exchanges were effected. In 1924 this Organization instituted a Tour for Canadian University Undergraduates to Great Britain and Europe, when 200 students from every Province enjoyed a tour similar to that arranged for Teachers. In 1925 the programme was repeated for 180 students.

In 1925 a party of British Educationists visited Canada under the auspices of the Overseas Education League, and travelled from Quebec to Victoria and back to Montreal, receiving at all times the greatest courtesy and hospitality from the residents of this Dominion.

In 1926 a party of Canadian Undergraduates numbering two hundred visited Great Britain and Europe, while for a similar number of teachers like arrangements were made with an Extension Tour to Norway.

It is expected that both these tours will become yearly events, in addition to the tour for

Canadian Teachers.

The beneficial tendencies of such a movement can be readily recognized. Its objects, most of which may be gathered from the foregoing account of its activities, included: the furtherance of familiarity with educational systems throughout the empire, or, through the school, the furtherance of good relationship between the different parts of the empire; and the enlistment of a wider interest in the teaching profession. To these are added the perpetuation of the memory of those who died in the war. Its activities include: the organization of official visits of teachers to different parts of the empire; the provision of special facilities for individual travel in the pursuance of special courses of study; the arrangement of interchanges of teachers and school inspectors within the empire; the establishment of a residence in London, England, for teachers from overseas; and the publication of a magazine to further the objects of the League and to

provide a medium of intercourse between teachers in different parts of the Empire. (General

Secretary, Major F. J. Ney, M.C., 607 Boyd Bldg., Winnipeg, Man.)

Frontier College.—The Frontier College, known formerly as the Reading Camp Association, originated in 1900 and received a provincial charter (Ontario) 1919. The purpose of its founder, Alfred Fitzpatrick, was to bring to the men of camps and to all workers in isolated places some of the advantages of the university. In pursuance of this he instituted the plan of sending university men to camps as labourers on the different forms of frontier works. These men, instructors they are called, engage during the day at the same manual tasks as the men among whom they are located. In the evenings and at spare hours they give educational instruction.

This work has extended to all the provinces. Since its inception 1,150 men from the different universities of Canada, as well as some from American institutions, have acted as instructors for the Frontier College. Each year sees an increasing number of graduates and research students engaging in this work. During 1926 a staff of sixty-one was distributed throughout the Dominion in camps along railway construction, on hydro development, in the woods, and on other frontier works.

While the actual instruction imparted is usually of primary and secondary grade, there are times when university studies are also pursued. To meet the needs of men and women, largely in frontier places, otherwise deprived of educational facilities, the Dominion Government in 1922 granted the Frontier College a charter with powers to confer degrees in Arts. Through the co-operation of representative men from practically all the Canadian universities, an examining board of nearly a score has been formed.

The Frontier College is now in a position to offer definite courses of study, some of them leading to a degree. An effort has been made to adapt all such courses to the needs of those who by their environment are precluded from taking advantage of the opportunities for higher

studies already existing. (Principal, Alfred Fitzpatrick, M.A., Toronto.)

### CHAPTER IV—HIGHER EDUCATION

The twenty-three universities of Canada include six state controlled (New Brunswick, Toronto, Manitoba, Saskatchewan, Alberta and British Columbia); four undenominational (Dalhousie, McGill, Queen's and Western) and thirteen denominational. Of the last mentioned St. Dunstan's, St. Francis Xavier, St. Joseph's, Laval, Montreal and Ottawa represent the Roman Catholic Church; King's, Bishop's and Trinity the Church of England. Acadia and McMaster the Baptist Church. Mount Allison and Victoria the United Church of Canada. King's is in federation with Dalhousie while Victoria and Trinity are in federation with Toronto.

The total teaching staff of the universities in 1926 consisted of  $4{,}126$  of whom about 500 were women. Over 2,600 of the total staff were full-time teachers. Exclusive of Queen's and Ottawa which gave only the total staff (292) the number of full, associate and assistant professors was 1,901 besides 63 deans and 22 teaching principals. As might be expected the great majority of the part-time staff were lecturers, instructors, tutors, etc., while about 80 p.c. of them were in four universities. (See Table 127.)

The total student registration exclusive of duplicates between federated universities was 44,483. In addition to these were over 15,000 in various extension courses in the University of Saskatchewan, and probably the majority of 1,500 extension students in the University of Manitoba who were excluded from the total, the reason in the case of the latter being that it was impossible to ascertain how many of them were also included in the registration in other courses. Thus at least 60,000 persons in Canada came within the sphere of university teaching in addition to those registered in affiliated and professional colleges. This figure should not be quoted as the number of university students. Table 128 and the following tables show that besides regular students of university grade it represents pre-matriculation and vacation students, the courses taken by the last mentioned being of many grades including degree course taken by over 3,000 students. Notwithstanding this the grand total of 60,000 is an important figure. In the first place it represents, as just mentioned, persons coming directly under the influence of university teaching; secondly it represents (with the exception of some 5,000) either adults or persons who are of an age to discontinue ordinary school work; thirdly it may be said that even the total number would by earlier universities be considered a genuine university population; i.e., these universities would consider not only the regular degree students but also those now called preparatory students as a part of their system. Practice varies even today in this respect. In some places, including a part of Canada, the term Superior Education is confined to graduate and professional work, the term "Secondary" being applied to preparatory and undergraduate work in arts. It should also be mentioned that the total university registration in other countries includes students doing work under university standard. Thus in the report of the universities of the British Isles for 1925-26 the total registration of 90,509 consists of 41,606 full-time and 14,690 part-time students in courses of university standard, 16,276 not of university standard and 17,937 in extra-mural courses.

The registration in Canadian universities of students doing work of university standard was 28,183 including 19,870 men and 8,313 women. By "university standard" is meant that before entering upon this work the student has "matriculated." This term has a uniform meaning throughout Canada except in the case of matriculation to "Honour Courses" and certain other courses in some universities. Matriculation to a four year "pass" course in arts in practically all Canadian Universities is equivalent to the completion of Grade XI of the high school course including the ancient or modern languages required by each university. By one or two universities this "Honour Matriculation" or the equivalent of Grade XII admits the student only to the first year of an "Honour" course but this merely means that the "Honour" course takes one year longer than a "Pass" course.

Of the 28,183 students doing work of university standard 21,302 were full-time and 1,288 were part-time students preparing for first degrees; 665 were full-time and 244 were part-time students preparing for graduate degrees, while 3,445 were vacation including correspondence or extra-mural students preparing for degrees. This leaves some 1,200 students who were doing work of university standard but not preparing for degrees. These would include occasional stu-

dents, students taking only a few subjects, etc.

Taking the students by faculties we find 12,724 full-time and 1,083 part-time students in Arts, Pure Science and Letters of whom 12,326 full-time and 472 part-time students were preparing for first degrees and 321 full-time and 156 part-time were preparing for graduate degrees. If we add to these the vacation course degree students it will be noticed that Arts, etc., or what might be termed the purely academic, as contrasted with the vocational faculties, absorbed more than half the students of university grade. Grouping the remaining students according to the general nature of their courses we have the following figures:-

|                                                                                                                                                                                                                                                                          | Full-Time                                         | Part-Time                                           | Total                                                                 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|-----------------------------------------------------|-----------------------------------------------------------------------|
| Medicine, Dentistry, Veterinary Science, Public Health and Nursing and Pharmacy Engineering and Applied Science (including Architecture).  Music. Theology and Philosophy. Household Science. Commerce (including Accounting). Education. Agriculture and Forestry. Law. | 1,909<br>487<br>1,084<br>652<br>661<br>344<br>633 | 242<br>6<br>1,204<br>311<br>532<br>215<br>480<br>78 | 4,084<br>1,915<br>1,691<br>1,394<br>1,184<br>876<br>824<br>711<br>509 |

Theology is not fully represented since it is taken largely in colleges. Agriculture does not include the students of Nova Scotia and Ontario Agricultural Colleges, so that it also is not fully represented, while Law does not include the students of Osgoode Hall. These figures will be

mentioned in connection with combined statistics of universities and colleges.

Perhaps one of the most interesting facts in these statistics is that 3,445, or nearly a seventh of the degree students are in vacation and correspondence courses. This would seem to indicate of the degree students are in vacation and correspondence courses. This would seem to indicate that there is a very marked excess in the demand for higher education over the means to attend institutions of persons qualified for it. "Means," of course, includes not only financial means but also time and other opportunities. This is further indicated by the fact that 1,532 of the remaining degree students are part-time students. Thus about 5,000, or a fifth, of the degree students are either part-time, short or vacation course students. These figures, it must be remembered, do not include the statistics of Frontier College which has a considerable number of degree students who otherwise would not be able to take work leading to degrees. Canada has 23 universities averaging 1,000 resident degree students each. It would require about five universities of this average size to accommodate the students who are taking degrees by means of part-time, correspondence, vacation, and other short courses.

Table 133 gives in full the number of degrees, licenses, diplomas and certificates conferred by Canadian Universities in 1926. It was not possible to group the licenses, diplomas and certificates strictly according to the scholarship required to obtain them, and the grouping given must not be understood to indicate this scholarship. The requirements for a "license" may be higher than those for a "Graduate" degree. Since these requirements vary with universities it would not be possible to standardize them in statistics. Since they are given by name there should be

no misleading features in this table.

Of the 4,829 degrees, etc., conferred, 3,432 were conferred on men and 1,397 on women. Bachelor degrees were conferred upon 2,343 men and 895 women; Master degrees on 209 men. and 61 women; Doctor degrees on 531 men and 18 women. The licentiates, diplomas and certificates for reasons given should not be added. By far the largest number of Bachelor degrees was in the Faculty of Arts, while a comparatively small number was in the Faculty of Pure Science. This may not be significant since there is not always a clearly defined distinction between Arts and Pure Science. What distinction there is usually consists of a concentration on the part of Science students upon the Natural Sciences and modern languages and on the part of Arts students upon the Ancient languages and Social Sciences such as history, economics, psychology, etc.

The number of full-time students in Arts, Pure Science and Letters are given by Academic years for 16 universities in Table 135. The classification in the remaining universities being somewhat different from this they are not included. In this table the number of first degrees in Arts, etc., is also given for these sixteen universities and can be compared with the number in the fourth year. The reasons for certain difference are obvious. Where the number of degrees exceeds that of the fourth year it is probably due to deferred, etc., degrees. The purpose of the table was to link the academic work of the universities with the continuation work of the ordinary schools. The sixteen universities given should be a good sample of the proportions between the various years. These proportions together with the proportions in the four years of our high school systems are as follows:-

|                                                           | Universities | High<br>Schools             |
|-----------------------------------------------------------|--------------|-----------------------------|
| First Year<br>Second Year.<br>Third Year.<br>Fourth Year. | 27·4<br>19·8 | 42.8<br>28.8<br>23.4<br>5.0 |
| Total                                                     | 100.0        | 100.0                       |

Table 134 shows the number of students by place of residence. It is noticeable that 916 of the students in our Canadian Universities are from the United States, i.e. including universities and colleges about 1,000 are from the United States. Answers to a questionnaire sent to universities and colleges of the United States show that about 1,200 Canadian students are in United States higher institutions. This is a new and rather important field of inquiry and it would seem to require more than passing mention here. The fact that the numbers are so nearly equal appears surprising at first sight. No doubt there are many contributory causes. While the United States have a larger number of institutions to accommodate students than Canada they have also a larger number of students with their different reasons for selecting institutions of learning. Probably a large factor influencing the selection is filial or national attachment, e.g. a considerable portion of the U.S. students in Canadian institutions may be ex-Canadians or ex-British or some of their relatives may be graduates of these institutions. Again the Canadian institutions drawing the largest number of United States students are near the border. The emphasis on a particular subject in one university may be another reason. The migration of students between the provinces of Canada as shown in Table 134 throws a certain amount of light on the matter, but after exhausting ordinary explanations it is clear that a good deal is left to explain. Explanations, however, render none the less important the fact that the numbers of Canadians in United States institutions and of United States students in Canadian Institutions are nearly equal.

Table 136 shows that the total expenditure of universities in 1926 (excluding Laval) was \$10,435,055. Of the income almost exactly the same amounts were received from investments and tuition fees. Almost half of the total income was contributed by governments and municipalities. The items which can be compared with former years show an increase of about eight millions in total assets, some increase in total income and a decrease in total expenditure over

1925. The decrease in expenditure was particularly noticeable in capital expenditure.

In 1926 there were known to be in operation in Canada 83 Colleges after deducting four formerly listed institutions—two having been recently absorbed by universities and the other two being of only high school rank. Of these 83, two have not reported for some time, but their statistics are largely included in the statistics of universities. The tables in this report, therefore, give the statistics of 4 agricultural, 1 technical, 1 commercial, 1 pharmacy, 1 veterinary, 1 military, 2 law, 30 theological and 42 affiliated including 31 classical colleges, little seminaries and independent non-subsidized classical schools in Quebec. The ladies' secondary schools are not listed but their figures are nearly all if not all included with the statistics of the universities of Laval, Montreal and Ottawa.

The total registration of these colleges in 1926, or according to the latest reported figures was 17,752 besides 3,039 elsewhere included with secondary technical schools. This registration included about 5,600 doing work of university standard, 6,200 work preparatory to matriculation and the remainder work which could be classified as neither of these, including vacation courses, extension courses, evening courses, etc. Of the students of university standard, by far the largest group were in Arts, viz., 3.053; Theology, Philosophy, Medical and Missionary Courses and related subjects come next with 1,154 students. Agriculture had 450, Law 404, Pharmacy 144, Commerce 112, Veterinary Science 66, and Engineering 39. Practically all the students of

university grade were full time students.

Table 137 gives a list of the colleges with their date of formation and number of staff according to latest report. Table 138 gives a summary of the registration, classifying the students by sex and according as their courses are of university standard, matriculation or other than these. Table 139 classifies the full and part time students according as they were pre-matriculation, first degree, graduate or other. Table 140 shows the number of full and part time students by faculties Table 141 gives the registration in vacation and short courses. Table 142 the number of students attending outside their provinces of residence. Table 146 contains the financial statistics of

certain colleges.

Combined statistics of universities and colleges are given in Tables 147 and 148. In combining these statistics for the sake of removing duplication attention was confined to the financial items and to the courses. It must be well understood that separate reports of universities are apt to include the statistics of their affiliated colleges; on the other hand some professional colleges are apt to have either no affiliation or their affiliation is so slight that the universities do not include their statistics; e.g. in the case of Law the universities reported 508 full-time students, while colleges reported 404 full-time students in addition; in the case of Theology 996 and 820 full-time students respectively were reported by universities and colleges. These two professions, therefore, were represented almost equally by the two types of institutions, the affiliation in the case of colleges being slight. Table 137 shows the affiliation of most of the colleges.

The relative numbers in the various faculties are not materially changed from previous years by the much more detailed statistics of 1926. Arts and pure science had by far the largest number of full-time students; medical came next; engineering third; theology fourth; household science fifth. Each of these faculties had more than one thousand students. Agriculture, Law, Commerce, and Dentistry came next in order; while Forestry, Social Service and Veterinary Medicine had the smallest numbers. In the case of part-time courses Agriculture and Music led in the number of students. In the matter of vacation and similar courses agriculture had larger numbers than any of the regular courses. It is interesting to see that 3,445 students in short and correspondence courses were degree students, mainly in arts, this being

about one-fifth of all the degree students in arts.

# CHAPTER V.—PRIVATE SCHOOLS

Section 13 (Tables 149 to 161) contains the statistics of two classes of private schools: (1) elementary and secondary schools which do the same class of work as ordinary day schools under public control (that is, purely academic work); and (2) business colleges, the function of which is to give training in commercial subjects, the training being of a purely vocational nature. The distinction between the two classes is not always hard and fast, as may be seen in the table below, showing the subjects of study in the public and two kinds of private schools.

For the year ended June, 1926, reports were received from 111 private elementary and secondary schools and 90 business colleges. The enrolment in the former was 14,724, of whom 3,867 (1,818 boys and 2,049 girls) were reported as being in residence; the enrolment in business colleges was 17,912 (6,547 male, 11,271 female, and 94 unspecified by sex). It is noticeable that there is a preponderance of the female sex in both classes of private schools, and that in the private elementary and secondary schools females are in a majority almost of two to one.

A comparison between the subjects of study taken at these schools and at public schools is very illustrative. In the 1922 report the number taking the different subjects in order of size in the different classes of institutions was shown. The following figures for 1926 retain the order of 1922 to show the changes since that year.

### NUMBER TAKING THE FOLLOWING SUBJECTS, 1926

| Order<br>of Size<br>1922 | Private Elementary<br>and<br>Secondary Schools | Pupils                | ~                           |                        |                                       |                 |

|                          |                                                | See                   |                             | See                    |                                       |                 |
|                          |                                                | English               |                             | English                |                                       |                 |

It is noticeable that in private elementary and secondary schools the order has not changed materially since 1922 except in the case of religious instruction which shifted from 25th to 5th place. Oral French has also shifted from 15th to 7th place. On the other hand domestic science, military drill and church history have shifted downwards. The insignificance of the position held by manual training, domestic science, commercial subjects and other practical subjects is remarkable. The position of the subjects in public secondary schools is especially interesting in view of the increasing tendency from year to year in the different provinces to offer electives. This tendency seems to be favourable to French. In business colleges the size of each subject should be compared with the largest subject, typewriting. If "correspondence" be regarded as training in English over and above the English Composition and Literature it will be seen that these business colleges may be regarded as offering a considerable amount of academic training.

# APPENDIX I.—SUMMARY OF EDUCATIONAL LEGISLATION IN THE DIFFERENT PROVINCES, 1926

### PRINCE EDWARD ISLAND

The Public School Act.—Chapter I amends the Public School Act, 1920, and amendments thereto by requiring that ample insurance be carried on school-house to protect holders of debentures; by empowering Board of Education to arrange with trustees re closing school and conveyance of pupils to another school; by empowering trustees to borrow money to build or repair school-house; the government may guarantee interest on debentures of \$5,000 or over.

### NOVA SCOTIA

Education Act.—Chapter 35 amends the Education Act (c. 60, R.S. 1923) with respect to qualifications of voters. The resident ratepayers and their wives only vote on the election of chairman and secretary of a school meeting on questions of order and appointment of auditors, poll tax payers (including females) being qualified to vote on election of trustees. Chapter 30 amends the same act by empowering the Provincial Treasury to pay annually to a Federal Rural High School Department a sum not exceeding five cents for each day's attendance of each enrolled high school pupil providing the aggregate day's attendance exceeds 3,000. Chapter 37 amends the same act by providing for retiring annuities for inspectors, Normal and Agricultural College teachers who have completed thirty years of service, the annuity to be equal to one seventy-fifth of salary at retirement for each year's service and each two years' service as a public school teacher before appointment as inspector, etc. Provision is also made for retirement on disability.

The Technical Education Act.—Chapter 38 amends the Technical Education Act, (R.S. 1923, c. 61), changing the title of "principal" of the Technical College to "President."

Education of the Blind and Deaf or Deaf Mute.—Chapter 39 amends Chapters 62 and 63 (R.S. 1923) "of the Education of the Blind" and "of the Education of Deaf or Deaf Mute" changing half-yearly to yearly payments.

### NEW BRUNSWICK

Vocational Education Act.—Chapter 5 amends the Vocational Education Act (Sec. 4, 1923) with respect to method of initiating and providing local funds.

Schools Act.—Chapter 6 amends the Schools Act (1922) by increasing the amount of debentures issued by City of Fredericton. Chapter 7 amends the same act restricting the voting at school meetings to resident ratepayers who have paid their taxes. Chapter 8 amends the same Act by specifying that every married woman over twenty-one years of age not living separate from her husband is entitled to vote, if her husband is a ratepayer and that she is eligible for

Free Distribution of School Books.—Chapter 9 provides for the purchase, sale and free distribution of school books. The School Book Department is to be continued; a superintendent of this department to be appointed; government empowered to authorize purchase and sale of books prescribed by Board of Education; text books to be distributed free to pupils not in advance of Grade V after July 1, necessary expenditure to be paid out of the Consolidated Revenue

Fund.

# **QUEBEC**

Public Instruction.—Chapter 40 amends several articles of the R.S. 1909, respecting public instruction. One of the amendments provides that the pension of every officer of primary instruction who is on the retired list on or after January, 1924, so fixed at the minimum of \$125 under article 2993 and that which is less than \$300 shall be increased by \$5 for every year he has taught over twenty and under thirty-five years until the pension reaches \$300. The maximum of \$1,050 allowed as pension to an officer of primary instruction under article 2994 is raised to \$1,200.

School Corporations.—Chapter 41 amends the Revised Statistics, 1919, respecting inspection

of the accounts of school corporations.

Prizes in the Schools.—Chapter 42 amends R.S. 1909, respecting the distribution of prizes

Montreal Schools.—Chapter 44 specifies the organization and duties of the Catholic Central Board consisting of seven members—two priests and five laymen. The Lieut.-Governor and Council and Archbishop of the archdiocese of Montreal each to appoint two, the city, one, and the Administration Commission of Montreal University to appoint one, the other member to be appointed by the members of the district commission. Chapter 45 incorporates the "Central Board" (Protestant) with jurisdiction over the Protestant Schools in the municipalities of Montreal, Lachine, Verdun, Coteau St. Pierre, Westmount, St. Laurent, Mount Royal, Sault au Recollet, Pointe aux Trembles, Outremont and Hampstead. Provision is also made for fuller annexations. The Central Board shall consist of seven Protestant members. The purpose of the Central Board is to distribute evenly the cost of Protestant education in the municipalities affected, at the same time preserving the identity and so far as possible, the automony of the various local boards. A uniform tax (10 mills) is imposed upon immovable property within the jurisdiction of the Central Board, while a uniform tax (12 mills) is imposed upon the neutral panels to be apportioned between Protestant and Roman Catholic Education as by law provided.

### ONTARIO

The School Law Amendment Act, 1925.—Chapter 78 amends the school laws by the following provision. A Metropolitan School Area may be set aside by the council of any county in which there is situated a city of at least 100,000 to which said area is adjacent, the members of the school board of such area to represent the different sections included but not to exceed twelve. The Metropolitan Public School Board displaces existing public school boards in areas included. The board of a public school may provide for the transportation of pupils to and from a school used jointly by it and another board or other boards. County High School Pupils are defined as pupils who reside in the county but not within the limits of a high school district or Continuation school section. Any pupil resident in a high school district or continuation school section shall be regarded as a county pupil in respect to a high or continuation school outside when such a school is reasonably accessible while the school in the district in which he resides is not, and provides for such pupil a course of study which is not offered in the school in his own district Where the board of a high school situated in a city or separated town notifies the County Clerk that the high school is open to county pupils on the same terms as high schools in municipalities not separated from the county, the county council may, from time to time, appoint three additional trustees for such high schools so long as the school is open to county pupils on such terms and such high school shall be considered a county high school. The council of a county may before the 1st of July in any year decide to provide for the cost of education of pupils at the high schools in the county by co-operation with the boards of high school trustees of the municipalities in the county as follows: 50 p.c. of the cost of education of resident pupils in any school to be borne by the county, 50 p.c. by the high school district, 50 p.c. by the municipalities in which such pupils reside and 50 p.c. of the cost of education of county pupils to be borne by the county. The cost of education of resident and county pupils shall be determined as follows: total cost per pupil per day equals total amount for permanent improvement (including paying off interest on debentures), plus total cost of maintenance of high school, minus amounts received from legislative grants as fees and from the councils of other counties for non-resident pupils, the remainder being divided by the aggregate attendance of all pupils during year. The cost of education of resident pupils is then calculated by multiplying this total cost per day by the aggregate attendance of resident pupils the same process being followed in calculating the cost of county pupils. Where there is no agreement for co-operation, the county is to pay to the board of every high school in towns not separated from the county and in villages and townships within the county, the equivalent of the legislative grant. Where the cost of maintenance of county pupils at a high school and the share of the cost of education of county pupils which the high school district paid to the county during the preceding year exceeds the amount apportioned out for legislative grant as fees, the council shall in lieu of the equivalent of the amount apportioned out of the legislative grant pay to the board a sum to be calculated as follows: the cost per pupil per day (calculated as above) during the next preceding three years is multiplied by the aggregate days' attendance of county pupils during these years and to the result is added the share of the cost of education of county pupils which the high school district paid to the county during the preceding year as included in the rates levied by the county council according to the relative equalized value and the total amount so ascertained is the sum payable by the council to the board. The amount payable by county or municipality for non-resident pupils is calculated according to the aggregate days' attendance of these pupils, and in the case of other pupils the cost per pupil per day being calculated for the year for which payment is to be made. A high school district shall be under one board of examiners for entrance examinations, the public school inspectors and high school principals being members, and additional members being appointed by the public and separate school boards. The county council may also appoint as a member the principal of one continuation school having at least two teachers.

Agreements may be entered into for support of continuation schools by adjoining sections under terms similar to those explained in the case of high schools. For the attending pupils from adjacent county, their county pays eighty per cent of the cost of their education calculated

as already explained.

The Teachers' and Inspectors' Superannuation Act is amended so that upon the death of a teacher or inspector his personal representative shall be entitled to receive the total amount contributed by him to the superannuation fund with 4 p.c. interest compounded half-yearly.

The Public School Act (1920) is amended so as to extend the right to have these contributions refunded upon becoming subject to the provisions of the Teachers and Inspectors Superannuation Act.

Industrial Schools.—Chapter 79, an act respecting Industrial Schools, provides that children committed to industrial school may be sent to another approved institution. There are also other provisions such as Vesting in the Crown certain lands occupied by Industrial School Association.

Boys' Welfare Board.—By chapter 80 is established "The Boys' Welfare Board of Ontario" consisting of thirty members with power to establish a home or homes for boys who may be admitted thereto under its regulations regarding the age and conditions of admission, etc., and conduct, and education.

MANITOBA

Education Department Act.—Chapter 17 amends this Act by providing that the Deputy Minister of Education and the Registrar of the Department be ex-officio members of the Advisory Board.

Public Schools Act.—Chapter 42 amends this act with certain definitions affecting Secondary schools. "Secondary School Grade" means Grades IX, X, XI and XII either singly or in combination. "Secondary School" means any school providing instructions in any or all the secondary grades in a district receiving special grants in aid of secondary education. Other amendments affect the tax collector's powers, authorization of municipality to add to school districts, transportation of children, etc. It also provides for a special grant not exceeding 15 cents per day for the second year of service and not exceeding 25 cents per day for subsequent years of service to any rural school district employing only one teacher where the same teacher is retained in charge of the school for two or more years consecutively. Chapter 43 amends the same Act with reference to assessment in unorganized territory. Chapter 44 further amends the Act by cities so that no property qualifications are required of trustees in cities. Chapter 45 further amends the same Act with reference to government guarantee of loans. Chapter 46 further amends the Act by exempting the right of retired teachers to teachers' Retirement Fund of Winnipeg, No. 1 from being assigned, charged or anticipated or given as security or being seized, etc. Trustees administering may refuse to recognize Power of Attorney granted by retired teacher with regard to right in such fund.

### SASKATCHEWAN

School Act.—Chapter 32 amends the Act rendering a trustee convicted of a criminal offence not eligible for nomination or election for one year after conviction.

### **ALBERTA**

School Act.—Chapter 55 amends this Act. Among other matters, power is given to the board of every district (on consent of University and Minister) to establish a college in affiliation with the university of Alberta in which may be taught work of university grade not to exceed the first two years of an Arts course. It also provides for an additional vacation of four days during Easter.

University Act.—Chapter 57 amends this Act with reference to rights, to inventions, patents and trade marks, etc.

### **BRITISH COLUMBIA**

Public Schools Act.—Chapter 46 amends this Act by creating the position of a chief inspector of schools to inspect Normal Schools, assist in co-ordinating the work of napection and supervision of schools, conduct experimental studies in education, etc. It also provides for the conduct and maintenance of a school for the deaf and blind of the province. Provisions are also made in cases of teachers, salary, etc., and of schools summarily closed; also for admission to classrooms for the purpose of observation and practice teaching pupils of Normal Schools and university teacher-training classes.

# APPENDIX II.—LAWS RELATING TO CHILD LABOUR IN CANADA

The existing Canadian laws relative to child labour are, with one exception, enactments of the various provincial legislatures. The exception referred to deals with the employment of children and young persons on board ship and is contained in a recent amendment to the Canada Shipping Act. The provincial statutes which contain most of the provisions concerning child labour are those dealing with school attendance, child welfare, inspection and regulation of factories and shops, and inspection and regulation of mines.

### EMPLOYMENT ON BOARD SHIP

The only federal law relating to child labour is an amendment of 1924 to the Canada Shipping Act prohibiting the employment of persons under 14 years of age on any ship other than a training ship or a ship on which only members of one family are employed. It also forbids the employment of young persons under 18 years of age as trimmers or stokers on any ship except a training ship or one on which only members of one family are employed or which is propelled mainly by means other than steam. In cases where no person over 18 years of age is available, two young persons 16 years of age or over may be employed to do the work which would otherwise have been done by one person over 18 years of age. Young persons may not be employed in any capacity in a ship except on production of a certificate of physical fitness from a qualified physician. In cases of urgency, however, a shipping master may authorize the employment of a young person without such certificate, on condition that it is obtained at the first port of call. Certificates are good for one year only. Every agreement with the crew of a sea-going ship must include a list of the young persons under 18 years of age who are members of the crew, or, if there he no agreement, the master of the ship must keep a register of such young persons. The above amendments apply only to sea-going vessels of Canadian register and not to ships employed exclusively on the inland waters of Canada.

### SCHOOL ATTENDANCE

The provincial laws governing the attendance of children at school contain the following provisions:—

Alberta.—Children in Alberta between the ages of 7 and 15 years must attend school, and no child under 15 who has not a valid excuse may be employed by any person during school

hours, excuses being valid for children whose services are needed in husbandry or for urgent and necessary household duties, or for the necessary maintenance of such child or of some person dependent upon him. A certificate may, upon application by his parent or guardian to the school principal or other competent authority, be granted to a child under such special circumstances, but the exemption may not be for a period longer than six weeks during each school period.

British Columbia.—The age of compulsory school attendance in this province is from 7 to 15 years, exceptions being made only for children whose education is being otherwise provided for satisfactorily, or on account of sickness or some other unavoidable cause.

Manitoba.—No child under the age of 14 years may be employed during school hours, but a certificate of exemption, covering a period of six weeks in any school term, may be granted to a child over 12 years of age whose services are needed in husbandry or for urgent and necessary household duties. The age limit may be raised from 14 to 15 by any school board having an attendance officer on the passing of a by-law.

New Brunswick.—In Chatham, Newcastle, Fredericton and Saint John, school attendance from 6 to 14 years of age is compulsory by a special statute.

Part 2 of the School Attendance Act provides for the compulsory attendance of children from 6 to 16 years of age in such cities and incorporated towns as adopt a resolution to that effect. In such urban districts, children between 14 and 16 years may be employed during school hours if a certificate of reasonable proficiency in writing, reading and simple arithmetic can be produced. A child under 14 may not be employed during school hours unless he has passed Grade 7, or is attending school for six months of the year. In a city or town which has adopted a compulsory attendance resolution no child under the age of 13 years may be employed in any mechanical or manufacturing establishment.

Part 1 of the School Attendance Act provides for the compulsory attendance of children from 7 to 12 years of age in rural districts on the adoption of a resolution to that effect by the

municipality

Nova Scotia.—In cities and incorporated towns children between the ages of 6 and 16 years must attend school regularly. Employment certificates may be granted, however, to any child over 12 years of age who passes a satisfactory examination in Grade 7, or to any child over 13 years of age who satisfies the Board of School Commissioners that it is necessary for him to go to work. Such a certificate is good only for the work specified therein and is issued on condition that the child attend technical or other classes. A medical certificate of fitness for the specified employment is also necessary. In school sections which are not in cities or towns school attendance is compulsory for children between the ages of 7 and 14 years, but by a majority vote at an annual meeting any school section may require attendance at school of all children from 6 to 16 years.

Ontario.—The School Attendance Act forbids the employment of children under 14 years of age during school hours, but a special certificate may be granted to a child by the school attendance officer for a period of not more than six weeks in each school term, on proof that the child's services are required in urgent or necessary household duties, or for the maintenance of himself

or of some person dependent upon him.

The Adolescent School Attendance Act requires a young person between 14 and 16 years of age to attend school, unless his services are required for home duties, or for the maintenance of himself or a dependent. A certificate from the school attendance officer for employment, or a home permit is necessary in either case. By an amendment of 1923, children between 14 and 16 years of age in rural sections are not required to obtain permits for work at home. The operation of that section of the act which requires adolescents between 16 and 18 years of age to take part-time courses of instruction for fixed periods, came into operation in September, 1925.

Prince Edward Island.—School attendance is compulsory for children between 7 and 13 years of age for at least 60 per cent of the days on which school is in operation. Penalty is imposed on a parent or guardian for neglect to carry out this provision except in case of poverty or illnes.

Quebec.—There is no compulsory school attendance law in this province. The provisions in regard to employment certificates for young workers are contained in the law governing industrial establishments (see below under "Factories").

Saskatchewan.—The School Attendance Act provides that every child between the ages of 7 and 15 years must attend school for the full term, unless he has some person dependent upon him or has some other valid excuse. No child without such excuse may be employed during school hours. Where the services of any child over 13 years of age, who has passed Grade 5, are required in husbandry or for necessary household duties, the school trustees may grant a certificate exempting such a child from school attendance for a period of not more than thirty days.

Yukon Territory.—Children between the ages of 7 and 12 years are required, unless they have a valid excuse, to attend school for at least sixteen weeks each year, eight weeks of which

must be consecutive.

# IN MINES

Alberta.—No boy under the age of 16 years may be employed in or about any mine below ground, no boy under 14 years above ground, and no boy between 14 and 16 above ground unless he can show a satisfactory certificate of his school studies. No girl of any age may be employed in or about a mine, above or below ground, except in an office. It is provided further that no

boy under the age of 18 years shall operate any machinery, such as an engine, windlass or gin, for transferring men from one part of a mine to another, unless such machinery is worked by a horse, in which case the age limit is 16 years.

British Columbia.—No boy under 15 years of age may be employed in a coal mine, and no boy under 14 years may be employed above ground. No girl may be employed either above or below. These prohibitions, however, do not apply to clerical work, nor to work in a boarding-house or residence at a colliery. In metal mines the age limit for boys is 12 years and the employment of girls of any age is prohibited. No boy under 16 years of age is permitted to operate machinery for moving material in a coal mine, while service elevator men must be at least 22 years old. In metal mines elevator men must be at least 15 years of age.

Manitoba.—The Lieutenant-Governor in Council may make regulations governing the age and sex of persons employed in mines. The Child Welfare Act forbids the habitual employment of any person under 16 years of age in any occupation which is likely to prove injurious to life, limbs, health, education or morals.

New Brunswick.—The Mining Act of New Brunswick contains no provisions regulating

conditions of labour in mines.

Nova Scotia.—No boy under the age of 16 years may be employed in or about a coal or metalliferous mine. Persons in charge of hoisting machinery for moving workmen must be at least 18 years of age. Where the windlass or gin is worked by an animal the driver of the animal in a coal mine must be at least 15 years of age, and in a metal mine 16 years of age.

Ontario.—No boy under 16 years of age may be employed in or about a mine and no boy under 18 may be employed below ground. No girl may be employed except in clerical work. Operators of hoisting machinery for moving materials must be at least 18, and for moving persons

at least 20 years of age.

Quebec.—No boy under 15 years of age may be employed underground in any mine or quarry, and no girl of any age may be employed in the working of a mine. For boys between 15 and 17 years of age the hours of work are limited to forty-eight per week. Persons under 20 years of age may not have charge of hoists or windlasses used for raising or lowering workmen. Boys under 18 years of age may not have charge of any machinery used for lifting, haulage, hoisting, or for drilling blasting-holes, and the transmission of orders for putting such machines in motion may not be entrusted to persons under 16 years of age.

Saskatchewan.—No boy under 14 years of age, and no girl of any age, may be employed in

mine workings. Operators of passenger elevators must be at least 18 years of age.

Yukon Territory.—No boy under 18 years of age may be employed below or above ground in a mine, and boys between 12 and 16 years of age may be employed only when they can show a school certificate. The hours of labour of such employees are limited to eight in the day and forty-eight in the week, except in emergencies.

### IN FACTORIES, SHOPS AND OFFICES

Alberta.—The Factories Act provides that no boy or girl under 15 years of age may be employed in any factory in the Province, nor in any shop, bakeshop, office or office building in a city or town having a population of over 5,000. A shop as defined in the Factories Act includes a hotel or restaurant. Young girls may not clean mill-gearing machinery while it is in motion and must have suitable chairs or seats provided for them by the employer. The employer must keep a register of the names, addresses, working hours and earnings of all his employees, and must, if required by the inspector, provide them with a suitable place in which to take their meals. Hours of labour for all persons are limited to nine per day and fifty-four per week except in emergencies. The sections prohibiting the employment of children and those limiting hours of employment apply to piece-workers and outworkers. The construction and operation of elevators is governed by regulations made by the Lieutenant-Governor in Council. Regulations made to September 15, 1927, do not deal with the employment of children as elevator operators. A person who has been employed in one establishment for less than the permitted number of hours may not be employed in another establishment for less than the permitted number of hours of hours. The Minimum Wage Board of this Province has power to determine the time to be allowed for meals. The Minimum Wage Act supersedes the Factories Act in the case of employees to whom it applies, viz., all female employees in any trade or occupation in the cities and towns in the Schedule to the Act. All cities and large towns are included. The Child Welfare Act, 1925, which comes into force by proclamation, forbids the habitua employment of any person under 16 years of age in any occupation which would be likely to be injurious to life, limbs, health, education or morals.

British Columbia.—The Factories Act provides that no boy or girl under 15 years of age may be employed in a factory except by written permission of an inspector, which must specify the hours of labour not exceeding six per day. The working hours of young girls under 18 years of age are limited to eight per day and forty-eight per week unless a different apportionment of hours per day is made in order to secure a shorter day's work on Saturday. An hour must be allowed each day for a noonday meal. In emergencies the inspector may grant exemption from this rule, in which case nine hours per day and fifty-four hours per week may be worked on not more than thirty-six days in the year. Employment between 8 p.m. and 7 a.m. is forbidden. An additional forty-five minutes for an evening meal must be allowed between 5 p.m. and 8 p.m.

to every young girl working after 7 p.m. These limitations regarding hours of labour are not binding upon employers of any young girls in the business of fish-canning and curing or fruit-packing during fish runs or in the fruit seasons, if the young girl or her parent or guardian has given written consent to overtime or night employment for a stated number of hours. No person under 18 years of age may be licensed to operate an elevator for carrying passengers. Young girls must not be employed to clean machinery in motion nor to work between the fixed and traversing parts of any self-acting machine while it is in motion. The employer must, if required by the inspector, provide a suitable dining room. He must also keep a register of all young girls employed in the factory and of their employment. The Lieutenant-Governor in Council may prohibit the employment of girls under 18 and boys under 16 years of age in factories in which the work is deemed to be dangerous or unwholesome. The Factories Act does not apply in cases where children or young girls are employed at home.

The Shops Regulation Act forbids the employment in a shop of any boy or girl under 16 years of age for more than  $66\frac{1}{2}$  hours per week or for more than 13 hours on Saturday and 11 hours on other days. An hour must be allowed for a midday meal with an additional forty-five minutes for an evening meal between 5 p.m. and 8 p.m. to every young person employed later than 7 p.m. No boy or girl under 14 years of age may be employed in a bake-shop and no pe son under 18 years of age may be employed in a bake-shop between the hours of 9 p.m. and 5 a m

under 18 years of age may be employed in a bake-shop between the hours of 9 p.m. and 5 a.m.

The Night Employment of Young Persons Act and the Employment of Children Act form part of a series of measures enacted in 1921 to give effect to certain Draft Conventions and Recommendations of the International Labour Conference. These laws, however, do not come into operation until the other provinces enact similar legislation. The Night Employment of Young Persons Act would prohibit the employment of boys and girls under 18 years of age between the hours of 8 p.m. and 7 a.m. in any industrial undertaking. The Employment of Children Act would forbid the employment of boys under 14 and girls under 15 years of age in any industrial undertaking.

Manitoba.—The Factories Act provides that boys under 14 and girls under 15 may not be employed in factories and every employer must have a satisfactory age certificate for each child employee under 16 years of age. The Lieutenant-Governor in Council may forbid the employment of boys under 16 and girls under 18 years of age in establishments where the work is considered to be dangerous or unwholesome. The hours of labour for boys under 17 and girls under 18 years of age may not exceed 9 in the day or 54 in the week unless a different apportionment of the hours per day is made in order to secure a shorter day's work on Saturday. One hour must be allowed for a noonday meal. In cases of emergency if the inspector grants exemption from this rule, girls over 17 years of age may work for 12 hours per day and 60 hours per week on not more than 36 days per year. An additional forty-five minutes for an evening meal must be allowed between 5 p.m. and 8 p.m. to young girls working after 7 p.m. Work between the hours of 10 p.m. and 7 a.m. is forbidden. No person under the age of 16 years may operate a passenger elevator anywhere in the Province of Manitoba. Young girls are not allowed to clean mill-gearing or other machinery, while it is in motion, nor to work between the fixed and traversing part of any self-acting machine while it is in motion. If the inspector so directs in writing a suitable dining-room must be provided. The employer must keep a register of the young girls in his establishment and of their employment. The Factories Act does not apply to premises where children and young girls are employed at home.

The Shops Regulation Act prohibits the employment of children under the age of 14 in any retail or wholesale store, book-stall or warehouse, or on any premises used in connection with messenger service. Exception is made, however, for boys over 13 years of age who may be employed for two hours on school days and eight hours on school holidays. Boys of this age may also be employed for 8 hours per day and 48 hours per week on production of school certificates and permits from the Bureau of Labour. Such certificates must be kept on file by the employer and produced when required. Poys under 17 and girls under 18 years of age may not be employed for more than 14 hours a day or 60 hours a week except in outdoor employment such as driving a delivery van, when 66 hours a week are allowed. In emergency cases, the inspector may give written permission for overtime employment of boys and girls 16 years of age and over, the hours in such cases not to exceed 70 hours per week. Young persons under 18 years of age may also be employed in a shop between 8 a.m. and 10 p.m. on the day before a statutory holiday and during the period from December 14-24. Employers must have birth certificates for all employees under 16 years of age and must produce them when required. Suitable chairs or seats must be provided for the use of young girls as well as for women. One hour must be allowed each day for a midday meal and an additional forty-five minutes before 7 p.m. to every employee working after that hour. If the inspector so directs in writing the employer must provide a suitable chaing-room.

The Bake-Shop Act prohibits the employment of any person under the age of 14 years except by written permission of an inspector. Hours of labour for all employees are limited to 12 hours per day and 60 hours per week.

The Child Welfare Act forbids the habitual employment of any person under 16 years of age in any occupation likely to be injurious to life, limbs, health, education or morals.

New Brunswick.—The Factories Act in this Province is administered by the Workmen's Compensation Board which has authority to prohibit the employment of girls under 18 and boys under 14 years of age in factories in which the work is considered dangerous or unwholesome. Employers are required to meet the full amount of workmen's compensation payments in the

case of an accident causing death or injury to any girl under 16 or any boy under 14 years of age. The inspector may demand of any employer the names of all persons under 16 years of age in his employ in the several cities or towns in the Province and also a birth or age certificate for each. Working hours of young girls under 18 years of age are limited to 10 in the day and 60 in the week, but a readjustment of the daily hours may be made in order to ensure a shorter day's work on Saturday. One hour must be allowed for a midday meal. In cases of accident or emergency the Workmen's Compensation Board may allow young girls to be employed for 13 hours per day and 81 hours per week on not more than 36 days per year Work may not, however, commence before 6 a.m. nor end later than 10 p.m. An additional hour must be given between: 5 p.m. and 8 p.m. for an evening meal to every young girl working later than 7 p.m. No person under 14 years of age may be employed in the management or control of an elevator. No employee may clean mill-gearing machinery in motion and no young girls may work between the fixed and traversing part of a self-acting machine in motion. The Act does not apply to fish or fruit canning establishments. Young girls in shops must have chairs or seats provided for them by the employer.

Nova Scotia.—The Factories Act provides that children under 14 years of age may not be employed in a factory except in gathering or preparing fruit or vegetables for canning or dessi-cating during the months from July to October inclusive. Children so employed must work in a room separate from that in which the canning or dessicating process is carried on. Birth certificates are required for all children under 16 years of age. No limitation is placed upon hours of labour for normal times, but in cases of accident or emergency the inspector may permit young girls to be employed for 12½ hours per day and 72 hours per week on not more than 36 days in the year. Work must not begin before 6 a.m. nor continue after 9 p.m. except in the fruit canning and dessicating industry during the fruit season (July to October) on not more than twenty days in the year. At least one hour must be allowed for a noonday meal and an additional forty-five minutes between 5 p.m. and 8 p.m. to every young girl working after 7 p.m. The Lieutenant-Governor in Council may prohibit the employment of girls under 18 and boys under 16 years of age in factories in which the work is considered dangerous or unwholesome. Young girls may not clean mill-gearing machinery nor work between the fixed and traversing part of any selfacting machine while it is in motion. If the inspector so directs in writing the employer must provide a suitable dining room. The employer must keep a register of the children and young girls employed by him and of their employment. When overtime work by young girls is permitted its duration must be entered in the register. The provisions of the Act relating to the employment of children and young girls do not apply to employment in a private house in which only members of the family are employed.

The Education Act provides that at least twice a year the Board of School Commissioners shall examine into the condition of the children employed in every manufacturing or other establishment. An employer must, if required, furnish to the officer appointed to make the examination, a list of all children under 16 years of age employed in his establishment, together with

their school certificates.

The Children's Protection Act provides that boys under 14 and girls under 16 years of age may not be employed in or about any shop for a longer period than eight hours on any day nor four hours on Saturday except in driving a delivery van. At least one hour must be allowed for a noonday meal to every young person employed for more than four hours. Employers in shops must provide suitable chairs or seats for young girls. Shops in which only members of a family are employed at home are not subject to these provisions.

Ontario.—Children under 14 years of age may not be employed in any establishment to which the Factory, Shop and Office Building Act applies. Girls under 18 and boys under 16 years of age may not be employed for more than 10 hours per day and 60 hours per week, but a different arrangement of hours per day may be made in order to give a shorter day's work on Saturday. Unless written permission is obtained from the inspector, work may not begin before 7 a.m. nor end later than 6.30 p.m. in a factory, or 6 p.m. in a shop, except on Saturday, the day before a statutory holiday, and during the period from December 14th to 24th inclusive, when girls under 18 and boys under 16 years of age may be employed in shops until 10 p.m. A young person who has been employed in one establishment for less than the permitted number of hours may not be employed in another establishment on the same day for a longer period than will complete such number of hours. One hour must be allowed for a noonday meal. In cases of emergency the inspector may grant exemption in regard to hours of labour for a period not exceeding 36 days in the year. In such cases boys under 16 and girls under 18 years of age may be employed for  $12\frac{1}{2}$  hours per day and  $72\frac{1}{2}$  per week on not more than 36 days in the year. An additional forty-five minutes for an evening meal must be given between 5 p.m. and 8 p.m. to ever young person working later than 7 p.m. The Lieutenant-Governor in Council may prohibit the employment of boys under 16 and girls under 18 years of age in establishments in which the work is considered dangerous or unwholesome. The inspector may require the employer to provide a suitable room in which employees may take their meals. A boy or young girl may not clean mill-gearing machinery while it is in motion and a young girl may not work between the fixed and traversing parts of any self-acting machine in motion. No person under 18 years of age may operate an elevator in a factory, shop, office, or office building. No person may employ a young girl in any occupation which would require her to lodge in a camp unless he obtains a permit from the Deputy Minister of Labour of the Province. Such permits are conditional upon compliance with regulations regarding proper supervision and sanitary conditions. It is provided that nothing in the Factory, Shop and Office Building Act shall be deemed to authorize the employment of young persons in contravention of the Adolescent School Attendance Act. The provisions of this Act are noted under the heading "School Attendance." The Factory, Shop and Office Building Act does not apply to factories in which less than five persons are employed, nor to shops in which only members of the family are working at home.

Quebec.—The Industrial Establishments Act provides that no boy or girl under 14 years of age may be employed in any factory, workshop, mill, etc. Employers must have age certificates for the children in their employ and produce them when requested by the inspector, who may require such certificates to be verified by affidavit. He may also require a physical examination of the boys and girls employed in a factory and the discharge of any found to be under age or physically unfit. Boys and girls under 16 years of age may not be employed in any industrial establishment nor in any trade or business unless they can read and write fluently and easily and have satisfactory certificates of study. Boys and girls who are enrolled as pupils of a night school and attend classes regularly may be authorized to continue their occupation. No person who employs a boy or girl who has not complied with the provisions of the Act may, in case of accident, plead contributory negligence on the part of the victim. Boys under 16 and girls under 18 years of age may not be employed in any establishment classified by the Lieutenant-Governor in Council as dangerous, unwholesome or incommodious. No boy or girl under 18 years of age may be employed for more than 10 hours per day and 60 hours per week unless a different apportionment of the hours per day is made in order to give a shorter day's work on Saturday. Night work between the hours of 9 p.m. and 6 a.m. is forbidden. In cotton or woollen factories working hours are limited to 55 per week and night work between 6.30 p.m. and 7 a.m. is forbidden. At least one hour must be allowed for a midday meal and an additional thirty minutes for an evening meal to employees working later than 6 p.m. In cases of emergency the Inspector may permit the employment of boys and girls under 18 years of age for 12 hours per day and 72 hours per week during a period of not more than six weeks. In such cases work may not commence earlier than 6 a.m. nor end later than 9 p.m. All employees must be provided with chairs or seats if their occupations permit of their sitting down. They must also have a place where they can warm their food and take their meals. Children and young girls may not do any operation connected with belting or other modes of transmission. Every employer must keep a register containing the names, ages and addresses of the boys and girls whom he employs and the times of each day and week during which they are employed and the hours at which they commenced and finished working. Domestic workshops do not come under the Act unless they are classified as dangerous or unwholesome.

Saskatchewan.—The Factories Act forbids the employment in factories of girls under 15 and boys under 14 years of age. Hours of labour for boys under 16 and girls under 18 years may not exceed 48 hours per week nor be later than 6.30 p.m. except by special written permit of the inspector. One hour must be allowed each day for a midday meal. In cases of accident or emergency the inspector may permit the employment of boys under 16 and girls under 18 years of age for 12½ hours per day and 72½ hours per week on not more than 36 days in the year. Work must not begin earlier than 7 a.m. nor end later than 10 p.m. An additional forty-five minutes must be allowed for an evening meal between 5 p.m. and 8 p.m. to young persons working later than 7 p.m. The Lieutenant-Governor in Council may prohibit the employment of boys under 16 and girls under 18 years of age in establishments in which the work is considered dangerous or unwholesome. Young girls may not clean mill-gearing or other machinery in motion, nor work between the fixed and traversing parts of any self-acting machine in motion. No person under the age of 16 years may operate a passenger elevator. If the inspector so directs in writing boys under 16 and girls under 18 years of age must have a suitable dining room provided for them by the employer. The employer must keep a register of the boys under 16 and girls under 18 years of age who are employed in the factory and of their employment. Overtime work must be recorded in such register. The Act does not apply to persons employed at home with members of the family only.

Street Trades

Alberta.—The Child Welfare Act, 1925, which comes into force on proclamation, provides that municipal councils may pass by-laws regulating, controlling and licensing children under 18 years of age engaged as messengers, bootblacks, vendors of newspapers and smallwares, and pin-boys in bowling alleys. No license may be granted to a girl nor to a boy under 12 years of age. Boys under 14 years of age can only obtain licenses by producing written authority from parent or guardian. A licensee may not engage in his occupation after 8 p.m. during the months December to February inclusive, nor after 9 p.m. during the remainder of the year, nor during school hours. Children under 16 years of age may not be employed habitually in any occupation which is likely to be injurious to life, limbs, health, education, or morals. A constable or other officer may apprehend without warrant as "neglected" any child under 12 years of age who is found peddling newspapers or other articles or distributing advertising matter for hire in any public place, or any child under 14 years of age who habitually hawks or sells articles in public places during school hours or after 9 p.m. A penalty is provided for any person who causes a child under 16 years of age to be in any public place for the purpose of singing or playing, or performing for profit, or offering anything for sale. The Act summarized above has not yet been proclaimed and the 1909 law is still in force, its provisions regarding child labour being very similar to those of the new statute, but the following differences may be noted. Under the Act of 1909, the occupation of pin-boy in a bowling-alley is not included in the list of occupations

for which licenses are required; the provisions respecting performing for profit apply to all children under 18 years of age; and the section which makes it unlawful to employ a child under 16 years of age in any occupation likely to be injurious to life, limbs, etc., is not included.

Manitoba.—The Child Welfare Act forbids the habitual employment of any person under 16 years of age in any occupation which is likely to be injurious to life, limbs, health, education, or morals. The Act authorizes municipal councils to pass by-laws regulating, controlling and licensing children employed as messengers, vendors of newspapers and smallwares, boot-blacks and pin-boys of bowling alleys. No license may be issued to a girl nor to a boy under 12 years of age. Boys under the age of 14 years may only be licensed on written authority from parent or guardian. Licensees may not engage in their occupation in school hours, nor after 8 p.m. during the months from December to February inclusive, nor after 9 p.m. during the remainder of the year. A constable or other public officer may apprehend, without warrant, as "neglected," any child under 12 years of age who is found in any public place peddling or selling newspapers or other articles, or distributing advertising matter for hire, or any child under 14 years of age who habitually hawks or sells articles in a public place during school hours or after 9 p.m. A penalty is provided for any person who causes a child under 16 years of age to be in any public place for the purpose of singing, playing, performing for profit (whether his own or the child's), or offering anything for sale.

Nova Scotia.—The Education Act forbids children under 16 years of age to engage in any street trade between the hours of 9 a.m. and 3.30 p.m. on any school day unless he has a certificate from the school principal or the secretary of the School Board that he has passed a satisfactory examination in Grade VII.

Ontario.—The Children's Protection Act provides that no girl under 16 and no boy under 12 years of age may engage in any street trade. Boys under 16 may not engage in a street trade or occupation between the hours of 10 p.m. and 6 a.m. A penalty is provided for any person who causes a child under 16 years of age to be in a public place for the purpose of playing, singing, performing for profit or offering anything for sale between the hours of 9 p.m. and 7 a.m. Boards of Police Commissioners in cities are empowered by the Municipal Act to pass by-laws regulating the employment of children as messengers, newsboys, bootblacks and vendors of smallwares.

Quebec.—The Industrial Establishments Act forbids boys and girls under 16 years of age to carry on any business in the streets or public places or to be employed as messengers or distributors of handbills, unless they can read and write fluently and easily and have satisfactory certificates of study. Such occupation may not be carried on after 8 p.m. Boys and girls under 16 attending night schools regularly may be authorized by the inspector to continue their occu-

pations.

Saskatchewan.—The City Act authorizes municipal councils to pass by-laws regulating, controlling and licensing children engaged as messengers, bootblacks, and vendors of newspapers and small wares. No license may be granted to a girl nor to a boy under 12 years of age. Boys under 14 years of age may only be licensed upon written authority of a parent or guardian. Licensees may not engage in their occupations after 8 p.m. during the months from December to February inclusive, nor after 9 p.m. during the remainder of the year. The Child Welfare Act provides a penalty for any person who causes a child under 16 years of age to be in any public place for the purpose of singing, playing, performing for profit or offering anything for sale between the hours of 10 p.m. and 6 a.m.

# Night Work

Legislation restricting night work in factories and shops and in street trades is outlined above under the headings dealing with those employments. General provisions are as follows:—

Alberta.—The Child Welfare Act, 1925, prohibits the habitual employment of children under 14 years of age between the hours of 9 p.m. and 6 a.m. This law comes into force on proclamation, which has not yet been made. The former law, which is still in operation, provides a penalty for any person who causes a child to be employed anywhere between the hours of 10 p.m. and 6 a.m.

British Columbia.—The Night Employment of Young Persons Act would prohibit the employment of persons under 18 years of age between the hours of 8 p.m. and 7 a.m. This Act is to come into force on proclamation concurrently with or after the enactment of similar legis-

lation in the other provinces.

Manitoba.—The Child Welfare Act prohibits the habitual employment of persons under 18 years of age between the hours of 9 p.m. and 6 a.m. and provides a penalty for any person who causes a child under 18 years of age to be employed for hire between 9 p.m. and 8 a.m.

Saskatchewan.—The Children's Protection Act provides a penalty to be imposed upon any person who causes a child under 16 years of age to be employed between the hours of 10 p.m. and 6 a.m.

# Employment in Theatres and Other Places of Amusement.

Alberta.—The Child Welfare Act, 1925, which comes into force on proclamation, empowers municipal councils to pass by-laws controlling and licensing children under 18 years of age employed as pin-boys in bowling-alleys. This Act also provides for a penalty to be imposed upon any person causing a child under 16 years of age to be in any public place, or in any circus or other

49071-D

place of public amusement to which the public are admitted by payment, for the purpose of singing, playing, performing for profit or offering anything for sale. The Superintendent of Child Welfare may, however, grant a license for the employment of a child of 10 years of age or over if he is satisfied regarding the fitness of the child and the conditions of employment. The Act of 1909, which is in force pending the proclamation of the 1925 law, contains similar provisions, except that the licenses are granted by the municipality and employment is restricted to seven hours per day.

Saskatchewan.—The Child Welfare Act contains provisions similar to those of the Alberta

Act of 1909 as given above.

Manitoba.—The Child Welfare Act contains provisions similar to those in the Alberta Act of 1925 as given above.

Ontario.—The Children's Protection Act contains provisions similar to those in the Alberta

Act of 1925, except that the license is granted by the municipality.

Quebec.—The Industrial Establishments Act forbids owners, tenants, or managers of theatres, moving-picture halls, hotels, or restaurants to employ a boy or girl under 16 years age who is unable to read and write fluently and easily and has not a satisfactory certificate of study. Children under 16 years of age attending night schools regularly may be authorized by the inspector to continue their occupations.

|     | 1926<br><sup>34</sup> Elementary grades.<br><sup>34</sup> Secondary and higher grades                                                     | 16,078<br>2,051  |               |               | 36 538,414<br>55,000 |                                             |

To avoid the confusion that would result from giving totals different from those given in the provincial reports the figures of 1925 are used throughout for Quebec. In all cases except the primary and nursery schools the figures of 1926 are also published in the provincial reports although the 1925 figures are used in making up their summary. The 1926 figures for each of the items in the above table except items 1 and 7 are as follows:— General Note

| Technical and night    | 15,334 | Monument National Lectures | 836    |
|------------------------|--------|----------------------------|--------|
| Teacher-training       |        | Historic Guides            | 60     |
| Blind and Deaf         |        | Schools of 1 ine Arts      | 901    |
| Classical Colleges     | 10,430 | Dairy Schools              | 281    |
| Other Colleges         | 7,795  | Ranger's School            | 20     |
| Universities (regular) | 8,478  | -                          | 45 440 |
|                        |        | Total '                    | 45.448 |

Further, to avoid confusion, the short courses for teachers at universities and colleges are entered under item 9 instead of item 3. There were about 2,700 teachers in these short courses who might be added to the 9,720 in item 3 making about 12,400 in all in teaching-training. There were in all about 64,000 teachers in Canada.

Note générale:

Afin d'éviter la confusion qui résulterait de totaux différents de ceux donnés dans les rapports provinciaux, les chiffres employés pour la province de Québec sont ceux de 1925. Excepté pour les écoles primaires et maternelles, les chiffres de 1926 sont aussi publiés dans les rapports provinciaux mais ceux de 1925 sont employé dans le résumé. Les chiffres de 1926 pour chacun des item du tableau ci-dessus 1 à 7, sont comme suit:

| Collèges classiques. 10,430 Ecole des Beaux-Arts. 90 | Cours techniques, hors des collèges<br>Cours pédagogiques<br>Sourds et aveugles.<br>Collèges classiques.<br>Autres collèges | 1,854<br>661<br>10,430 | Ecole de laiterie | 836<br>60<br>901<br>281 |
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|------------------------|-------------------|-------------------------|
|------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|------------------------|-------------------|-------------------------|

De plus, afin d'éviter la confusion, les cours abrégés des universités et collèges pour instituteurs sont entrés sous l'item 9 au lieu de l'item 3. Ces cours ont été suivis par environ 2,700 instituteurs qui pourraient être ajoutés aux 9,720 de l'item 3, domant un total d'environ 12,400 instituteurs se perfectionnant. Il y avait en tout environ 64,000 instituteurs et institutrices au Canada.

<sup>1</sup> Unspecified by sex in N.B. 390; in Man. 7,535; in Sask. 158.

2 Including independent as well as controlled primary schools.

3 Including Day elementary and secondary schools; the latter include day vocational full time pupils.

4 Unclassified 2,127.

6 Primary schools under control and independent.

7 The financial items in Ontario include day and evening vocational schools. To the number of teachers should be added 677 in day vocational schools. These were not classified by sex.

8 "Districts". The number of municipalities was 1,792. Schools under control only.

9 Estimate only. There were 5,627 rural schools sections; 26 Cities and 140 Towns with public, and 25 Cities, 72 Towns and 420 rural separate schools; 178 cities and towns with High Schools and Collegiate Institutes. Assuming that each city and town and each village school public and separate and each secondary school represented aschool section, the total number of sections would be 6,876 as above.

10 In existence. The number in operation was 1,862.

11 In existence. Dec. 31, 1926.

12 Of this amount \$9,043,636 was contributed by subsidized independent schools and higher institutions.

13 Exclusive of promisory notes.

14 Exclusive of \$516,924 to provincial university.

15 Exclusive of \$14,935 in Grants to the schools for the Deaf and Blind.

16 Including \$133,030 on Technical Education.

17 Including Government expenditure on salaries of teachers of general schools and P.W.C. (\$260,003) and total supplement by districts (\$85,772).

<sup>&</sup>lt;sup>1</sup> Common School System formed.

vocational schools.

<sup>6</sup> Half year only.

<sup>1</sup> Ecoles élémentaires organisées.

<sup>6</sup> Coles professionnelles.

<sup>6</sup> Six mois seulement.

<sup>2</sup> Free School System established.

<sup>6</sup> Including private Schools.

<sup>8</sup> Ecoles primaires seulement.

<sup>8</sup> A l'exclusion des des professionnelles.

<sup>9</sup> Comprenant les écoles privées.

# 10. Percentage of Population of Canada 5-17 Years of Age attending School in 1911 and 1921.

The chart opposite is intended to illustrate the progress made in school attendance between 1911 and 1921. Tables 4 to 7 will enable persons interested in the subject to make their own analyses.

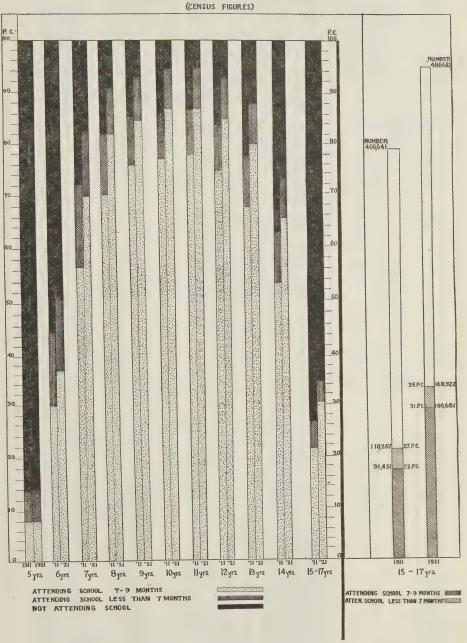

In the first part of the chart the black shows the proportion at each age not attending school; the cross hatched, the proportion attending school less than 7 months or what might be considered an inadequate period, while the dotted shows the proportion attending 7 to 9 months, or what might be considered an adequate year. A distinction should be drawn between: (1) the ages 5 and 6; (2) the ages 7 to 14 or the usual compulsory age period; and (3) the ages 15 to 17 which are post compulsory or very partially compulsory age periods. During the ages 7 to 14 the length of the black columns, or rather the decrease in this length, is of special significance. If, for example, the black at the age of 12 is compared for 1911 and 1921 it will be noticed that an improvement is shown of a decrease from 17 p.c. cut of school in 1911 to 7 in 1921, or nearly 60 p.c. Further, it will be noticed that there was a larger proportion at school at the age of 13 (that is, up to the age of 14), in 1921 than at any age in 1911. The black columns at the ages of 5 and 6 and 14 to 17 have not as much significance as the other two columns. At the ages of 5 and 6 it will be noticed that improvement is not marked. In fact the cross hatched portion, especially at the age of 5, bears a greater ratio to the dotted portion in 1921 than in 1911, thus showing that attendance was less regular in 1921; while the ages subsequent to 6 years show a decided improvement in this respect. On this point the reader is referred to page 11 of the Annual Report for 1922 in which conclusions bearing on this point were based on other than census figures and before the census figures were known. In the case of the ages of 14 to 17 only the dotted and cross hatched columns are of much importance. The improvement at these ages is shown absolutely as well as relatively in the supplementary chart at the right. It should be noticed that an increase of nearly 60,000 at school at these ages is shown out of an increase in population of about 80,000. The age-grade tables i

# 10. Pourcentage de la population du Canada de 5 à 17 ans, fréquentant l'école en 1911 et 1921.

Le diagramme ci-contre constate les progrès réalisés par la fréquentation scolaire, entre 1911 et 1921. Les tableaux 4 à 7 permettront aux éducateurs d'en tirer leurs propres conclusions.

Dans la première partie du diagramme, l'espace en noir représente la proportion des enfants de chaque âge qui ne vont pas à l'école; la partie couverte de hachures représente la proportion de ceux fréquentant l'école moins de 7 mois; enfin, la partie pointillée représente la proportion de ceux fréquentant l'école de 7 à 9 mois, c'est-à-dire une année ordinaire. Il est nécessaire d'établir une distinction entre. (1) les âges de 5 à 6 ans; (2) les âges de 7 à 14 ans, période habituelle de l'école obligatoire et (3) les âges de 15 à 17 ans, où l'école n'est plus obligatoire, ou ne l'est que relativement. Le rétrécissement des colonnes noires, représentant les enfants de 7 à 14 ans, a une signification toute spéciale. Si par exemple, on compare par cette colonne noire, représentant les enfants de 12 ans en 1911 et 1921, on remarque une amélioration notable de la situation, puisqu'en 1911, 17 p.c. des enfants ne fréquentaient pas l'école, tandis qu'en 1921. il n'y en avait plus que 7 p.c., soit un gain de 60 p.c. En outre, on peut voir qu'en 1921, les enfants de 13 à 14 ans étaient à l'école en plus grand nombre qu'à tous autres âges en 1911. Les colonnes noires consacrées aux âges de 5 et 6 ans u de 14 à 17 ans ont moins d'importance que les deux autres colonnes. On observe qu'aux âges de 5 et 6 ans l'amélioration est peu sensible. A cet égard nous renvoyons le lecteur à la page 11 du rapport annuel de 1922, où des conclusions sur ce sujet sont basées sur des chiffres autres que ceux du recensement, les données du recensement étant alors inconnues. En ce qui concerne les enfants de 14 à 17 ans, la colonne portant des hachures et la colonne pointillée ont seules une réelle importance. L'amélioration que l'on constate à ces âges est analysée, tant d'une manière absolue que d'une manière relative, dans le diagramme supplémentaire de droite. Il convient de faire ressortir qu'une augmentation de population d'environ 80,000 âmes a pour corollaire un accroissement de près de 60,000 écoliers de ces âges. Les tableaux consa

<sup>1</sup> Not including 242 in P.W.C.—<sup>2</sup> Most of these were in ungraded schools and were classified by "Forms I to V" where Forms I and II correspond to Grades I and II, and Forms III to V coasist of two grades each. Form V however, includes some high school grade pupils. For classification of most of the 31,552 by age and grade see Table 30—<sup>3</sup> These include 1,519 in fifth classes in notation who were not classified by grade. In addition to these there were 3,547 in night high schools. This make a total in secondary grades for Ontario and 3,511. Adding the 14,556 in Catholic Complementary grades [10 total in secondary grades in Canada would be 157,247. If the day technical pupils in other provinces than Ontario and the high school pupils in classical colleges, other preparatory schools and Catholic Normal schools in Number 3.3 and University preparatory courses throughout are added, this total in Saskaschowan, "Preparatory" in Quebec, and Kindergarten in Saskaschowan.

daires pour tout le pays. 4 Préparatoire, les évoles maternelles et les jardins d'enfance dans l'Ontário, préparatoire dans Québec et école maternelle en Saskatchewan

The data of Table 16 exclude most of the ungraded schools as they did not classify their pupils according to the eightfour grade system. The classification of these pupils is shown in Table 30.

Le tableau 16 ne comprend pas la plupart des écoles à classe unique parce qu'elles ne classifient pas leurs élèves selon le système des huit formes. La classification de ces élèves est donnée dans le tableau 30.

# Distribution of Pupils by Age and Grade—Répartition des élèves par âge et par degré 17.—Ontario Schools, 1925—Écoles d'Ontario, 1925

#### 5. SECONDARY EDUCATION

Secondary education, as distinguished from primary education is in all provinces of Canada, except in the Catholic school system of Quebec, a somewhat misleading term. In Quebec Catholic schools secondary education has a definite meaning, and refers to a system of education extending from an early age to the completion of a full course in Arts. Thus in the classical colleges, the secondary institutions for young ladies and certain other independent secondary schools the courses often extend over 8 years and correspond more or less roughly to the entrance work, 3 years of high schools work and four years of University Arts work in the other provinces. The academic training of teachers for primary schools on the other hand, is given at the primary schools and normal schools. The class of academic work done in these includes "secondary" work as understood in the other provinces, but is not so called. In the new course of studies this work is known as "primary complementary". The usage here is not radically different from that in the other provinces where we find "Teachers' (academic) Courses", and "Matriculation Courses" in the high schools. Indeed in Manitoba secondary schools, until very recently, there were found a "University Course" designed purely for prospective university students, and a "Teachers' Course" designed purely for prospective teachers. A link connecting these two was introduced at a later date and was known as the "Combined Course". In Quebec this "University Course" would be known as secondary work, while "Teachers' Course" would now be "primary complementary"; in other words primary school continuation. In all provinces this is what secondary education really is, for there is no set of secondary schools from which pupils trained elsewhere are excluded, provided that they have attained to the standard required. This standard may be acquired even in rural one-room schools provided the teachers are qualified to teach the The departmental examinations held near the beginning of July in all provinces, as well as the course of study prescribed by the department, standardize the work for each province. For example a pupil, trained in a one-room rural school in Nova Scotia might write the departmental examinations for Grade XI (including university matriculation) on the same subjects, and side by side with a pupil trained in one of the largest academies; and if the former pupil passed the grade as well as the latter he would be equally admitted to Grade XII in that Academy or to the first year in Arts in a University. The same applies to all other provinces although in many provinces high school work in rural schools may not be carried further than Grade IX or X.

The different kinds of institutions in which high school work is done in the different provinces may be seen in the following table. The comparative number of pupils in each kind will indicate

the proportion of the high school work of the province it carries.

#### 5. ENSEIGNEMENT SECONDAIRE

En employant l'expression "enseignement secondaire", dans toutes les provinces du Canada, sauf Québec, on se sert d'un terme inexact et susceptible d'être mal interprété. Dans les écoles catholiques de Québec, l'enseignement secondaire est parfaitement défini; on désigne ainsi une succession d'études commençant à l'âge le plus tendre et se terminant à l'achèvement du cours de philosophie (arts). Ainsi, dans les collèges classiques, les pensionnats de jeunes filles et certaines autres institutions de cet ordre, indépendantes, souvent le programme s'étend au delà de huit ans et correspond à peu près à trois années du programme des "high schools" et quatre années des études universitaires à la faculté des Lettres dans les autres provinces. D'autre part, les instituteurs destinés à enseigner dans les écoles primaires, reçoivent leur formation d'abord aux écoles primaires, puis aux écoles normales. Les études de nature académique qu'ils y font embrassent ce que l'on appelle dans les autres provinces, le programme "secondaire", quoiqu'il n'en porte Dans les nouveaux programmes, ces études sont connues sous le nom de "primaires pas le nom. complémentaires". L'usage ici suivi ne diffère pas radicalement de celui des autres provinces, où nous trouvons dans les "high schools" des cours académiques pour instituteurs et des cours de matriculation. En fait, dans les institutions d'enseignement secondaire du Manitoba, il existait encore tout récemment un "cours universitaire" à l'usage exclusif des jeunes gens se destinant à l'université et un cours d'instituteurs, à l'usage exclusif des candidats à l'enseignement. Plus tard, on introduisit un troisième cours, destiné à combiner les deux précédents, lequel porta le nom de "cours intermédiaire". Dans Québec, ce cours universitaire entrerait dans le cadre de l'enseignement secondaire, tandis que les cours à l'usage des instituteurs seraient des cours "pri-Dans maires supplémentaires", ou, en d'autres termes, le prolongement de l'école primaire. toutes les provinces, c'est ce qu'est réellement l'enseignement secondaire, car il n'y existe pas d'écoles secondaires d'où soient exclus les élèves instruits ailleurs, s'ils possèdent les connaissances requises. Ces connaissances peuvent être acquises dans les écoles rurales à classe unique pourvu que les instituteurs soient en mesure de les enseigner. Les examens obligatoires qui ont lieu au commencement de juillet dans toutes les provinces, ainsi que le programme d'études dressé par le ministère, établissent le niveau de ces connaissances dans toutes les provinces. Par exemple, un écolier sortant d'une école rurale à classe unique de la Nouvelle-Ecosse peut subir les examens officiels pour le degré XI (y compris la matriculation universitaire), sur les même sujets et côte à côte avec un élève inscrit dans l'une de nos meilleures académies; et si ces deux candidats passaient l'examen avec succès, ils seraient, l'un et l'autre, admis au degré XII de cette académie ou en première année de la faculté des Lettres dans une université. Et ce que nous venons de dire s'applique à toutes les autres provinces, quoique dans plusieurs provinces, les écoles rurales ne peuvent pas préparer aux "high schools" plus loin que les degrés IX et X.

On verra dans le tableau suivant l'énumération des différentes institutions de chaque province, préparant à l'entrée dans les "high schools". Le nombre comparatif des élèves de ces diverses catégories d'écoles indiquera la proportion des matières de haute école qu'on y enseigne.

# 5.—SECONDARY EDUCATION—ENSEIGNEMENT SECONDAIRE

62.—Enseignement secondaire au Canada: Types d'écoles où I'on professe les matières secondaires dans chaque province du Canada, chiffres de 1926 ou du dernier rapport 62.-Secondary Education in Canada: Statistics of the different types of Schools doing work of High School Grade in each province 1926 or latest year reported
